## Showers made with you in mind

---

At Aqualisa we believe a great day should start with a great shower and we are constantly refining our shower technologies so that every day you can do just that. We pride ourselves on the highest quality engineering and design for our products, creating beautiful exceptional performance. We are obsessed with showers.

We have been at the forefront of showering technology for 40 years. In 2001, Aqualisa invented the first digital shower, a brand new type of mixer shower offering precise control, consistent temperatures and a range of user friendly features and benefits to make your showering experience more enjoyable. Now in 2017, we have renamed our 'digital' showers 'smart mixers' to reflect more accurately the ease of use, unique functionality and intelligence of this pioneering technology.

## Rise™ Smart

Rise™ smart is all about you. With beautifully simple aesthetics, advanced smart technology and the opportunity to create the exact configuration to suit – Rise™ will elevate your showering experience to a new level.

Intuitive functionality is integral to Rise™ smart. A single touch will have your shower warming up, whilst the sophisticated LED display will let you know when it's time to step in. Whether it's starting your shower remotely, pausing (and saving water) whilst you shampoo or shave, setting a timer for a specific shower duration or if you need a few moments before you step into the shower. Rise™ smart can simply pause the flow, whilst maintaining your perfect temperature for up to 5 minutes – it's all at your fingertips.

There's also the option of a Rise™ smart shower with our clever smart dual outlet technology. Enabling you to switch instantly between shower heads or between a shower head and a bath fill, it's the ultimate family-friendly, busy-bathroom solution.

# Rise™ Smart Shower

Rise™ is for everyone and every bathroom. Whether it's a simple replacement shower or a complete bathroom refurbishment there is a Rise™ smart to suit. The Rise™ smart range of single outlet showers makes choosing simple, just decide whether you want an adjustable shower (with a range of spray patterns from invigorating massage mode to something more relaxing) or a luxurious drencher (for an all over deluge experience) – there's an option to suit every taste.

## Fabulous functionality

Rise™ smart is packed full of thoughtful features and functions. The intuitive LED lighting shows you when the shower is ready to step into, so you don't have to keep testing to ensure your shower has reached the perfect temperature. Every shower comes with a remote control – so you never have to experience that early morning cold shock when reaching into the shower to start it. And the latest innovations such as Warm up, Pause and Timer mean you can save water while enjoying a sensational showering experience.

Rise™ smart wireless remote

## Minimal disruption

All Rise™ smart showers are simple to install as, unlike typical mixer showers, the water is blended away from the bathing area so there is no need to excavate the bathroom wall to embed the valve. But for speed and even less disruption – choose a Rise™ smart shower with an exposed control. Because the control is mounted onto the shower's riser rail and the blended water is fed through the ceiling to the shower head – it can be up and running in no time.

Rise™ adjustable head

## Rise™ adjustable shower heads

Rise™ smart showers with adjustable shower heads offer a range of spray patterns, so whether it's an invigorating massage or something more relaxing, you can shower just as your mood dictates.

One touch, one great shower. Rise™ smart shower offers sensational showering to you and your family. Luxurious, yet practical you can have a wet room shower experience regardless of the size of your bathroom space.

See pages 24-25 for details of the full Rise™ smart shower range

Switch on remotely with Rise™, choosing between the drencher head and height adjustable shower head.

You can programme this version to increase the flow rate from the bath outlet so you can fill your bath more quickly.

## Rise™ Smart Dual Outlet

Stylish, yet practical, clever and convenient – Rise™ smart dual outlet is the ideal choice if you want to create a ‘home spa’, a family bathroom or install a shower over a bath.

So, whether it’s a sixty second shower before the morning rush hour, a long hot shower or an indulgent soak at the end of the day – the versatility of Rise™ smart dual outlet allows you to shower how you like – just switch instantly between outlets at the touch of a button.

You can make bathroom life even better by using your Rise™ smart’s timer and pause features. Setting the length of your shower will enable you to keep an eye on water usage, children – or both. And with Rise™ smart’s intelligent pause function, you can be sure of always using water efficiently. The shower will hold your perfect temperature – meaning you can shampoo, lather or shave – without needing your shower to restore water temperature.

Additional thoughtful features include ‘cool to touch’ controls which are great for busy family bathrooms, you can programme your preferred outlet to start first every time and should your hot or cold water fail, there is an automatic cut out.

### Design your perfect shower

Rise™ smart dual outlet modular format means you can design the shower to suit your household’s needs. Choose from a combination of an adjustable shower head or bath fill and a range of stunning drenchers and hand showers to design your own bespoke bathroom oasis.

See pages 26-29 for details of the full Rise™ smart dual outlet range

Perfectly blended bath water is delivered via a sleek and stylish overflow filler – to your chosen depth and temperature every time. And, for the final indulgence, you can top up your tub for a longer, more luxurious soak.

Belying its understated styling, a Rise™ smart bath fill delivers perfect, thermostatically blended water through a contemporary overflow filler – making bulky taps a thing of the past. Simply press the button or use your Rise™ smart remote control – and your bath will be up and running.

Alternatively, choose a Rise™ smart bath with smart dual outlet technology – and combine a bath fill with a simple, yet practical hand shower.

Rise™ smart bath control

## Rise™ Smart Bath

Washing the kids' hair, swishing down the last of the soap suds or even an impromptu shampoo for the family pet... busy lives mean that bathrooms need to deliver flexibility. And when it comes to bath fills, a Rise™ smart dual outlet will do it all.

### Rise™ smart bath

Rise™ smart bath allows you to programme your bath's depth so that you have the same, perfectly filled tub every time. And if your hot water runs out, Rise™ smart bath will simply stop. For longer soaks, a 'top up' button will restore your bath's temperature.

Meanwhile, you can be assured that even at steamy temperatures your Rise™ smart bath's control will stay cool-to-the-touch. Essential for everyone, but especially for children and less able users.

### Rise™ smart bath with diverter

A Rise™ smart bath fill combined with a simple hand shower will take care of every bathing scenario. One touch will have your bath running in seconds, whilst pressing the control's other button will let you divert water to the hand shower. Rinsing hair, children or just the suds couldn't be easier. Temperatures will remain reassuringly safe and constant throughout.

The addition of a stylish, slim hand shower to your Rise™ smart bath fill allows vital versatility. Switch between the bath fill and hand shower at the touch of a button. Retain thermostatically controlled temperatures whether you're bathing or showering and simply park the hand shower in its convenient holder when it's not required.

A bath fill that knows the depth you want to bathe, cool-to-the-touch controls and no need for taps? That's Rise™ smart – a dream to use.

See pages 25 for details of the full Rise™ smart bath range

# Rise™ Smart fits into your life. Simply.

Pioneered by Aqualisa, smart showering and bathing technology is one of the biggest bathroom innovations of recent times. A smart shower or bath fill is controlled by a compact smart valve that blends hot and cold flows of water with absolute precision. Around the size of a shoebox, the smart valve can be sited up to 10 metres away from the showering or bathing area. For example in the loft, an airing cupboard or under the bath. This frees up space in your bathroom and, for showers with an exposed control, can often make for a much easier installation that minimises disruption and downtime.

Rise™ Smart dual outlet bath fill with hand shower. See page 25 for details.

## Suits any home

Aqualisa's award-winning smart valves are compatible with gravity-fed and high pressure plumbing systems. Showers using a gravity-fed smart valve are given a helping hand with a fully integrated, quiet pump.

## Simple installation

The Rise™ smart shower or bath control communicates with its smart valve via a simple data cable. All that is required to deliver thermostatic, precision blended water to each shower head or bath fill is a single pipe. And, as the diverter is also smart, there is no need for complicated or additional plumbing work.

## Go 'eco'

The 'eco' mode on the shower's smart valve can be programmed to ensure a water efficient performance – and can help you to make water savings of up to 33% – depending on individual circumstances. What could be greener? Well, don't forget Rise™ smart shower's optional features. Its warm-up mode, pause function and timer, all of which can be activated together or separately, will help you to be even more water-aware.

## Guarantees

All Rise™ Smart showers and bath fills come with a 5 year guarantee that covers systems and components. Complete peace of mind.

# Rise™ Smart features...

Rise™ Smart is bursting with practical and thoughtful features and functionality. Designed with you and your showering and bathing needs in mind, you can design your perfect combination whether a simple shower or bath only configuration or a mixture of bath and shower, drencher and hand shower... whatever suits. But fundamental to every Rise™ Smart is simplicity, versatility and ease of use plus a range of thoughtful features and functions including:

## STANDARD FEATURES

### Cool to touch controls

As the control is not linked to the water feed, it will stay cool and safe to touch.

### Eco

If you want to limit water usage the smart valve can be set to 'eco' mode on installation. This will save up to 33% water with every shower taken – depending on your water system.

### Shower packs

Our special 'shower packs' have been designed to make choosing a smart dual outlet shower easy – we have picked 5 popular configurations – you just have to pick the one that suits your home water system.

### 5 year guarantee

Reflecting our confidence in the quality of the Rise™ smart range, all Rise™ smart systems and accessories are covered by our generous 5 year parts and labour guarantee.

## CHOOSE TO ACTIVATE...

### Warm up\*

You can save water with every shower. Once Rise™ reaches your chosen temperature the flow will stop and when you are ready to start showering just press the remote button or the shower control and step into your perfect shower. Rise™ will hold the correct temperature for up to 5 minutes.

### Pause\*

Just press pause to save water while shampooing or shaving – Rise™ Smart will hold the perfect temperature for up to 2 minutes.

### Timer

Great if you want to manage your water usage or for families with teens that just want to stay under the shower. Decide how long you want each shower to last and hey presto. The shower will stop as programmed.

\*Note: Due to the characteristics of combination boilers it is not recommended to activate these options.

## Rise™ DCV

Contemporary, elegant and sophisticated, Rise™ DCV is a fully modular thermostatic dual control mixer shower range from Aqualisa. With the choice of three stunning all metal valves Rise™ DCV offers you the versatility and range to create the perfect combination to suit your lifestyle and taste. So whether your new bathroom requires a single or dual outlet, your Rise™ DCV can be completed with the luxurious, fully interchangeable range of Rise™ accessories.

Choose from a generous array of metal or lightweight chrome drencher heads, hand showers, an adjustable shower kit or a sleek bath fill.

Underpinning this stunning range is the absolute given that Rise™ DCV will deliver a superb showering experience, the highest quality materials and thoughtful features. So, from its smooth chrome hose, stunning metal controls and drenchers to easy-click spray plate controls, Rise™ DCV offers the ultimate in showering luxury, flexibility and choice.

# Rise™ DCV

The clean, simple lines of Rise™ DCV are sophisticated and timeless and the perfect solution if you are looking for a stylish, contemporary look that fits in both modern and classic settings. Whether you choose a single, divert or 3 way solution – teamed with your choice of fittings from the Rise™ accessory range – your Rise™ DCV bathroom will ooze elegance and luxury.

Rise™ DCV is ideal also if smart showers are not for you, or you want a different look in another bathroom – you know you will get the best that Aqualisa has to offer.

## Modular showering

Whether you want a Rise™ DCV in an enclosure or over a bath you can tailor its look to suit. A flexible adjustable shower system or wall or ceiling mounted drencher will fit the bill. The metal control comes with flow control and temperature control with a temperature override button for family safety.

## Divert showering

Diversity and flexibility is the name of the game with a Rise™ DCV divert system. You can mix and match the accessories and fittings to suit a myriad of choices. So whether you want an adjustable and drencher head, a drencher and hand shower or a 3 way over bath combination – the choice is entirely yours.

Dual control mixer with adjustable shower head.  
See pages 30-32 for details.

See pages 30, 31 and 32 for details of the full Rise™ DCV range

Rise™ DCV 3 way mixer with ceiling mounted drencher, hand shower accessory pack with integral wall outlet holder and bath fill.  
See pages 30-32 for details.

# Rise™ Smart controls

Rise™ smart has been designed to deliver an intuitive, intelligent showering experience. Its thoughtful water saving features can be activated as required to suit you and your family's needs. The LED lighting comes as standard and the clever display will show you when it's time to step in – whilst the remote control allows you to start the shower without reaching into the enclosure.

## Rise™ smart shower control

It's so easy. One push of the button and you're showering.

## Rise™ smart dual outlet control

Suitable for both shower and bath systems. Press the upper button to select the primary outlet and the lower button for the secondary outlet.

## Rise™ smart bath control

Press the Start/Stop button to get your bath running. Give your bath water a 'Top-up' by pressing the lower button.

## Rise™ smart remote control

Switch on the shower or bath fill remotely from up to 10 metres away. If you have a divert configuration push and hold to divert.

## Rise™ smart wireless remote

The wireless remote features LED lights to show the shower is switched on. Fit with or without the wall plate, and there are no wires or cables.

## Water saving features

On the control you can programme some great water saving features:

**Warm up\*** – so you don't have to waste water if you are not ready to step in when your shower reaches temperature.

**Pause\*** – for up to 2 minutes when shampooing or shaving.

**Timer** – decide exactly how long you want the shower to run.

**Note:** check the user guide for details on how to programme these features.

\* Due to the performance characteristics of combination boilers it is not recommended to activate these options.

# Rise™ DCV controls

Three stunning shower controls with luxurious brass wall plate and control knobs, offering single, divert and 3 way showering options allowing you to design the combination to suit your family's lifestyle and needs. But the versatility of Rise™ DCV does not stop there. Each shower control comes with a pair of 25mm metal levers which can be fitted as required to suit the bathroom scheme. (See pictures below).

## Rise™ DCV single outlet control

**Top** – flow control.  
**Bottom** – temperature control with temperature override button.

Shown with 25mm brass levers.

Shown without 25mm brass levers.

## Rise™ DCV divert control

**Top** – combined divert and flow control.  
**Bottom** – temperature control with temperature override button.

## Rise™ DCV 3 way control

**Top** – combined divert and flow control.  
**Middle** – temperature control with temperature override button.  
**Bottom** – flow control.

# Rise™ shower heads

With Rise™, you can shower any way you want. There's a choice of adjustable shower head, hand showers and a selection of luxurious metal 200mm, 300mm and lightweight 200mm and 250mm drencher shower heads. All options come with rub-clean nozzles – ensuring limescale build-up is kept to a minimum.

## Adjustable head

Click your way through five different spray patterns that span sensual and soothing to rejuvenating and massaging.

### Spray patterns

## Hand shower

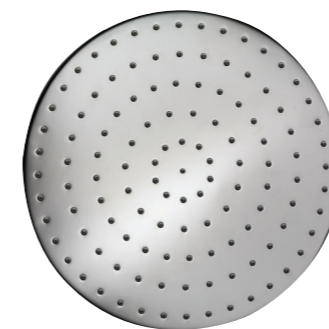

A stylish and practical addition to the Rise™ range. Slim, unobtrusive and surprisingly effective as a shower, a hand shower is a must-have for hair washing and bath rinsing alike.

## Drencher heads

Release a cloudburst of warm, wonderfully relaxing water with a 200mm, 250mm or 300mm drencher head. Choose from a metal or lightweight, wall or ceiling mounted design and enjoy every drop of indulgence.

# Rise™ Smart installations

The schematics of popular smart configurations below show the smart valve and diverter, which blend and dispense the water, located in an airing cupboard, in the loft or even under the bath should space allow. Also shown are the data cables which connect the control and remote control to the smart valve box, communicating messages such as; Start/Stop, divert, depth and temperature.

**Adjustable shower**

Locate the remote control outside the enclosure – press the button and wait for the illuminated controls to stop flashing, and the shower will be ready by the time you’ve brushed your teeth.

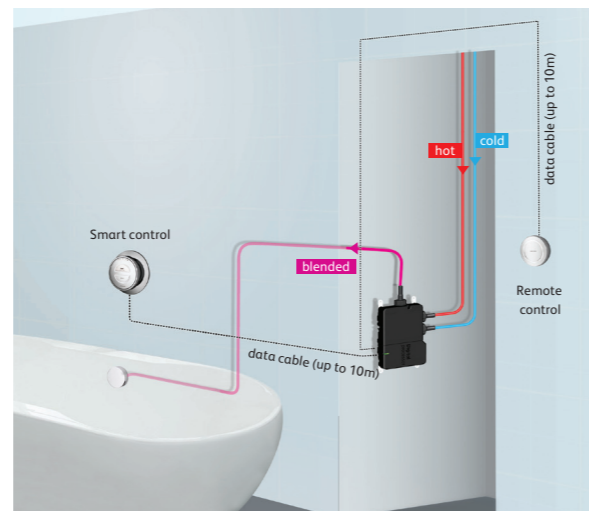

**Adjustable shower with wall mounted drencher**

Dispenses perfectly blended water to either outlet as required – you can programme your favourite one to start first every time.

**Exposed shower with bath overflow filler**

For a simple installation, choose an exposed system which delivers water to the shower head through the ceiling and can be installed with minimal disruption to the bathroom – combine with a bath fill for the perfect configuration.

**Bath overflow filler**

Press the Start/Stop button, select your temperature, put in the plug and the bath will know when to stop filling. Why not ‘Top-up’ for a luxurious long soak.

# Rise™ DCV installations

Rise™ DCV is a typical dual control valve. The hot and cold water are delivered to the valve which is buried in the wall behind the wall plate and controls, where it is thermostatically blended. The blended water is then dispensed as desired by the manually operated controls on the valve.

**Single outlet with adjustable head**

Blended hot and cold water is delivered to the shower head from the valve. Separate temperature and flow controls can be manually adjusted to suit.

**Divert outlet with adjustable and wall mounted drencher heads**

Turn the dual control to select the outlet you want the blended water to flow from and turn the separate temperature control to choose the right water temperature.

**3 way outlet with hand shower, wall mounted drencher head and bath fill**

The water is blended in the valve behind the controls. The middle knob controls the temperature. Select the desired outlet and flow using the top or bottom control knobs.

**Rise™ DCV suits High Pressure water systems.**

If you have a gravity system you should team with a booster pump.

# Rise™ Smart

All Rise™ smart shower systems come complete with a remote control (exposed systems come with a wireless remote). Remote controls can also be bought separately.

# Design your Rise™ dual outlet shower

If you want to design your own bespoke Rise™ smart dual outlet shower system, you just need to follow the two steps below. First decide which main shower you want, shown in **Step 1**. Then team it with your choice of drencher head, adjustable shower head or bath fill and any of the other useful accessories shown in **Step 2**.

## Step 1. Choose a Rise™ smart dual outlet shower system.

 <p>Length of hose: 1500mm 940mm 120mm 70mm</p>	 <p>550mm 300mm 70mm 120mm</p>	 <p>560mm 300mm 70mm 120mm</p> <p>Ceiling arm can be cut to suit site conditions.</p>	 <p>Length of hose: 1500mm 1020mm 70mm</p>
<p><b>Rise™ smart concealed with adjustable head and remote control</b></p> <p>HP/Combi RSD.A1.BV.DV.14 + £874.17 <b>£1049.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.BV.DV.14 + £961.67 <b>£1,154.00 inc VAT</b></p>	<p><b>300mm metal drencher</b></p> <p>HP/Combi RSD.A1.BFW300.DV.14 + £957.50 <b>£1,149.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.BFW300.DV.14 + £1,049.17 <b>£1,259.00 inc VAT</b></p> <p><b>200mm metal drencher</b></p> <p>HP/Combi RSD.A1.BFW200.DV.14 + £874.17 <b>£1,049.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.BFW200.DV.14 + £965.83 <b>£1,159.00 inc VAT</b></p>	<p><b>300mm metal drencher</b></p> <p>HP/Combi RSD.A1.BFC300.DV.14 + £957.50 <b>£1,149.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.BFC300.DV.14 + £1,049.17 <b>£1,259.00 inc VAT</b></p> <p><b>200mm metal drencher</b></p> <p>HP/Combi RSD.A1.BFC200.DV.14 + £874.17 <b>£1,049.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.BFC200.DV.14 + £961.67 <b>£1,154.00 inc VAT</b></p>	<p><b>Rise™ smart exposed with adjustable head and wireless remote</b></p> <p>HP/Combi RSD.A1.EV.DV.14 + £928.33 <b>£1,114.00 inc VAT</b></p> <p>Gravity Pumped RSD.A2.EV.DV.14 + £1,020.00 <b>£1,224.00 inc VAT</b></p>

## Step 2. Complete your perfect shower with your choice of luxury shower heads, bath fill and accessories.

 <p>550mm 300mm</p> <p>Ceiling arm can be cut to suit site conditions.</p>	 <p>500mm 200mm</p> <p>Ceiling arm can be cut to suit site conditions.</p>	 <p>525mm 250mm</p> <p>Ceiling arm can be cut to suit site conditions.</p>	 <p>500mm 200mm</p> <p>Ceiling arm can be cut to suit site conditions.</p>

# Rise™ DCV systems

Modular, versatile, bespoke – that's Rise™ DCV. Design your own individual combination by choosing the valve you like (shown on page 32) and then choosing the drencher, adjustable shower head, hand shower or bath fill to suit. It couldn't be easier.
