

AQUALISA

A GREAT DAY STARTS
WITH A GREAT SHOWER

Say Hello to Aqualisa smart mixer showers

At Aqualisa, we believe a great day starts with a great shower. We have been at the forefront of showering technology for 40 years. In 2001 we invented the first digital shower, offering precise control, consistent temperatures and a range of user friendly features to make showering more enjoyable. We have since renamed our digital showers 'smart' to reflect more accurately the unique functionality and intelligence behind this pioneering technology.

Now in 2017 we are introducing Q™, our latest smart mixer shower innovation. Made to Aqualisa's highest standards of quality design and engineering, Q™ is packed full of features, intuitive and easy to use. We believe it is the world's smartest and most personal shower yet.

“For over forty years, Aqualisa has specialised in solutions that make showering an EVERYDAY PLEASURE.”
 Beverley Kent, Norfolk

AQUALISA

..... welcome

Aqualisa the brand

Aqualisa is a British company that stands for quality, innovation, service and a sensational showering experience. A name to trust. For almost 40 years we have been at the forefront of cutting edge shower design. In 1977 our revolutionary thermostatic shower valve built a reputation for innovation and changed the British bathroom forever. We have since pioneered smart mixer showers as well as continuing to develop thermostatic shower technology. Today, for householders and installers alike, Aqualisa delivers superb performance and customer back-up that is second-to-none.

Obsessed with showers

Before 1977 British plumbing and showers were notoriously unreliable. Our founder was determined to change this and his revolutionary use of bi-metallic technology in showers brought bathrooms into the 20th century. In 2001, Aqualisa brought showers into the 'smart age' with another ground-breaking technology – the smart shower. Smart showers have since led the way in showering, providing reliable performance, unrivalled control and ease of use, and now in 2017, exciting new personalisation features meaning you can enjoy a unique showering experience, tailored to you.

Sir Winston Churchill on 'The Green' in Westerham, Kent.

DID YOU KNOW?

AQUALISA REVOLUTIONISED THE THERMOSTATIC VALVE

In 1977, our founder's invention of the bi-metallic thermostatic mixer valve changed the face of showering. Straightforward to install, it reacts to water flow and temperature changes instantaneously. Helping make showering an everyday pleasure for millions of people.

Smart innovation

In 2017 we launched our latest smart shower, Q™ Smart. Based on our precision smart technology, it also features customisable colour options, allows you to create personal shower experiences and has a unique water saving proximity sensor, so you can create your perfect shower, and save water too!

Our philosophy

Aqualisa is based in Westerham, Kent. We are proud to be using British design and manufacturing skills. Our philosophy has always been the same: to use innovative technology to improve your shower experience.

You can contact us on: 01959 560 010
 Visit our website at: www.aqualisa.co.uk

FIRST THINGS FIRST

Which shower should I choose?

Regardless of the size of your bathroom, whether you live alone or have a big family, Aqualisa has a shower for you. We're experts in smart, mixer and electric shower technology. But which should you choose? We're more than happy to advise, but first it helps to answer a few simple questions... You can find lots of information on our website www.aqualisa.co.uk or call us on 01959 560 010.

WHAT FEATURES DO YOU WANT?

From simple electrics to our recently launched smart showers, we have a shower for every home and every budget.

HOW BIG IS YOUR BATHROOM?

Not all bathrooms are the same. Some are huge, some are compact. Most of our showers will fit any size bathroom or en-suite, and any style of enclosure from luxurious wet rooms and walk-throughs to space-saving enclosures. We also offer bath shower mixers for bathrooms where an over-bath shower is the best option.

TRADITIONAL OR CONTEMPORARY?

Functionality is important but so are aesthetics. That's why our designers spend so much time making sure our showers look the part. Our electric showers Aqualisa Lumi™ and Sassi™ are super modern but we also offer more traditional designs such as Aquatique™ Thermo.

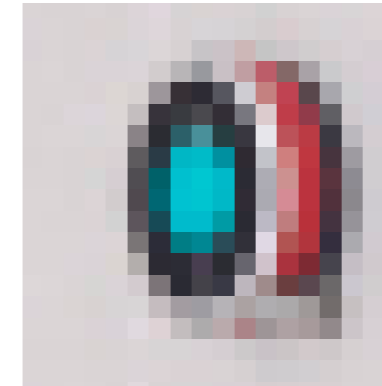

WHAT'S YOUR BUDGET?

Some people are seeking a single shower for the main bathroom, others their dream shower. Perhaps you are installing second or third showers that won't be used every day, updating a second home or refurbishing a buy-to-let property. We have showers to suit every price range, but ease of installation is crucial too. Designs such as our Quartz™ Electric and Vitalise™ Electric showers are particularly popular with installers because they are straightforward to install.

The Aqualisa range in a nutshell

So far we've asked lots of questions, which only you can answer. But once you've answered them, your choice of Aqualisa shower will be easier. Before you choose, let us explain what you'll find in the following pages. We offer three shower 'systems' or types of shower, and each has its own section.

SMART MIXER SHOWERS

Smart showers incorporate advanced technology so everyone can select a preferred temperature, and even start the shower from a remote control. Also, because the valve and controls are separate and can be sited apart they offer greater flexibility for installation. **See page 14**

MIXER SHOWERS

Aqualisa's thermostatic mixer showers are ultra reliable, superb value and very simple to use. Simply select your temperature, turn the lever and step in. No manual blending of hot and cold water; the shower does it all for you, and maintains the temperature throughout. **See page 46**

ELECTRIC SHOWERS

Electric showers heat cold water to the right temperature, instantly, ideal if you have limited supplies of hot water; for example, large family households relying on a single immersion heater. You never have to worry about using up the hot water again. **See page 94**

CONCEALED OR EXPOSED?

A concealed shower looks clean and sleek because the plumbing which delivers water to the mixing valve or shower head is hidden behind the wall. Exposed showers look just as stylish but the valve that blends the water and pipes that deliver it can be placed on the wall – making exposed showers really quick and easy to fit.

LOOKING FOR AN INVIGORATING, FAST FLOWING SHOWER?

A power shower will fit the bill. True power showers have an integral pump, like our Aquastream™ Thermo or any pumped smart shower – all of these suit gravity water systems. However, if you have a high pressure water system and you want 'power-shower' performance, you can choose any other Aqualisa mixer or smart shower that has been designed specifically to work on high pressure water systems.

HARMONY™ HEADS

A brilliant combination of style, functionality and performance – the Harmony™ shower head is unique to Aqualisa. It comes as standard with all Quartz™ and Visage™ smart models, Midas™ 100 and 110, Dream™, Aspire™ DL, Siren™ SL, Colt™ and Aquastream™. User-friendly features include; impressive spray patterns, easy clean nozzles and an ingenious anti-twist mechanism that helps extend the life of your shower hose. They also have an 'eco' spray setting that reduces water consumption by up to 25% – without compromising your showering experience.

MAKING LIFE EASIER

We design for everyone, irrespective of age, mobility and special requirements. Our smart showers with either LED or colour screen displays let you know that water has reached temperature, tactile controls are easier to use, remote control means less effort to fill baths and instant smart dual outlets are ideal for all the family and the less able.

SAVING WATER, DROP BY DROP

We all have a responsibility to conserve resources. As a shower manufacturer we are particularly concerned with saving precious water resources. Technological advances mean we can do that whilst ensuring you still have a great shower experience. We've developed smart valves with an 'eco' mode capable of reducing water flow by up to 33%. Our new Q™ smart shower features unique smart proximity sense technology so the water flow automatically reduces

when you step away to shampoo your hair or shave your legs! Harmony™ shower heads have an 'eco' spray setting that reduces water consumption by up to 25% and the eco-stop button on the Midas™ range limits flow by up to 50%.

HIGH QUALITY GUARANTEED

All our showers and accessories are engineered to the highest standards. They're also built to last. That's why we guarantee our products for up to 5 years. Find out more online and make sure you register your purchase to activate the guarantee.

For information on guarantees go to page 129 or visit aqualisa.co.uk/guarantee

DID YOU KNOW?

EACH THERMACOIL™ IN AQUALISA'S THERMO RANGE IS WOUND BY HAND

This means we can be confident that the quality and precision of the temperature and flow of our Thermo showers is as reliable as possible.

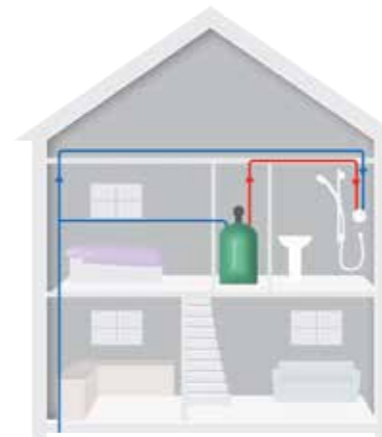

WHERE TO BUY?

To find your nearest Aqualisa retailer visit our website and use our clever 'Where to buy' tool to find the stockist closest to where you live. Our retailers try to display as many Aqualisa showers as possible but it's always worth phoning them in advance if you want to view a specific model.

For help, call us on **01959 560 010** between 8.30am – 5.00pm, or alternatively send an email to enquiries@aqualisa.co.uk And don't forget you can always visit aqualisa.co.uk/where-to-buy

Which water system do you have?

There are three main types of water system found in British homes; high pressure, gravity and combi. The type of shower you can install will be determined by the water system so it's important to know which one is in your home. You may even need a pump to boost water flow. If in doubt, you should ask your plumber.

HIGH PRESSURE SYSTEM

This kind of system is often fitted in newer or refurbished properties. Water is provided via a high pressure hot water cylinder, which will often be located in an airing cupboard. An expansion tank is usually visible on top of the cylinder.

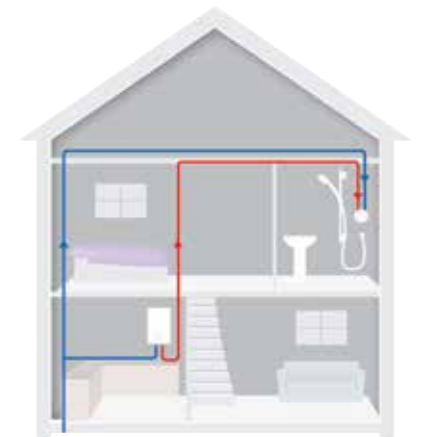

Booster pumps should not be used with this water system.

GRAVITY SYSTEM

Gravity systems are most common in the UK. They tend to be found in older properties. There is normally a cold water tank in the loft and a hot cylinder in the airing cupboard. The greater the vertical distance between the tank and the shower head, the better the performance.

To boost flow, you can fit a pump with this water system.

COMBI SYSTEM

A combination boiler – often referred to as a 'combi' – is usually located in the kitchen and fires up the moment you turn on a hot tap.

Booster pumps should not be used with this water system.

SHOWER PUMPS

If you have a gravity water system – you might need to add extra power to your shower. Designed and made exclusively for Aqualisa by pump experts Stuart Turner – the Mach range of pumps are ideal for use with mixer showers on gravity water systems and will deliver a truly sensational showering experience when teamed with an Aqualisa High Pressure/Combi smart valve.

Mach 120
Will give your shower a moderate boost – this will deliver what you need every time you start showering.

Mach 250
Will give a medium boost and is suitable for use with two shower heads or a single shower head with bodyjets.

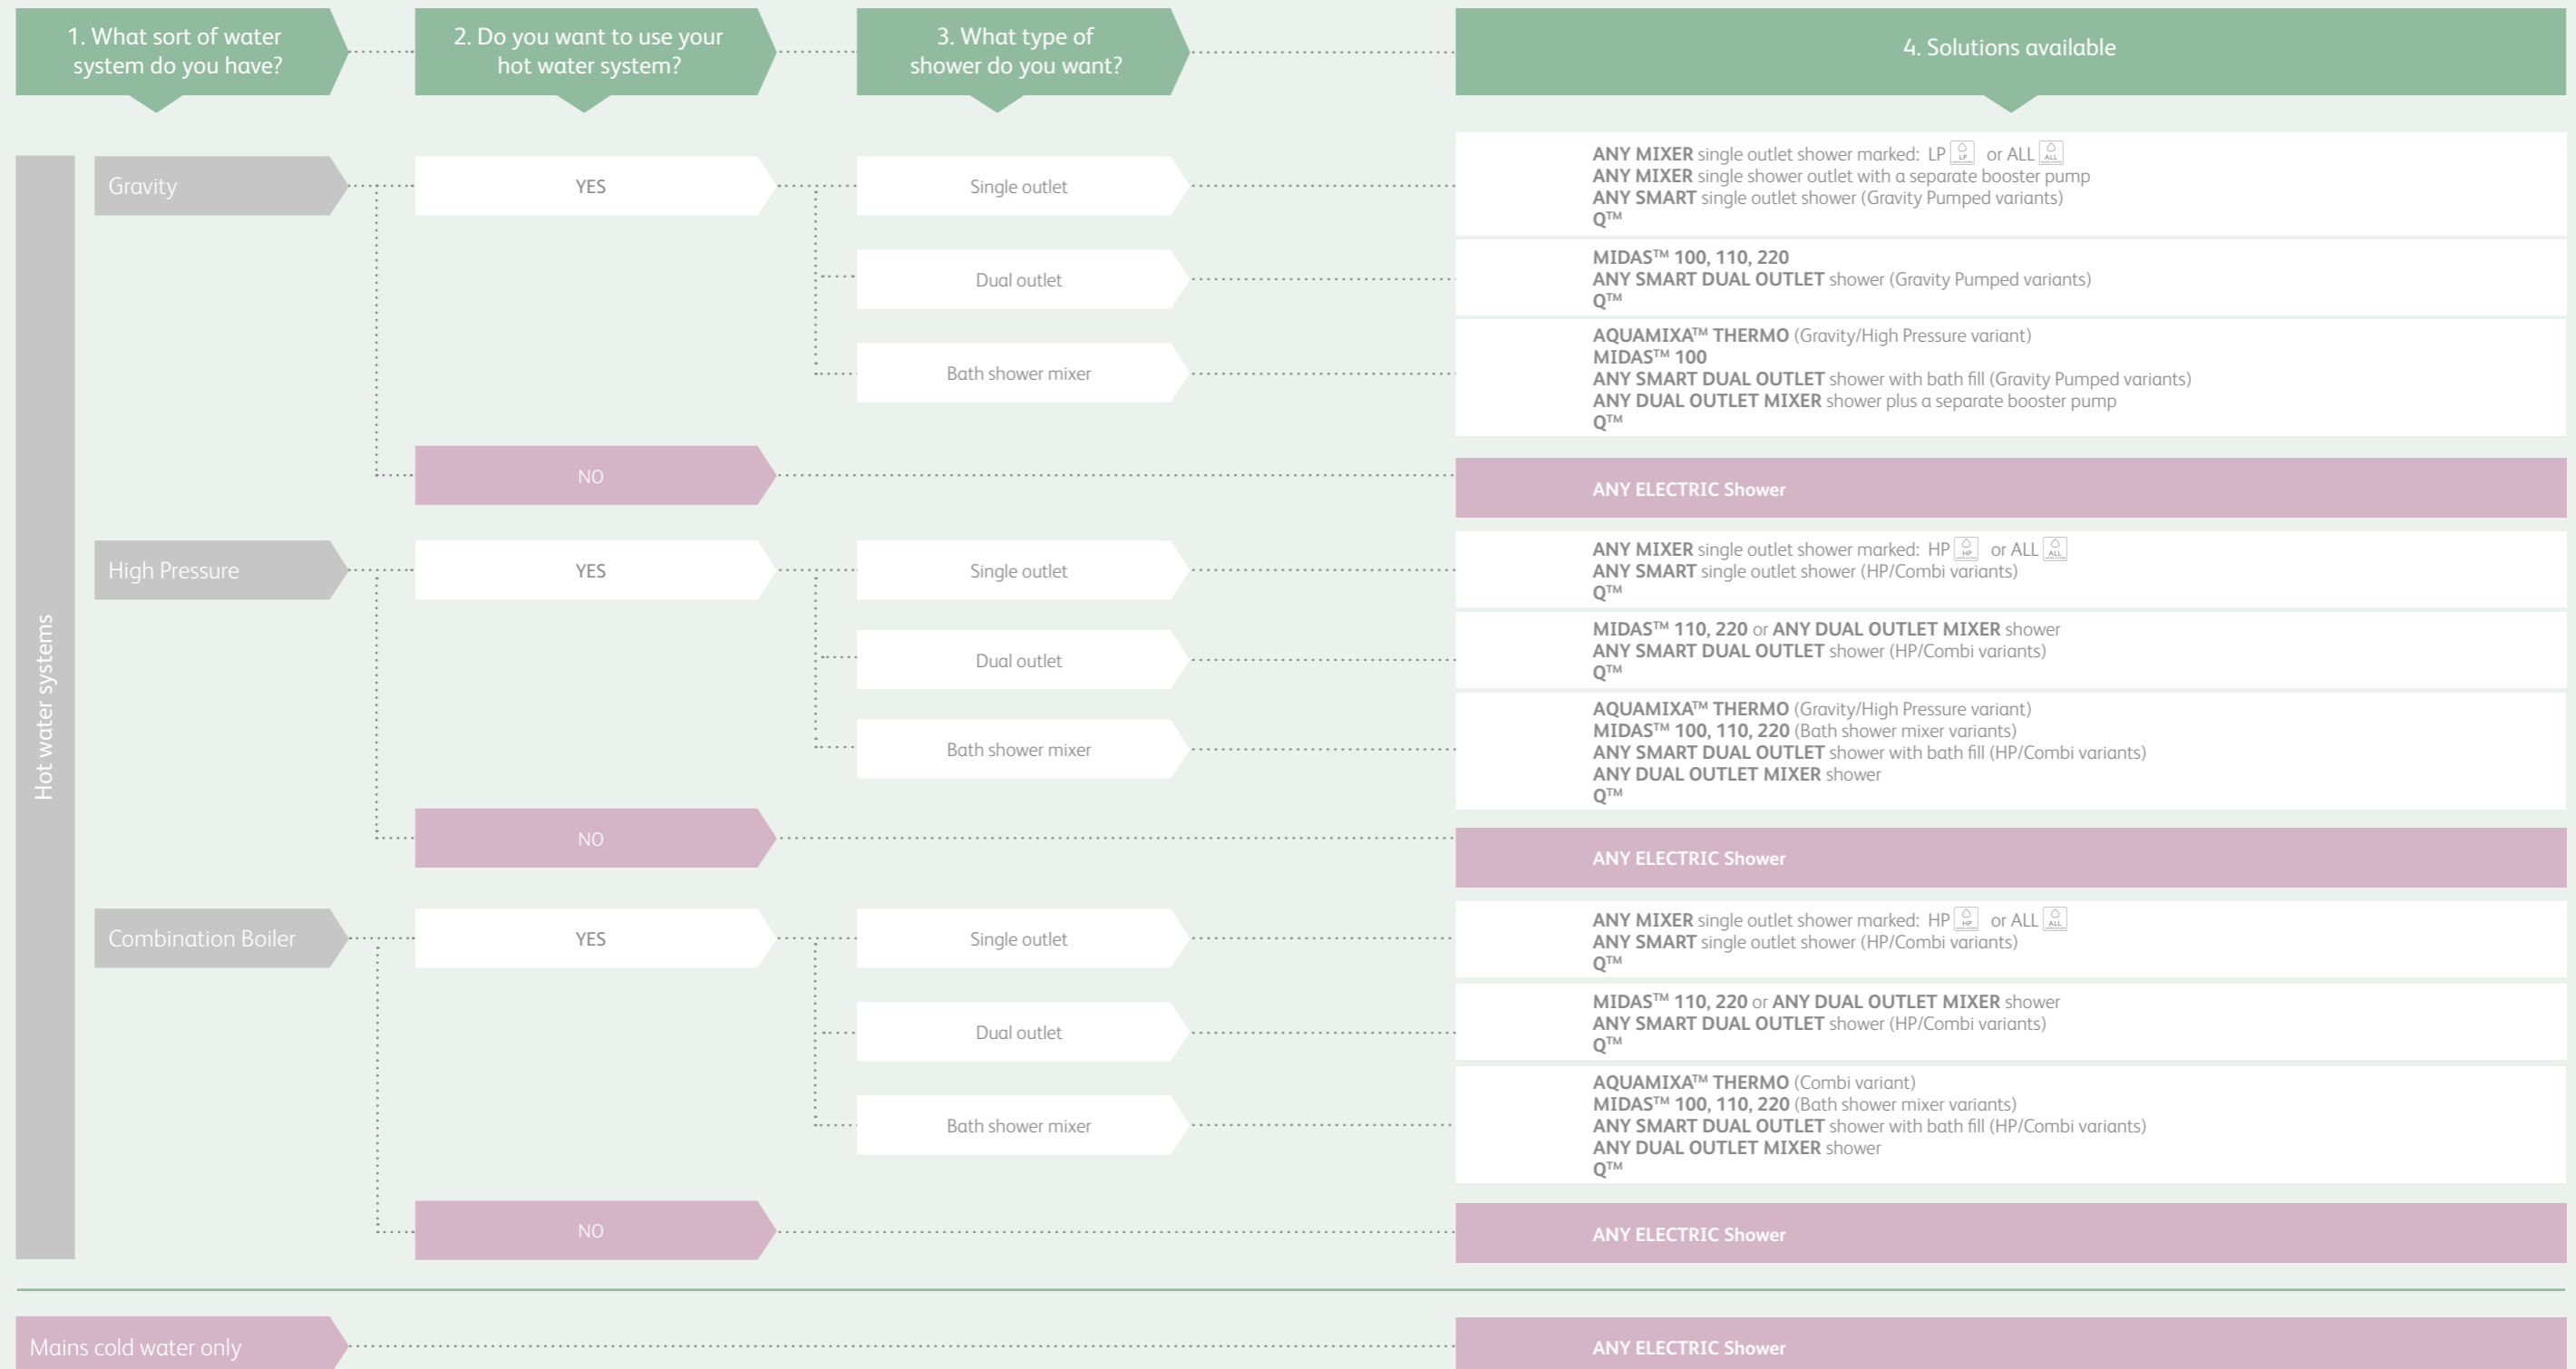

Mach 340
Will deliver serious 'oomph'. This will be perfect to use with two shower heads and two bodyjets. Or a single shower head and four bodyjets – the ultimate in pump power!

Our pumps are suitable for use with Gravity water systems only.

Sensational showers simplified. A guide.

This simple guide will help you choose your new shower or bath fill. First, identify your water system using the diagrams and descriptions on page 9. Then, follow the chart on the right to choose the shower or bath fill that is suitable. For further help, call us on 01959 560 010.

Smart Mixer Showers

PAGE
14

Invented and launched by Aqualisa, smart showers provide ease of use, perfect temperature and with new Q™, customisable looks and functionality. A truly personal showering experience.

Mixer Showers

PAGE
46

Thermostatic mixer showers are reliable and deliver a constant flow of water at a consistent temperature. Aqualisa mixers still set the standard others follow, whether with our original Thermacoil™ valves, bar valve ranges or the latest Dream™ DCV range.

Electric Showers

PAGE
94

Simple and economical, electric showers heat water for your shower as and when it's required – there's no demand on stored hot water you might need elsewhere – and can be installed in hours. Ideal for additional shower rooms.

control – HEAVEN!”*

Amelia Todhunter, Cumbria

Smart Mixer Showers – what you need to know

Aqualisa invented and pioneered ground-breaking smart mixer showers (or smart showers) in 2001. Since then we have been constantly refining and perfecting the technology so our products continue to lead the field. In 2017 we launched Q™ Smart, our smartest and most personal shower yet, offering a truly unique showering experience.

WHY CHOOSE A SMART SHOWER?

Smart showers have all the features of conventional thermostatic mixer showers but with additional smart benefits.

Smart showers check the water temperature 100 times per second to ensure constant, accurate temperatures and they include safety features such as an automatic shut-off function to guarantee you and your family will be safe should your hot or cold water supplies unexpectedly fail. There is also reassurance of a pre-selected maximum temperature.

Plus, what makes them really smart is the vast array of user-friendly features which enhance you and your family's showering experience, including easy to use controls, remote activation and new personalisation options with our new Q™ smart shower.

SAVE WATER AS YOU SHOWER

If you're eco conscious, then smart is the choice for you. The intelligent smart valve, which powers our smart showers, can be set to 'eco' mode capable of reducing water by up to 33%, plus with our new Q™ smart shower we have introduced a new proximity sensor feature which reduces water flow when you step away to shampoo or condition your hair, or shave your legs.

INTUITIVE DISPLAYS AND REMOTE ACTIVATION

With smart showers you don't have to reach in to test the temperature - they visually let you know when your perfect temperature has been reached with an LED indicator that flashes. Plus with an optional remote control, you can even turn on your shower from outside the enclosure.

Are smart showers suitable for my bathroom?

Smart technology works in all bathrooms, small or large, for all people. It's great for families because precise temperature control means your shower will be temperature perfect, every time. You can choose adjustable heads with multiple spray patterns or drencher heads offering you a spa-like experience. We even have smart bath fills, making life easier if you have children who bathe every night. So whether you're upgrading or starting from scratch you really can't go wrong.

LOVED BY INSTALLERS

There is an additional, innovative benefit that has an impact on installation – the water blending valve and control are separate. And since the smart valve is no larger than a shoe box it can be located in the loft, airing cupboard or even under a bath, making it easy to install and access for maintenance. Less pipework and no valve to bury means smart showers can be installed quickly and easily with minimum disruption.

David Beattie, Aqualisa product trainer

Q™ Smart

Smart shower with single or dual outlets

We are proud of Q™, our next generation smart mixer shower that's set to revolutionise the way we shower. Based on Aqualisa's precision smart technology ensuring superb performance and packed full of features, this is our smartest and most personal shower yet.

Crafted with high quality materials, Q™ was designed with individuality and style in mind. Whether you prefer to make a style statement, unwind after a work out or do your bit for the environment, Q™ is designed to fit around you.

INTUITIVE DESIGN

Intuitive and easy to use, you're in complete control with Q™. Its unique proximity sensor will greet you with a friendly 'Hello' displayed on the screen, and the shower will power on when you press the on/off touch switch. A single Q™ lever, controlled by magnets, will effortlessly glide when you move it up and down to adjust the flow, or press in to navigate the menu. Turn the temperature bezel clockwise and anti-clockwise to select your temperature and you will see the precise temperature being displayed on the screen as you move it.

YOUR PERSONALISED SHOWERING EXPERIENCE

At the heart of Q™ lies My Q™, which gives you the ability to choose from a range of pre-set experiences that we have created for you like 'Eco', 'Sport' and 'Family' as well as the option to create and save your own showering experiences with your unique combinations of temperature, outlet, flow and duration, so that you can repeat that perfect shower every time, even the last one you had.

- Unique proximity sensor that reduces water flow when stepping away from the shower
- Touch on/off switch
- Single control lever
- Wireless remote control
- Pre-set and personalised shower experiences
- Customisable colour options
- TFT colour display screen

SAVE WATER AS YOU SHOWER

Eco conscious? If you are eco conscious like we are, you will be able to save water as you shower with Q™'s unique proximity sense technology. Water flow is automatically reduced when you step away from its proximity sensor to shampoo your hair or shave your legs. When you move back in front of the sensor, it will resume its original flow. And should you forget to turn it off and step out of the shower completely, Q™ will automatically turn it off for you.

For full range, features and prices [See page 36](#)

Q™ Smart

Smart shower with single or dual outlets

COLOUR YOUR WORLD

We have created a range of five different colour accents to choose from to suit your style and decor, from Sunrise Orange to Lagoon Blue. Your choice will include a matching colour accent for both the bezel and the shower handset.

EFFICIENT SHOWERING PERFORMANCE

Powered by the new and improved Quartz™ smart valve which analyses temperature 100 times a second, Q™ will deliver you precision shower performance and temperature every time. From the moment you walk in the shower to the minute you step out.

BESPOKE SHOWERING

Premium to the last detail, Q™ comes with a customisable handset and drencher head to maximise the showering experience. The new Vita™ handset gives a wonderful showering experience with 3 different shower modes available in a simple click. The 250mm drencher head will deliver you a fuller, spa-like experience.

REMOTE CONTROL

Experience the ultimate convenience of a Q™ wireless remote control, allowing you to turn the shower on from outside the enclosure, or even from your bedside table. The remote control can be mounted anywhere and can be recharged via USB.

SINGLE AND DUAL OUTLET

Whether you're after a multi-tasking dual outlet shower with bath fill option for your family bathroom or your own bathroom with the Q™ drencher head, there's a Q™ shower system to suit. Plus, choose an exposed system and make installation hassle free.

Q™ Smart dual outlet concealed with adjustable and wall fixed drencher heads with Lagoon Blue accent and remote control. See page 39

Quartz™ smart dual outlet

Smart shower with adjustable and drencher heads and bath fill

Quartz™ smart dual outlet is intuitive and easy to use, boasting one touch control, illuminated 'shower ready' LEDs showing when it's time to step in. Plus, you can choose a remote control so you don't get wet when starting, stopping or diverting your shower. To top it all, a stunning drencher and adjustable shower head combination give 'power shower' performance at the touch of a button.

- Precise, temperature perfect, thermostatic showering
- Easy to use push button start/stop and divert control
- Intuitive LED display shows the chosen temperature has been reached
- the convenience of a remote control
- Set to 'eco' mode and save up to 33% water
- A range of useful accessories such as retrofit wallplate, corner fixing brackets and rail extension will make retrofitting a Quartz™ smart shower simple
- Suits all approved UK domestic water systems

The easy to use push button controls – just step in when the LED display stops flashing

Add a remote control and you can start, stop or divert your shower from outside the shower area

 For full range, features and prices [See page 36](#)

No need to get splashed when you use a remote control.

Quartz™ smart dual outlet exposed with adjustable and ceiling fixed drencher heads and wireless remote with the addition of corner fixing brackets. See page 41

Quartz™ smart dual outlet

Smart shower with adjustable and drencher heads and bath fill

Switch instantly between drencher and adjustable head with smart control. Plus, exposed smart showers can be fitted with minimal disruption to existing décor. And with corner fixing brackets, there's more room for showering.

- One touch start/stop control with 'shower ready' display
- Illuminated controls show when the shower temperature has been reached
- 'Eco mode' reduces water usage by up to 33%
- Team adjustable shower head with 250mm drencher or bath fill for family flexibility
- Suits all approved UK domestic water systems

A wireless remote control can be placed on the wall for easy start/stop or divert between shower heads

The generous 250mm drencher head gives an indulgent deluge showering experience

Quartz™ smart exposed shower corner fixing brackets ensure the shower head and control are neatly tucked away

SMART PRECISION

You can be sure of safe and reliable temperatures every time you shower. Hot and cold water are blended with smart precision in the smart valve which is located up to 10 metres away from the showering area – in the loft, the airing cupboard or under the bath.

 For full range, features and prices [See page 36](#)

Quartz™ smart Shower

Smart shower with adjustable or drencher head

For an uncluttered look, choose a single outlet concealed or exposed Quartz™ smart shower. Start or stop the shower with the touch of a button and walk in when the display stops flashing. For extra 'oomph' press the boost button.

- Precise, temperature perfect, thermostatic showering
- Easy to use push button start/stop control
- Intuitive LED display shows when the chosen temperature has been reached
- Boost button for a powerful showering performance
- Treat yourself to the convenience of a remote control
- Set 'eco' mode on installation and reduce water usage by up to 33%
- A range of useful accessories such as retrofit wallplate, corner fixing brackets and extension rail make retrofitting a Quartz™ smart shower simple
- Suits all approved UK domestic water systems

Choose either a concealed or an exposed shower to suit your bathroom design and budget

For a fuss free bathroom refurb opt for a wireless remote control

The generous 105mm Harmony™ shower head features 4 spray patterns including an 'eco' setting which can produce up to 25% of water savings without compromising your showering experience

For full range, features and prices [See page 36](#)

A smart remote control can be fitted at any height and up to 10 metres from your shower.

Quartz™ smart concealed with adjustable head and remote control. See page 41

Quartz™ smart bath

Bath control with bath fill

■ No more fiddling with taps or trying to get the right blend of hot and cold. All it takes is one touch to start or stop the flow. Easy.

“Our smart BATH FILL is AMAZING, all I have to do is put in the plug, press the button and RELAX!”

Yvette Szarzynska, Bromley

Luxury at your fingertips. To take an indulgent bath, just put in the plug, press the button and Quartz™ smart bath will deliver beautifully blended, family safe water for a perfect bath. Added bonus? No taps for an uncluttered bathing area.

Unlike conventional bath taps, the controller can be placed in any convenient location and is ‘cool to touch’

- One touch, ‘cool to touch’ controls – no more fiddling with taps
- Intuitive illuminated controls show when the water is the right temperature
- Stylish and unobtrusive bath fill
- No cold baths – if hot water runs out the bath will just stop filling
- For a touch of added convenience, team your smart bath fill with a remote control

This stylish chrome finish filler also acts as an overflow

For full range, features and prices [See page 36](#)

Visage™ smart dual outlet

Smart shower with adjustable and drencher heads

Beautifully styled in sleek, polished chrome, Visage™ smart has flexible configurations, long rail and simple one touch controls making it the perfect choice for busy family bathrooms.

Simple one touch control with intuitive 'shower ready' LED

Push and hold to divert water instantly between the drencher and the adjustable shower head.

- Simple to use, one push to start or stop and, push and hold to divert between outlets
- LED display on the control shows that water has reached temperature
- Comes as both dual and single outlet showers
- Choose a remote control and you can start the shower from elsewhere in the bathroom

ECO-FRIENDLY

Great looking and family friendly, Visage™ smart has an 'eco' mode which will save water by 33%. For additional savings click the 'eco' setting on the Harmony™ shower head and make an additional 25% water saving without compromising performance.

For full range, features and prices [See page 36](#)

■ Controlling both the shower and bath.

Visage™ smart dual outlet

Smart shower with adjustable head and bath fill

Family bath and shower times are a dream with Visage™ smart dual outlet. Great for space saving, plus precision blended water makes for simple and family safe bathing and showering.

- Great looking shower with contemporary styling
- Easy to use controls – one touch to start or stop and push and hold to divert between outlets
- ‘Cool to touch’ controller

- Use the remote control so you can start showering or running the bath from elsewhere in the bathroom
- Suits all approved UK domestic water systems

Features the 90mm Harmony™ shower head, with 4 spray patterns including an ‘eco’ setting, for a greener shower

For full range, features and prices [See page 36](#)

Contemporary looking, slimline bath fill and no fiddly taps to adjust when running a bath, makes bath time a treat

You can be sure of safe and reliable temperatures every time you shower or bathe with Visage™ smart dual outlet

Visage™ smart Shower

Smart shower with adjustable or drencher head

Keep it simple with Visage™ smart shower – fast and fuss free to fit with minimalist looks and polished chrome finish, Visage™ smart will enhance any bathroom scheme.

Features the 90mm Harmony™ shower head, with 4 spray patterns including an 'eco' setting, for a greener shower

Opt for a remote control with Visage™ smart for a simply sensational showering experience.

Exposed showers are easy to install and avoid disrupting existing décor.

Choose a remote control and you can start or stop the shower before you step in – a cold splash of water when you start the shower will be a thing of the past

- One touch controls make Visage™ smart easy to use for all the family
- Flashing to steady LEDs show that water has reached temperature and it's time to step in
- Choose an exposed shower and upgrade your bathroom with minimal disruption
- Set 'eco' mode on installation and save up to 33 % water
- Comes with a 90mm Harmony™ shower head with 'eco' spray setting for additional 25 % water savings
- Alternative choices include a concealed adjustable or luxurious drencher head
- Suits all approved UK domestic water systems

 For full range, features and prices [See page 36](#)

TIMELESS STYLING is great, too.”*

Kay Wallington, Weston-super-Mare

Mixer Showers – what you need to know

Aqualisa's revolutionary thermostatic shower technology broke new ground when it was launched 40 years ago. Today, our mixer showers still deliver superb showering performance, reliable temperatures and unrivalled choice and style.

Why choose a thermostatic mixer?

Thermostatic mixer showers blend hot and cold water precisely to ensure you can shower in safety and comfort at the temperature you have chosen. Many include a factory set maximum temperature but all feature an automatic shut-off function for extra safety, should your hot or cold water supply unexpectedly fail.

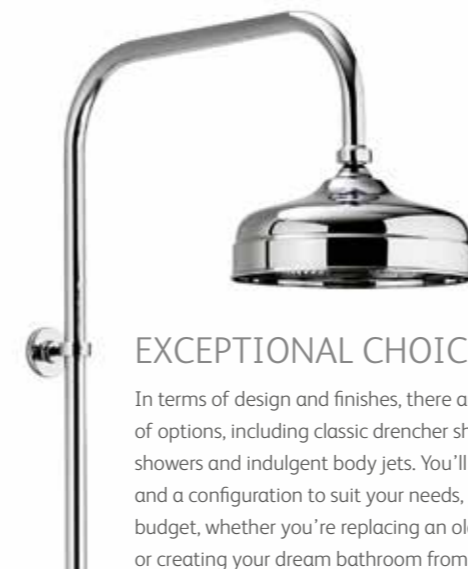

QUALITY IS OUR GUARANTEE

Our expertise in showering technology spans forty years, which means you're guaranteed style, performance, perfect temperature and peace of mind. A showering experience beyond compare.

Dream™ DCV dual outlet mixer shower with adjustable and drencher heads.
See page 75

EXCEPTIONAL CHOICE

In terms of design and finishes, there are a huge range of options, including classic drencher shower heads, hand showers and indulgent body jets. You'll always find a look and a configuration to suit your needs, your taste and your budget, whether you're replacing an old shower, upgrading or creating your dream bathroom from scratch.

MORE FLOW LESS LIMESCALE

Limescale is the enemy of many conventional showers. Over time it can build up and even cause mechanisms to seize. One of the benefits of our Thermo mixer showers is the inbuilt resistance to limescale in valves – whilst all our shower heads have rub clean nozzles.

ECO OPTIONS

More and more householders have environmental concerns. Many of our thermostatic mixer showers benefit from the clever 'eco' features we have developed over recent years. Find out more on pages 124-125.

Is it suitable for my bathroom?

Our thermostatic valves are suitable for the majority of UK domestic water systems – including high pressure, gravity and combi – but not all valves are suitable for all systems. Through the addition of a pump – most of them can be.

BAR MIXER SHOWERS

- Easy to install for replacements or upgrades
- Easy to use temperature and flow control
- Conserve water with flow regulators, 'eco' flow control and 'eco' setting on Harmony™ shower heads
- Divert options
- Easy clean nozzles reduce limescale

THERMO MIXERS

- Unique bi-metallic technology
- Sensitive to household water temperature fluctuations
- In-built limescale resistance
- Flexible options including bath shower mixers, concealed and exposed showers
- Powerful showering performance

BATHE OR SHOWER WITH EASE

Combining thermostatic showering and bathing is a breeze. With Aquamixa™ Thermo simply select the model that suits your water system and installation is as easy as replacing bath taps.

Aquamixa™ Thermo bath shower mixer with adjustable head.
See page 89

Dream™ DCV

Dual outlet mixer shower with adjustable and drencher shower heads

Sleek, versatile and delivering a sensational thermostatic showering experience. The beautifully designed Dream™ dual control valve's sleek single or dual outlet options ooze quality and style – so you can create the perfect showering or bathing experience to suit your household needs and lifestyle.

- Sleek, striking design
- Sensational performance
- Luxurious, concealed valve
- Temperature override button for extra safety
- Luxurious drencher and adjustable shower heads with easy clean nozzles to help reduce limescale build-up
- Single or dual outlet shower and bath fill systems
- Harmony™ head with a choice of 4 impressive spray patterns
- The 'Eco' spray setting saves up to 25% water without compromising performance
- Separate flow and temperature control
- Suits high pressure, combination boiler and boosted gravity water systems
- 5 year guarantee

Dream™ DCV mixer shower with adjustable head and bath fill. See page 74

BATHING BLISS

For households in a hurry or where space is at a premium, Dream™ DCV adjustable dual outlet shower teamed with a bath fill is a versatile, stylish option.

Dream™ concealed mixer shower with adjustable head. See page 76

Dream™

Mixer shower with fixed or adjustable head

A dream to look at, and a dream to use, a stunning range of thermostatic mixer showers packed with desirable features.

- Luxurious quality and design
- Aqualisa unique bi-metallic thermostatic technology for precise, reliable performance
- Temperature override button for extra safety
- Separate on/off and temperature control levers for greater control
- Metal controls with luxury chrome finish
- 'Eco' spray setting delivers up to 25% water saving without compromising performance
- Fixed and adjustable 4 spray 105mm Harmony™ shower heads with easy clean nozzles available to help reduce limescale build-up
- Suits all approved UK domestic water systems

Features include dual lever, all metal controls for style, durability and reliability

Fixed Harmony™ shower head with 4 spray patterns

YOUR SHOWERING DREAMS COME TRUE

A stunning, high-end range of thermostatic mixer showers with features such as dual lever, all metal controls and our renowned bi-metallic technology. Harmony™ shower heads deliver four spray patterns for sensational performance.

 For full range, features and prices [See page 72](#)

Aquastream™ Thermo

Mixer power shower with adjustable head

Designed specifically for gravity systems. The ergonomic all-in-one thermostatic power shower with its own integrated pump delivers exceptional performance.

Aquastream™ Thermo will upgrade your shower experience.

- Separate flow and temperature control
- Integrated booster pump for power shower performance
- Two flow settings to make the most of your plumbing system
- 90mm Harmony™ head with a choice of 4 impressive spray patterns
- 'Eco' spray setting delivers up to 25% water saving
- Easy clean nozzles help reduce limescale build-up
- For gravity systems only

Features include two flow settings to make the most of your plumbing system

TIME TO UPGRADE?

The clever, surface-mounted nature of the shower's pump means that Aquastream™ is ideal for shower replacements and upgrades. Read more about the advantages of retrofitting Aqualisa showers on page 126 or call 01959 560 010 and speak to one of our experts.

For full range, features and prices [See page 72](#)

Aspire™ DL

Mixer shower with fixed or adjustable head

Sophisticated, sleek and stylish, the Aspire™ dual lever shower combines timeless good looks with precise control over temperature and water flow. And it comes with a 5 year guarantee.

- Luxury brass valve with chrome finish
- Dual lever for effective flow and temperature control
- Generously proportioned 105mm Harmony™ shower head with 4 impressive spray patterns
- 'Eco' spray setting delivers up to 25% water saving
- Easy clean nozzles to help reduce limescale from shower heads
- Exposed and concealed systems are available
- Suits all approved domestic UK water systems

Two levers give greater control over temperature and water flow.

Aspire™ DL is designed for use with all approved UK domestic water systems. It is available in a concealed or exposed body style

Aspire™ DL exposed is the perfect choice for exposed shower refurbishments, upgrades and replacements – the adjustable elbows are easy to adjust, making it a favourite with installers

 For full range, features and prices [See page 72](#)

Aquatique™ Thermo

Mixer shower with adjustable or drencher heads

Classic styling meets sensational showering and the timeless luxury of solid brass valves and shower heads – Aquatique™ is a stunning addition to any bathroom.

Features a selection of luxurious adjustable shower and drencher heads

High quality, durable brass fittings for a traditional, sophisticated finish

- Timeless, classical styling
- Luxury brass shower valve
- Wide range of heads in chrome or gold finish
- Exposed and concealed systems available
- Aqualisa's unique bi-metallic thermostatic technology for precise, reliable performance
- Automatic cut-off, should hot or cold water fail, makes for safer showering
- Separate on/off and temperature control

A generous range of shower head options means you are sure to find a shower that suits your needs and style

To find your perfect configuration, choose from concealed or exposed valves in chrome or gold

PROVEN TECHNOLOGY

The Aquatique™ Thermo range combines traditional elegance with Aqualisa's thermostatic technology. Constantly refined and improved over the last 40 years, for an unsurpassed shower experience. A unique bi-metallic valve control instantly reacts to temperature fluctuations and water flow for a consistent performance. A shower that's as stylish as it is invigorating.

*“Electric showers
– INSTANT HOT WATER
– perfect.”*

Jan Snook, Otford

All our electric showers carry the European Water Label and are rated Energy Efficiency ‘A’

A

Electric Showers – what you need to know

Our electric showering has been as influential as our ground breaking smart showers and Thermacoil™ valves, with the award-winning and Which? best buy Quartz™ Electric range, and new Aqualisa Lumi™ and Sassi™ spearheading a new generation of luxury, modern looking electric showers.

Why choose electric?

Electric showers are safe, simple-to-use and straightforward to install. Crucially they take water from the mains cold water supply and instantly heat it, which means you don't have to use any precious stored hot water.

A CHOICE OF STYLES AND PRICES

Our wide range of electric showers, offer you the choice of different styles, finishes and prices to suit you and your budget. New Aqualisa Lumi™ and Sassi™ Electric ranges are the ultimate in luxury with ultra-modern finishes and featuring customisation options. Award-winning and Which? best buy Quartz™ Electric is perfect if you're after a simple, elegant look or choose from our zesty Vitalise™ collection for a more budget friendly option.

THE POWER RATINGS

8.5kW, 9.5kW and 10.5kW electric showers are available, as are a choice of finishes that range from glass with colourful mosaic and mirror to popular graphite, chrome and brilliant white.

HOT WATER WHENEVER YOU NEED IT

Electric showers are ideal in homes where hot water is in constant demand, or in particularly high demand at peak periods. For example, if you have a large family getting ready for school or work at the same time, the hot water from an immersion tank might not be able to cope. An electric shower could be installed in a second bathroom, or in all bathrooms, without affecting the supply of hot water.

DID YOU KNOW?

QUARTZ™ ELECTRIC PIONEERED SAFER AND MORE INTELLIGENT ELECTRIC SHOWERS

Our award winning Quartz™ Electric shower has helped to transform the face of electric showering for many people. One of its key features includes Over Temperature Protection technology that prevents users from selecting dangerously high temperatures.

Is it suitable for my bathroom?

The short answer is yes. It doesn't matter whether your water system is gravity, mains or combination boiler. Electric showers are highly recommended for homes which don't have a plentiful supply of hot water. The shower instantly heats cold water so it doesn't use the stored hot water you might need for other household purposes.

Aqualisa Lumi™ Electric

Electric shower with adjustable head

Make the ultimate style statement and illuminate your senses with Aqualisa Lumi™ Electric. Featuring a mirrored glass fascia and illuminated panel with adjustable brightness. Let reflection and light brighten your day.

THEN THERE WAS LIGHT

Aqualisa Lumi™ has redefined electric showers. A design statement of mirror and light that offers you a complete sensorial experience every day. Adjust the illuminated panel brightness to suit your mood, start and stop the shower with the sensory touch control and immerse yourself under the luxurious Harmony™ shower head.

- Luxury, mirrored glass fascia with illuminated panel
- Adjust the brightness to suit your mood
- Sensory touch start/stop control
- Aerospace grade brushed stainless steel temperature control
- Unique 'Over Temperature Protection' system for safe family showering
- Delayed shutdown flushes away residual hot water, reducing limescale build-up
- Harmony™ Electric head with 5 spray settings
- Anti-twist hose connection
- Easy clean nozzles reduce limescale build-up
- White/Chrome or Chrome trim options
- Performance ratings: 8.5kW, 9.5kW and 10.5kW (@240V)
- Suitable for mains cold water systems only

For full range, features and prices [See page 110](#)

Illuminated panel with adjustable brightness

“ENHANCE *your bathroom* with a SPLASH of reflection and LIGHT.”

Aaron Bourne, Senior Designer, Aqualisa

Aqualisa Sassi™ Electric

Electric shower with adjustable head

Make your colour statement with Aqualisa Sassi™ Electric. Featuring a luxury glass fascia and interchangeable tiles. Choose the perfect colour to suit you and your home.

- Luxury white glass fascia
- Choice of mosaic tile colours
- Sensory touch start/stop control
- Aerospace grade brushed stainless steel temperature control
- Unique 'Over Temperature Protection' system for safe family showering
- Delayed shutdown flushes away residual hot water, reducing limescale build-up
- Harmony™ Electric head with 5 spray settings
- Anti-twist hose connection
- Easy clean nozzles reduce limescale build-up
- Available in 8.5kW, 9.5kW and 10.5kW performance ratings (@240V)
- Suitable for mains cold water systems only

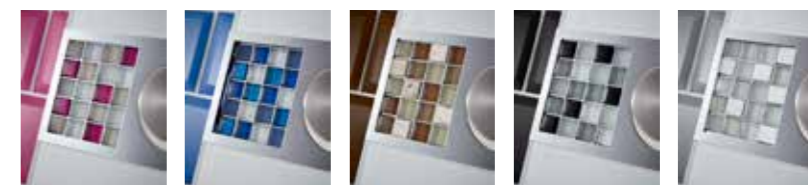

MORE THAN JUST LOOKS

Aqualisa Sassi™ not only looks amazing but will deliver you a great showering experience every time. The sophisticated sensory touch start/stop control activates your shower in a split second and you can easily select your perfect temperature with the brushed stainless steel control.

YOUR STYLE STATEMENT

Aqualisa Sassi™ is the ultimate bathroom accessory. With its sharp lines, contemporary finish and multiple colour options, what's not to love? Take your pick from five Sassi™ colours to enhance your bathroom.

Sassi™ Pink Sassi™ Blue Sassi™ Stone Sassi™ Black Sassi™ White

YOUR COLOUR. YOUR CHOICE.

Make a bold statement with 'Sassi™ Pink' or go subtle with 'Sassi™ Stone', there's a colour to suit all styles and tastes. The hand cut glass mosaic tiles are so easy to change. Simply remove the chrome panel and swap them over for an instant makeover.

Vitalise™ Electric SLX with adjustable head. See page 118

Vitalise™ SLX

Electric shower with adjustable head

Sophisticated, multifunction showering at its best, with everything you need to know visible on a smart display.

Features multifunction shower head with 3 defined shower sprays and rub clean nozzles to reduce limescale.

- Simple, push button controls
- Multifunction LCD display shows temperature, power on, heat setting and duration
- No demand on stored hot water
- 3 spray patterns
- Intelligent phased shutdown flushes out residual hot water
- 3 performance ratings 8.5kW, 9.5kW and 10.5kW (@240V)
- Stylish white and chrome finish
- Suitable for mains cold water systems only

See what you need to know on the LCD display with easy to use push button controls

Intelligent and stylish, Vitalise™ SLX also comes with a European Water Label, so you can have a great shower and be 'eco-friendly' too

REVITALISE EVERY MORNING

Vitalise™ SLX tells you all you need to know; the temperature, the time you spend in the shower and the heat setting selected. It only heats and uses the hot water required, making it cost-efficient too.

 For full range, features and prices [See page 110](#)

Vitalise™ SL

Electric shower with adjustable head

Stylish, smart and a very easy-to-use shower with illuminated push button controls, a choice of four heat settings and a smart white and chrome finish.

- Attractive illuminated push button controls
- Places no demand on stored hot water
- 'Power-on' LED shows when shower is ready to use
- 4 heat settings
- Helpful height adjustable shower head
- Performance ratings: 8.5kW, 9.5kW and 10.5kW (@240V)
- Straightforward to install
- Intelligent phased shutdown flushes residual hot water out of shower after use
- BEAB and European Water Label approved
- Suitable for mains cold water systems only

SAFER SHOWERING

The Vitalise™ SL is a joy to use with its simple, illuminated push button heat settings. The 'Power on' LED light lets you know when your shower is ready to use. It's also packed with features to keep you showering safely, including an intelligent, phased shutdown function, which flushes away left over hot water.

For full range, features and prices [See page 110](#)

Vitalise™ S

Electric shower with adjustable head

Life made easy, showering made simple. If you want to just step in and out of your shower – Vitalise™ S does a brilliant job. Aqualisa style and engineering at a fantastic price.

- Very easy to use with simple controls
- 3 invigorating spray patterns
- 'Power on' LED display indicates when ready to use
- Places no demand on stored hot water
- Easy clean nozzles reduce limescale build-up
- Height adjustable shower head
- Choice of 2 finishes
- Available in 8.5kW and 9.5kW performance ratings (@240V)
- BEAB and European Water Label approved
- Suitable for mains cold water systems only

Features multifunction shower head with 3 defined shower sprays and rub clean nozzles to reduce limescale

 For full range, features and prices [See page 110](#)

Simple push button heat settings and 'power on' LED light ensure a safe and comfortable shower experience every time

REFRESHINGLY SIMPLE

Simple, safe and easy to use – Vitalise™ S is the perfect family shower. Priced to please, it is straightforward to install and delivers hot water instantly at the touch of a button. It has great eco credentials too and is European Water Label approved. You can choose from two refreshing finishes – white/chrome or white with white/chrome – and two performance ratings – 8.5kW or 9.5kW.

“FANTASTIC PRODUCTS, *friendly,*
professional service and SUPPORT
– THANK YOU *Aqualisa!*”

Chris Flaherty, Installer, Sittingbourne

Pioneering smart technology

Just as Aqualisa broke new barriers with the first bi-metallic thermostatic valve, our smart technology has revolutionised the bathroom. We launched the very first smart shower in 2001. Easy to use and install, it was quickly embraced by installers and homeowners.

The simple functionality is a breeze to use and the compact smart valve that is at the heart of every shower, makes for much greater flexibility in fitting.

WHAT ARE THE ADVANTAGES OF SMART SHOWERS?

For the user, one touch control means you don't have to fiddle with temperature or flow controls when your hands are wet and soapy. Intuitive LED lighting lets you know when the water has reached your perfect temperature and it's time to step in; no more guesswork required.

Adding a remote control is both luxurious and practical and if you have a dual outlet shower you can also use the remote to select the outlet you would like to use first.

For the installer the main advantage is being able to site the smart valve away from the showering area. There is no bulky valve to build into a wall so it can be a very speedy, fuss-free fit.

THE SMART VALVE

This ingenious kit is the beating heart of your shower. Usually sited away from the bathing area – in a loft or airing cupboard – it blends hot and cold water with thermostatic precision before directing it to your shower or bath.

All our processors have an optional 'eco' mode, activated during installation, to help you save water. A slim data cable connects the processor to the control.

If you've chosen a dual outlet shower, it will come complete with a diverter box. This is fitted in line with the shower's processor and ensures water is sent to your preferred outlet.

IS IT COMPATIBLE?

Almost certainly, yes. smart showers work perfectly with high pressure, combi and gravity water systems. For the latter, you will need to specify a shower with a pumped smart valve. This has been designed specifically with a gravity water system in mind and, thanks to the processor's integral pump, will give your shower a helping hand.

PERFECT SHOWERING GUARANTEED

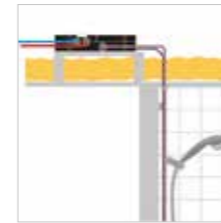

All Aqualisa smart showers are built with the highest specifications and come with a 5-year guarantee.

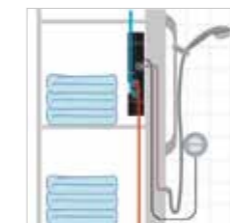

Our shower ranges will provide you with years and years of trouble free service, are virtually maintenance free and the Harmony™ shower heads are easy to clean which helps to reduce limescale build-up.

Our after sales service is second to none and we'll be happy to help with any queries you may have at any stage of your purchase.

LOCATE THE SMART VALVE...

In the loft

In the airing cupboard

Under the bath

For more information on smart showering and bathing visit www.aqualisa.co.uk

BEAUTIFULLY SIMPLE CONTROLS

Thanks to a simple push button action our smart controls couldn't be easier to use. Press the button and the LED display will flash, indicating water is warming up. When the display stops flashing it's time to step in. Depending on the model, the control might also feature a 'boost' button or a button that allows you to divert water to a different shower head or bath fill.

For more information on smart showers go to pages 16 -17

..... ecological features

Every drop counts

Builders, developers and consumers are increasingly aware of their ecological responsibilities. As a shower manufacturer the need to save water, save energy consumption and reduce your bills is always top of mind.

It's estimated that an average family can get through around 600 litres of water a day*. A lot of that takes place in the bathroom.

Thankfully, advances in technology mean we can all save water and still stay clean. Aqualisa's designers have gone to great lengths to ensure we offer eco-solutions across smart, mixer and electric showering ranges with innovative ways to help you save water without compromising your showering experience. If we all do a little, a lot can be achieved.

*Based on figures from WaterWise (www.waterwise.org.uk)

VITAL SAVINGS

All our electric showers carry the **European Water Label** and are rated Energy Efficiency 'A'

ECO SMART

Our smart showers have a number of unique eco features, to help you do your bit for the environment.

The smart valves in our Quartz™ and Visage™ smart showers can be set to 'eco' mode capable of reducing water flow by up to 33%, or as little as 8 litres per minute.

Our new Q™ smart shower features a clever proximity sensor, meaning that water is automatically reduced to minimum flow when you move away to shampoo or condition your hair or shave your legs, and then returns to your original setting as you move closer.

DID YOU KNOW?

THE AVERAGE BATH
USES UP TO
**100 LITRES
OF WATER**

That's in comparison to a quick shower, which uses around 30 litres of water. So if you want to be greener in the bathroom, it makes sense to shower. Activating Aqualisa's smart shower 'eco features' will help too – as will using the 'eco' spray on our Harmony™ shower heads, the eco-stop button on our bar valves or using appropriate flow regulators.

..... ecological features

Control the flow

Our Midas™ showers are also available with a choice of regulators that limit water flow to as little as 6 litres per minute. They save water, reduce running costs and meet existing building regulations.

In Harmony with nature

Ideally, we all want a powerful shower that doesn't use too much water. Shower head design is crucial in terms of both ergonomics and ecological efficiency.

Some water-saving shower heads aerate the flow of water to deliver the 'illusion' of bubbles, but we weren't prepared to compromise the way your shower looks or feels. Our Harmony™ heads use intelligent design to deliver a fuller spray whilst allowing you to make water savings of up to 25%.

When the 'eco' spray on a Harmony™ shower head is selected, the shower head concentrates and angles the spray from its two outer rings. The result is a spray pattern that is refreshing and generous yet incredibly efficient in terms of water consumption.

Harmony™ shower heads are available on Quartz™ and Visage™ smart, Midas™ 100 and 110, Aspire™ DL, Siren™ SL, Colt™, Aquastream™ Thermo and Dream™.

'Eco' spray pattern

Outer spray pattern

Refurbishing and refitting your bathroom?

Refurbishing an old bathroom from scratch can be a big job, so if time and budget are limited, or you simply want to smarten up your shower, why not opt for a refit? When it comes to refurbishments, Aqualisa has long been regarded as a go-to brand by those in the know. And with good reason, because no matter the system or showering technology, there's a very good chance we'll be able to help you find the perfect solution.

GO SMART, MINIMISE DISRUPTION

An exposed smart shower can be up and running in as little as a few hours. A brilliant solution for any new bathroom, but it's especially good for over baths or bathrooms where there hasn't previously been a shower.

Because the control is mounted on the shower rail which doubles up as the blended water pipe – all that needs to be done is to feed the pipework through a small hole in the ceiling, connect it to the smart valve and fix the shower to the wall – no damage to existing tiles or décor. It really is that simple.

QUARTZ™ SMART RETROFIT WALL PLATE

Replacing an old built-in-shower with a smart model is exciting. However, if you find some damage when you remove your old shower, you can easily conceal this with a Quartz™ smart retrofit wall plate. It's perfect for disguising the cavity left by the old valve and creates a really streamlined appearance.

DID YOU KNOW?

A SMART SHOWER CAN SOLVE NEGATIVE HEAD

If you need to fix a shower head above the water tank base, choose a smart shower with a pumped smart valve.

Upgrade a bar valve to Midas™ shower column

Changing your bar valve? Why not upgrade to a new, multitasking bar valve that offers the versatility of two shower

heads? They're ideal for busy family bathrooms and, thanks to the clever retrofit features of bar valve mixers such as Midas™ 110 and 220, installing them is a lot easier than you might think.

Single outlet bar valve

REPLACE AN EXPOSED SHOWER WITH AN ASPIRE™ DL OR SIREN™ SL

Replacing an older, exposed shower doesn't need to be difficult when you can use one of Aqualisa's new generation mixer showers. The exposed models of both our Aspire™ DL and Siren™ SL shower ranges feature adjustable inlet centres, ideal for refurbishment projects where a degree of flexibility is required.

EASIER ELECTRIC SHOWERING

If you need to upgrade an electric shower look no further than Quartz™ Electric. The shower has been designed with refits in mind and has an extra roomy 'footprint' to hide all traces of the previous shower. Your installer will also love it as the Quartz™ Electric features two positions for earth connection and will also allow you to use the previous shower's compression elbow, handy for simplifying the replacement procedure.

You have our full support

We pride ourselves on fast, friendly and efficient customer service. So, whether it's a quick question about your new shower, a technical query or if you would like to arrange a visit from one of our nationwide service engineers, simply pick up the phone, email us or visit our website for a live chat. We'll be happy to help, regardless of the age of your shower.

AQUALISA FREE GUARANTEE

Tyler, deep sea diver, shower lover

We pride ourselves on quality workmanship, engineering innovation and excellent Customer Service. Our products are covered with a manufacturer's free 1 year guarantee which can be extended up to 5 years and unlike many other manufacturers, Aqualisa's guarantee covers all parts and labour costs associated with any fault.

When you register your shower, you can easily increase your FREE guarantee to 2, 3 or even 5 years dependent on the product. Registering your shower ensures you are covered, giving you access to our dedicated UK Customer Care team and specialist engineers.

INCREASE YOUR FREE GUARANTEE UP TO 5 YEARS

RAPID RESPONSE

Your shower is just as important to us as it is to you. Our UK Customer Care team, based in Westerham, Kent, are a friendly team of shower experts on hand to answer your queries. Our commitment to rapid response means they will assist you quickly and professionally when you need any help.

For more information, terms and conditions, visit www.aqualisa.co.uk/customer-care/warranty

Aqualisa products are covered by a 1-year guarantee period. Please see the information below regarding the guarantee periods available once you register your product.
