WELCOME IDEAL STANDARD 2017 BATHROOM COLLECTION

At Ideal Standard, we believe that a bathroom should be a living space, giving you more than just somewhere to brush your teeth. For the past 100 years, we've been creating products that transform a purely functional space into the ideal bathroom – a place to relax, make yourself beautiful, refresh and re-energise.

WHY CHOOSE IDEAL STANDARD?

AWARD-WINNING DESIGN

Design is at the heart of everything we do. We know that creating your bathroom is as much an aesthetically driven exercise as it is a practical one. As Europe's leading contemporary bathroom brand, we are able to attract the talents of some of the world's best designers in the field. This means our products are at the foremost edge of design thinking, for both functionality and style. Our current ranges feature signature pieces by our award-winning design partners – Robin Levien, Seymourpowell and Artefakt.

Ideal Standard has been commissioning renowned designers such as Robin Levien, Royal Designer for Industry and Franco Bertoli for many years.

BRILLIANT PERFORMANCE

Our products are high-performance tools. We know that you expect consistent efficiency and impressive capability. We work hard to develop products that give you ever-greater power, safety, ease of use and economy. Over the years, we've come up with all kinds of innovations to meet our customers' changing needs, such as blue technology shown below and on page 175. In fact, several of the great engineering advances in bathroom technology began life on one of our drawing boards.

Water is never in contact with the brass body, as it passes through waterways made of special plastics.

Special hoses from specific nickel- and lead-free materials.

MANUFACTURING EXCELLENCE

Manufacturing excellence is our cornerstone. We know that you need robust, high-quality products that can withstand the day-to-day rigours of home life. Because of this, we keep our manufacturing operations within Europe and the Middle East, we use only the highest quality materials and we subject each and every one of our products to extensive life testing. The result is that we continually exceed all British and European standards, and everything we make comes with a comprehensive guarantee.

All our mixers and taps are made in Germany and Bulgaria and exceed European standards.

On average, a dual flush ensures 25% water savings if the short flush is used four out of five times a day per person.

The Vessel basin by Jasper Morrison won the Grand Design Award 2007, page 60.

AquaBlade®

FLUSH TECHNOLOGY

Since its launch in 2015, AquaBlade® technology has won some of the industry's most prestigious awards for its ground-breaking performance and design.

THE FUTURE OF FLUSH TECHNOLOGY

Our Ideal Standard range featuring award-winning AquaBlade® technology sets new standards in flushing performance. Cleaner, smarter and quieter, these stylish WCs outperform all others on the market.

CLEANER

AquaBlade® technology's optimised water pressure and smooth curves deliver outstanding levels of hygiene.

The 'microslot' channel system releases two powerful blades of water close to the top of the bowl that flush bacteria clean away. This leaves 95% of the bowl surface clean every time, compared with traditional WCs which leave 20% of the bowl unwashed. There's no unhygienic splashing, and the shape of the bowl makes it brilliantly easy to clean.

SMARTER

The AquaBlade® dual flush system offers a more efficient use of water compared to standard flushes. You can choose between a 6-litre or a more eco-friendly 4-litre flush, helping you to save on both water and costs.

QUIETER

The narrow AquaBlade® channel reduces turbulence, making for a much quieter flush. And with its super-smooth soft close function, the seat closes slowly and quietly too.

BUILT TO LAST

Based in England, and with selected sites in Europe, we are able to uphold the highest standards in everything we do. Manufacturing excellence is our hallmark, and our guarantee is our promise to our customers.

HAND-MADE QUALITY

Every member of the Ideal Standard team takes great pride in producing our robust, high-performing and stylish range of products. Collective and individual knowledge and experience, along with skill in hand and eye, are the key factors in our precise manufacturing processes and rigorous testing regimes.

Each piece of our porcelain is made to the very highest standards using vitreous china or fine fireclay, and our taps and mixing valves are manufactured from solid brass, other well-proven metals and modern plastic materials. This, together with a commitment to excellence in design and manufacture, ensures we continually exceed all British and European standards. We employ the very best designers and most advanced technology to keep our products at the cutting edge of bathroom innovation.

IDEAL STANDARD IS BUILT ON STRONG FOUNDATIONS:

MAINTAINING MANUFACTURING EXCELLENCE, USING ONLY THE FINEST MATERIALS AND CONTINUAL PRODUCT INNOVATION.

OUR GUARANTEE

Our confidence in the quality of Ideal Standard design and manufacture is the reason we offer a genuine lifetime guarantee on all ceramic products. As well as this, Idealcast baths, Idealform baths and our shower trays are guaranteed for 25 years; shower enclosures, wetroom panels and bath screens are guaranteed for ten years; and showers, steel baths, bath panels, furniture, mixers and taps, WC suite seats, cistern fittings and many spare parts are guaranteed for five years.

See inside back cover for the complete Ideal Standard guarantee.

QUALITY PRODUCTS

Quality is assured with all Ideal Standard taps and mixers. We have our own factories across Europe, ensuring quality control and engineering excellence. Every product is robust, hard-wearing and constructed using only the best materials.

Because we believe in taking quality to the limit, every tap and mixer is made to exceed both British and European standards.

➤ All our products undergo exhaustive testing before they leave the factory. Everything from water pressure and temperature to noise levels are tested and retested. This is how we can guarantee you will experience faultless function and reliability.

At Ideal Standard, we have a firm eye on the future. Our highly experienced engineers are working with a number of European universities to educate and pass their skills on to the next generation of engineering talent. That's how we're paving the way for continued innovation in tap and mixer technology.

FIVE-YEAR GUARANTEE

on all mixers and taps.
See page 172 for our range of mixers and taps.

SPARE PARTS SERVICE

Buying Ideal Standard gives you reassurance and peace of mind. In the unlikely event something should break there is no need to panic. Our dedicated spares website allows you to purchase many different original replacement parts including ceramic discs, flush valves and thermostatic cartridges.

To order or browse our video tutorials visit www.fastpart-spares.co.uk.

THE COLLECTIONS

Whatever your space, whatever your interior style and whatever your budget, everyone can create their ideal bathroom from our collections. From styles that evoke period elegance to soft contemporary forms, from pure simplicity and space saving practicality to award-winning design and designer names, there's a world of choice, and each collection features a wide range of options in fittings, furniture and accessories.

CONCEPT AIR WHEN LIGHTNESS DESIGNS SPACE

With its fine edges, crisp corners and slim, tapering profiles, Concept Air breathes an uplifting sense of lightness into any space. Concept Air is the epitome of gossamer fineness. Its weightless beauty gives pleasure to the eye and joy to the spirit. While supremely delicate in form, Concept Air is, above all, robust and functional – performing brilliantly in the modern bathroom.

Concept Air bathroom

with tap deck £989.10

Tesi wall hung basin mixer
and bath filler £667.05

*Price excludes bathroom accessories, basin waste
and mirror. Price includes VAT at 20%.

DISCOVER TWO FORMS OF LIGHTNESS WITH ARC AND CUBE

Products featured: Concept Air Arc 60cm washbasin with semi-pedestal. Concept Air Arc close coupled AquaBlade® WC with dual flush button cistern and wrap, slow close seat with quick release hinges. Concept Air left handed shower bath and shower bath screen with access panel and Concept Easybox Slim built-in thermostatic shower with Idealrain Cube M3 shower kit. Tesi single lever basin and dual control bath filler.

THE COLLECTIONS CONCEPT AIR

Opening a world of versatility and variation, Concept Air brings you its distinct contemporary elegance in two contrasting styles. Choose the trim, angular shapes of Cube for a sharp, minimal look. Select Arc's fine, semi-circular profile for a softer, organic effect. Create the aesthetic that suits your vision.

With its bold, square geometry, the Cube range makes a definite statement, softened with subtle curves and shallow angles.

The sweeping curves of the Arc range brings a gentle, natural fluidity to the bathroom. Thin walls and fine edges uphold Air's signature sense of lightness.

Concept Easybox Slim thermostatic shower mixer with Idealrain Cube M3 shower kit	£457.39

*Price excludes bathroom accessories, basin waste and mirror.
Price includes VAT at 20%.

CONCEPT AIR CUBE A DESIGN EVOLUTION IN FOUR FORMS

Concept Air Cube's alluringly sleek look manifests itself in four basin shapes: vanity, vessel, pedestal and semi-countertop. These distinct options are designed to offer flexibility of installation and variety in style. While each offers the same crisp elegance, each makes a decisively individual design statement.

VANITY

Concept Air Cube's vanity basins come in a variety of sizes and formats. They can be combined with Concept Air's tailor-made wall hung vanity units with two soft closing drawers or one drawer with open shelving for a minimal look. Flexibility is another of Air's brilliant qualities.

VESSEL

The Concept Air Cube vessel basin is a celebration of fine lines and fine ceramics and transforms a bathroom into a spa-like sanctuary. It's available in two sizes and can be married with the accompanying vanity units or placed on your own worktop.

PEDESTAL

With its slim profile, thin rim and tapering form, the Concept Air Cube washbasin shows off the essence of the range's design in all its purity. But its shallow profile conceals a luxurious internal depth. Cube basins can work with full and semi-pedestals and a range of dedicated cube units for all sizes. Cube is modern elegance personified.

SEMI-COUNTERTOP

The unsupported overhanging bowl of the 50cm semi-countertop basin lends an additional sense of weightlessness to the overall effect. It sits within its companion piece: the floor standing semi-countertop unit. Choose from one of our complementary ranges for the perfect mixer tap, such as the Tesi mixer, shown here.

TESI TAPS & MIXERS

Concept Air shares key stylistic qualities with many other Ideal Standard products. We recommend the taps and mixers from our Concept, Attitude, Tempo and Tesi ranges. For example, Tesi's comprehensive range of basin and bath mixers are slim, clean and contemporary in design – perfectly reflecting the essence of Concept Air.

Can be used with vanity basin units and dedicated worktops.

CONCEPT AIR ARC EMBRACE THE CURVE

The beautifully rounded forms of Concept Air Arc inspire a serene mood. The design language of circular, oval and shallow curves may be perfectly in tune with your interior style. Or perhaps the lack of corners could be a deciding factor for those designing smaller spaces or with bathrooms frequented by younger members of the family.

With a full pedestal, Arc basins exude slender elegance while the wall-mounted option enhances the sense of weightlessness.

THE NEXT GENERATION OF STORAGE SOLUTIONS

In so many bathroom design projects, furniture is an afterthought. But to create that beautiful streamlined look, efficient storage is a must. Concept Air offers a fully comprehensive bathroom solution. Our wide range of complementary furniture demonstrates efficiency in function, flexibility in arrangement and variety in style.

We are a proud member of the UK's largest furniture association. Established in 1949, FIRA ensures all of our furniture meets the highest safety and legal standards.

When choosing Concept Air furniture, you can specify open shelves or, to keep your space supremely calm, opt for spacious soft close drawers. Practical can be beautiful.

FULLY FLEXIBLE STORAGE

Your bathroom, and the way it needs to function, is as individual as you are. A wide furniture choice is the key to making the space exactly right for you.

Concept Air offers a seemingly infinite choice of furniture formats, sizes and finishes. You can also choose between open shelving and drawers, and there's an inspirational variety of colours and finishes.

Our column units make an elegant addition to any bathroom, and the slim design provides maximum storage where wall space is limited. The half length units expand your space planning possibilities.

ALL BATHROOMS GREAT AND SMALL

With a wide selection of unit sizes, Concept Air Cube will fit snugly into compact bathrooms as well as gracing the grandest of spaces.

Our mini Cube vanity basin unit is tailor-made for cloakrooms. Its large single drawer provides ample storage to keep things neat where space is at a premium.

FURNITURE COLOURWAYS

Choose from six colour combinations, from the subtle pairing of Gloss and Matt White to the exciting contrast of luscious Matt Dark Brown against Matt White.

Concept Air bathroom

(as shown)

£3,559^{83*}

*Comprises back-to-wall close coupled AquaBlade® WC suite with standard wrap seat; 104cm vanity washbasin with dedicated furniture unit and column in Gloss White with Matt Grey finish; Concept Air free standing bath; Tesi single lever basin mixer and dual control bath filler. Excludes bathroom accessories, bath waste and mirror. Price includes VAT at 20%.

EVERY STYLE ANTICIPATED EVERY PROBLEM SOLVED

From long experience, we know that every bathroom project is unique. We recognise every challenge and anticipate every possible configuration, and we've designed our ranges to accommodate them.

When your walls won't take the weight or if you need to conceal plumbing going through the floor, the Concept Air floor standing vanity unit will save the day – a sturdy solution with spacious storage.

The wall hung vanity unit is sure to bring a sense of weightlessness to your space. The addition of adjustable chrome legs offers further stability and makes a contemporary style statement.

A LIGHT TOUCH FOR THE SMALLEST ROOM

The sense of lightness that comes from Concept Air's fine lines and tapered profiles makes it perfect for spatially challenging rooms, such as cloakrooms.

With its accompanying Cube basin extending just 38cm from the wall, the short projection vanity unit is perfect for cloakrooms and offers a surprisingly generous storage solution.

THE ADAPTABLE FLOOR STANDING UNIT

Thanks to clever synergy in the two designs, both Cube and Arc semi-countertop basins can be mounted effortlessly into our floor standing semi-countertop unit.

These smart units make a fine, practical addition to your bathroom, and their slim simplicity aligns perfectly with both Cube and Arc styles.

Concept Air
Arc en-suite
(as shown)

£2,968^{10*}

Products featured: Concept Air Arc semi-countertop 50cm basin with 600mm floor standing semi-countertop unit and WC unit in Gloss White front with Matt Grey interior trim, 1200mm semi-countertop worktop in Gloss White. Concept Air back-to-wall AquaBlade® WC with thin, slow close seat with quick release hinges. Concept small single lever basin mixer. Kubo 1200mm slider alcove shower enclosure with Simplicity flat top tray. Concept Freedom built-in thermostatic shower with Idealrain M3 shower kit.

The floor standing units cleverly conceal plumbing as well as offering a practical storage space with an internal shelf for your cleaning products and toiletries.

The semi-countertop unit is great for small spaces, condensing basin, plumbing and storage into one neat and compact piece. The adjustable shelf height lets you make the most of the available internal space.

AHEAD OF THE CURVE

We've embraced the elegant qualities of the original Concept range and refined them further to create an ultra-slimline style.

Combine the elegantly tapering bowl and extremely thin soft close lid with our unrivalled, hygienic AquaBlade® technology, and it's clear that Concept Air WCs are an exemplar of innovation and design. Further benefits include a choice of installation styles and seat types.

For a minimalist look, Concept Air offers back-to-wall and wall hung WCs. And, depending on your installation requirements and flush preference, concealed cistern options or support brackets can be used within the unit to mount the wall hung WC.

The Concept Air range features two close coupled WC options: fully back-to-wall or open backed, both available with Cube or Arc cisterns. The choice is down to personal preference or is dictated by installation type. The elegant cisterns feature a slim lid and dual push button. Water-saving options are also available.

TWO SEAT STYLES

While each has its distinct style, our two different seat designs reflect the same slim aesthetic of the ceramics. Both come in standard or soft close options and benefit from an easy-take-off feature for easy maintenance and cleaning.

The fundamentally different forms of Cube and Arc are elegantly reflected in the two cistern shapes: one uniformly square, the other displaying a gentle curve.

↗
Concept Air
free standing bath
£989^{10*}

*Excludes Tesi dual control bath filler and bath waste. Price includes VAT at 20%.

FREE AND EASY

Free standing means you have the luxury of positioning the bath anywhere in the room, including a corner or alcove. To aid installation, the bath comes in two pieces.

INTEGRATED TAP DECK ↗

The tap deck runs along the full length of one side, giving you freedom to position fittings as you wish as well as providing a convenient place to stand toiletries.

↖ CRAFTED FOR COMFORT

The gentle tapering shape of the bath provides perfect back support while the sloping rim supports the neck. And the thin rim equates to a greater internal volume for an indulgent bathing experience.

BRILLIANT BATHS FOR SMALL SPACES

Planning a small bathroom is all about using space wisely. With our innovative Spacemaker bath range, you and your family could enjoy the many benefits of a luxurious, relaxing bath, even in the most compact of spaces.

Choosing a bath with a modified shape or slightly reduced dimensions is a smart way to get the most out of the available space while barely affecting the bathing experience, please see page 100 for more space saving baths.

TESI + TEMPO THE PERFECT PARTNERS

Our intelligently conceived range of Tempo furniture pieces brings smart, discreet storage to busy bathrooms. With a range of units and integrated ceramics, there's a configuration to fit any room layout. Neutral, yet unquestionably contemporary, the Sandy Grey and Gloss White finish complement Tesi's sleek contours.

Ceramic and furniture elements integrate harmoniously for a beautifully streamlined effect. Soft close doors and drawers bring a satisfying sense of effortlessness to the whole experience.

See page 140 for Tempo furniture.

When you've finished your beauty or hygiene regime everything's hidden away in the roomy storage unit, leaving your bathroom immaculate.

JASPER MORRISON SINGULAR VISION, PURE DESIGN

Ideal Standard has teamed up with Jasper Morrison, one of Europe's most successful designers, to create a bathroom range which fully realises our design ethos. His contemporary forms are a subtle combination of soft squares and oval interiors which have been developed across a full range of sanitaryware, bathtubs and fittings – a modern classic.

WATERFALL EFFECT

Jasper Morrison's oval spout features a specially designed aerator to deliver a water flow that is reminiscent of a natural waterfall.

Save water, save money.
Our CLICK technology lever handle indicates when you've reached the 50% flow point.

For Jasper Morrison mixers & taps see page 190.

WHITE SIMPLE GEOMETRY, UNIQUE SOLUTIONS

Designed by architect David Chipperfield and inspired by the relationship of geometric forms, the sculptural simplicity of White brings the best of contemporary design to the bathroom. White has a selection of beautiful pieces from which you can create your perfect bathroom. Polished chrome-plated Silver mixers and taps complement the range.

CONCEPT CUBE, SPHERE, ARC?

Concept is where creative design meets practical solutions. Choose a style that appeals to your taste from three distinctive basin shapes, then build your dream bathroom around it. With Concept you can fulfil your whole wish list. You'll discover WC and bathing options, innovative storage, stylish accessories and some very clever ideas along the way. Concept offers a complete solution, giving you value without compromise.

Concept bathrooms from

Idealform 170cm shower bath with front and end panels, bath screen	£975.65
Ascari built-in thermostatic shower with Idealrain L3 shower kit	£665.03

*Comprises 55cm pedestal basin, close coupled WC suite, 170 x 70cm Idealform bath with front panel and pillar taps. Price includes VAT at 20%.

CHOOSE FROM THREE DISTINCTIVE BASIN DESIGNS

CONCEPT CUBE

Strong, simple lines provide a contemporary look which is beautifully balanced by Concept's signature soft inner rim. The main basin is a bold statement piece in a range of sizes making it suitable for any space, whilst two short projection options bring architectural style to the smallest of bathrooms.

CONCEPT SPHERE

Sphere offers hotel-chic style perfect for creating a relaxing, tranquil bathing space. Formed of a soothing circle, it is design for the discerning. A range of basin sizes and pedestal options provides you with endless possibilities, and for ultimate luxury the pure round vessel creates a feel of the luxury spa at home.

CONCEPT ARC

A classic shape that will sit easily in any bathroom, Arc mixes a smooth curve with a gently scooped interior for a supremely versatile basin. The pedestal version is timelessly elegant, the corner perfect for smaller spaces.

*Comprises 50cm pedestal basin, close coupled WC suite, 170 x 70cm Idealform bath with front panel and Alto pillar taps. Price includes VAT at 20%.

PRACTICAL, COMPACT CHIC

Cube's two short projection basins are specifically designed for smaller spaces – the bowl volume is maximised even though they have a slim profile. Practical, family-sized basins designed to give you space to breathe.

For more short projection basins see Concept Space page 92.

WATER-SAVING WC

On average, a dual flush ensures 25% water savings if the short flush is used four out of five times a day per person.

Choose a WC suite to complement your basin shape and bathroom style. With two modern bowl shapes and cistern shapes there is plenty of choice. The Arc cistern is a perfect semi-circle, the Cube a neat square cistern. Both are dual flush and compatible with the cutting-edge clean lines of the Concept WC suite or the classic contemporary bowl of the Studio WC suite.

There are close coupled, back-to-wall and wall hung models, all with the option of a slow close seat for added luxury. And all Concept Cube and Arc WCs feature our superior AquaBlade® flushing technology, winner of the Gold Award for Innovation in Sustainability at the Designer Kitchen & Bathroom Awards 2015.

There is also a choice of seat style between the standard wrap over and the ultra contemporary slim option.

For new Concept Space short projection WC suites and bidets see page 92.

See our feature on pages 4 and 5 to discover how AquaBlade® WCs have revolutionised flushing performance for greater hygiene.

Concept Blue
basin mixer

Featuring Blue technology, Concept mixers and taps have been designed to complement the Concept range but would also perfectly enhance other ranges. They offer a wide choice of innovative fittings that combine distinctive design and high-performance features to guarantee quality, comfort and ease of use.

For Concept Blue mixers & taps see page 182.

To see mixers & taps options go to page 172. Price includes VAT at 20%.

CONCEPT SPACE SMARTER SPACE

Concept Space is designed to help you get more out of your bathroom. This one room needs to provide an invigorating shower for dad, bath time for the kids and a sanctuary for mum. Using Concept Space products, every spare inch has been utilised to meet everyone's demands without feeling cramped or compromising on style.

The next few pages show some typical plans designed to get you rethinking your own space.

With a wider room there's space for the bigger 170cm square shower bath and a larger basin. The basin and WC unit are handed to push the user into the middle of the room and there's storage for the whole family in the basin unit and above the WC.

Concept Space bathroom

(as shown)

£3,515^{25*}

Back-to-wall WC with standard seat	£471.23
70cm vanity wash basin with left hand platform	£228.78
Furniture comprising right hand WC unit with 600 x 30mm worktop, left hand and 700mm basin unit with 600mm fill in shelf unit	£1,403.54
170cm Square Idealform shower bath with front panel and bath screen	£911.18
Concept Blue basin mixer with pop-up waste and bath shower mixer with Idealrain M1 kit	£500.52

*Price excludes bath waste, 600mm wall unit, bathroom accessories and mirror. Price includes VAT at 20%.

SHAPED TO FIT

Bathrooms have evolved to suit our modern lifestyle – but many have awkwardly positioned windows and doors that means standard products don't fit neatly. The Concept Space range includes the Spacemaker bath which tapers to fit around problem areas.

Concept Space en-suite

(as shown)

£2,510^{09*}

Corner close coupled back-to-wall WC suite £575.71

45cm Arc corner basin with corner furniture unit £631.88

Concept small basin mixer £136.31

800mm Kubo Quadrant shower enclosure with Simplicity flat top LP tray £836.44

Ceratherm 100 exposed thermostatic shower with Idealrain M3 kit £329.75

*Excludes mirror and bathroom accessories. Prices include VAT at 20%.

Space is the ultimate luxury. Space to live, to relax or just be by ourselves. No matter how much we have, it never seems enough and this is doubly true in the bathroom. Concept Space is designed to help you get more out of your bathroom. So whether you need more elbow room, clever storage or an en-suite to ease the morning rush, the Concept range introduces a range of compact solutions.

Slim basins and compact WCs shave precious centimetres off the projection which make a big impact on user comfort in small or awkward spaces.

Concept Space basin units have one sleek drawer front but hidden inside there's a deep drawer for fresh towels and a second drawer for grooming products and accessories.

CONCEPT SPACE SAVING BASINS

➤ Concept Space 55cm basin with semi-pedestal (as shown)

THE COLLECTIONS
CONCEPT SPACE

Concept Space guest furniture basin with left hand platform; corner WC. Concept Space wall hung guest basin unit, left hand (Gloss Grey finish). Concept 400mm mirror; towel ring; metal soap dispenser; toilet roll holder with cover. Concept Blue basin mixer.

CONCEPT SPACE SPACE SAVING BATHS

The Spacemaker bath is a great solution for awkward spaces. In this room a standard bath would overlap the window but the Spacemaker bath narrows to 55cm and creates space to solve the problem.

CONCEPT SPACE SPACEMAKER BATH

- The innovative design combines a contemporary angular shape with an ergonomically curved internal back rest for comfort.
- The Spacemaker bath narrows to 55cm at the tap end to accommodate awkward bathroom shapes and obstructive windows or door swings.
- Available left or right hand.

CONCEPT SPACE SQUARE SHOWER BATHS

- The design combines a contemporary square aesthetic with an ergonomically curved internal back rest for comfort.
- The showering area is a generous 85cm wide.
- The square shower bath screen features a return panel to deflect water back into the showering area. It opens both inwards and outwards for access and cleaning and incorporates a handy towel rail.
- There is a choice of acrylic bath panels or wooden panels to match all five Concept furniture finishes.
- Available left or right hand.

CONCEPT SPACE FURNITURE

If you dream of a beautiful bathroom it probably doesn't include cluttered surfaces. Storage transforms bathrooms and makes a small room look and feel larger. Concept Space basin units tuck two handy drawers into the space beneath the basin.

We are a proud member of the UK's largest furniture association. Established in 1949, FIRA ensures all of our furniture meets the highest safety and legal standards.

Concept Space basin units are supplied with a combination of loose internal storage boxes to fill half of the top drawer. Additional boxes are available to customise your storage.

We've already seen how useful corner products are for planning small spaces. The corner basin unit provides essential storage in small bathrooms and en-suites.

Concept Space includes a range of mirrored cabinets available with white or aluminium sides to complement the new furniture finishes. You don't need a small bathroom to take advantage of a mirrored cabinet and sizes range from 500mm to 1300mm.

Chrome finish legs are available as an option for all Concept basin units.

The Concept Space WC unit offsets the WC to the left or right so you don't feel pushed up against the wall. The design includes handy storage in the space left behind the WC. It's big enough for toilet rolls and cleaning materials.

CONFIGURATIONS

Here are a few furniture layouts which illustrate the flexibility of the Concept and Concept Space furniture ranges.

500mm Concept Space Cube basin unit; 600mm Concept Space WC unit (left hand); and 600mm mirror in unit. 600mm mirror cabinet and 500mm mirror.

450mm Concept Space guest basin unit (left hand); 300mm add on guest basin unit; 300mm wall unit. 400mm Concept mirror.

Concept Space tall unit; 600mm Cube basin unit, left hand; 600mm fill in unit. 600mm Concept mirror.

170cm Idealform Spacemaker bath and front panel	£540.84
Concept Blue basin mixer with pop-up waste and bath filler	£429.25

*Excludes bath waste and accessories. Price includes VAT at 20%.

In this compact bathroom every product has a part to play. The Spacemaker bath is angled to allow for the width of the door frame. The basin is handed so it can sit snug into the corner and its short projection leaves space for the user to step back and open the drawer. The compact WC opens up the space and makes it feel less cramped.

SLIMMER BY DESIGN

Because everyone's space is different, Concept was designed by Robin Levien to provide huge flexibility and choice. Concept Space is the natural development of that idea and adds another dimension to the Concept range. These products don't just solve space problems – they help you achieve the bathroom design you want.

Concept Space Basin pedestal unit

Model	Configuration	Ref.	Price A	Price B

CONCEPT MIRRORS

Concept mirrors are made to the highest standard, with an elegant, minimal design that will suit any Ideal Standard collection. Mirrors come in a range of sizes, with or without integrated lighting and anti-steam system. Subtle frames lend an airy feel – an easy fix for smaller bathrooms, reflecting light and expanding the space dramatically.

While Concept is all about brilliant, practical solutions, you'll also discover some luxurious touches; these include Concept mirrors available with Ideal Standard's integrated anti-steam system.

CLEVER AND PRACTICAL SOLUTIONS FOR ANY SPACE

Concept range offers an endless choice of practical storage solutions including this mirrored wall cabinet with two adjustable shelves.

For Concept accessories see page 324.

Concept Mirror cabinets

Price includes VAT at 20%.

ELEGANT INTEGRATED LIGHTING

Lighting is an important, but often-overlooked, element of bathroom design. Our integrated mirror lighting solutions provide perfectly even illumination for your facial routines such as make-up or shaving.

CONCEPT FREEDOM ELEGANT DESIGN FOR ALL ACCESS NEEDS

Concept Freedom demonstrates, once and for all, that inclusively designed bathrooms can be beautiful. Created for comfort and accessibility, the range is inspired by our successful series of compliant products for non-residential environments. Each product, across the range of ceramics, taps and showers, is thoughtfully designed to be helpful for those less able. But, at the same time, the design integrity of Robin Levien's core range is faithfully upheld, and all Concept Freedom products are interchangeable with our Concept and Concept Space ranges.

Concept Freedom
en-suite (as shown)

£3,611^{53*}

Freedom dual shower with M1 rainshower, fixed riser, M3 handspray and pin handles	£691.76

*Excludes bathroom accessories and mirror.
Price includes VAT at 20%.

HARD-WORKING PRODUCTS CRAFTED WITH CARE

Ease of use might be the priority here, but Concept Freedom retains a strong sense of style, thanks to the extra thought that's gone into the design. With its practical profile and elegant lines, our accessible basin (featured on the opposite page) proves the point beautifully.

The beauty of Concept is the potential to mix ranges. With a strong architectural outline balanced by soft inner rim, the Concept Cube basin shares fundamental design principles with the Concept Freedom range.

Those necessary helpful alterations and accessories no longer have to be unsightly intrusions; our refined accessible basin and contemporary chrome grab bars make a strong style statement.

Concept Freedom Idealform Plus+ 170 x 80cm bath

Model	Ref.	Price
170 x 80cm Idealform Plus+, left hand bath	E108701	£482.52
170 x 80cm Idealform Plus+, right hand bath	E108801	£482.52
Concept Freedom headrest – grey	E109267	£117.37
45cm support rail	E1093AA	£143.45

800mm end bath panel	E109701	£65.21

Bath includes clicker waste

Positioning of the rails is advisory and should be positioned according to height and preference.

REDISCOVER THE PLEASURE OF BATHING

Bathing should be an experience that's blissfully free from anxiety. But, for many, problems with accessibility and manoeuvrability can make the process unnerving and even hazardous.

Our Concept Freedom bath features thoughtful integral design elements and smart accessories that address each problem point in an elegant way, offering total peace of mind. Regain confidence, regain independence, regain freedom.

While completely functional in one sense, the headrest would bring a touch of luxury to anyone's bathing experience. The polyurethane gel has shape memory, which responds to the arc of the neck, correctly distributing pressure and providing comfortable yet firm support. The reinforced extra-wide ledge provides stable support for either the user or a companion.

For enhanced accessibility, the lowered height of the bath is a simple but brilliant solution. The integrated step acts as a convenient intermediate level for entry and exit as well as aiding movement by providing something to push against.

The additional chrome support rail comes in two sizes and proves itself an invaluable aid when getting in and out of the bath. The minimal design would suit any bathroom and effortlessly complements the other rails within the Concept Freedom range.

FREEDOM FOR MAXIMUM COMFORT

Our Concept Freedom range is our response to the important issue of accessibility. Created with ease of use and comfort as the primary design considerations, the range includes WCs with extended dimensions to meet a range of access needs, including those for users with limited mobility.

Award-winning designer Robin Levien worked in conjunction with occupational therapists to develop solutions that are both accommodating and aesthetically appealing, successfully upholding the design integrity of the core Concept range.

Concept Freedom XL WC

The Concept Freedom XL WCs feature a wider, deeper seat and bowl area, providing increased support and comfort for those of a larger build.** Compared to a traditional WC, they offer an extra 33% in width. The XL WC is available in close coupled and back-to-wall, both feature soft close seats.

Our raised height WCs are specially designed for those with mobility issues and back pain sufferers. They're approximately 25% higher than average and available as close coupled and back-to-wall options. All raised height WCs feature soft close seats.

**Floor standing and back-to-wall XL bowls are suitable for weights up to 380kg. The weight suitability of our wall hung XL bowl is dependent on installation type.

Concept Freedom raised height WC suites from **£607^{11*}**

*Comprises back-to-wall bowl, seat without cover and concealed cistern with pneumatic dual flush. Price includes VAT at 20%.

TEMPO MINIMAL GENTLY EVOLVES

While retaining a distinctive minimal look, Tempo's softer edges make it the perfect choice for modern families. Free of sharp corners, this is inclusive design for family life where practicality rules and safety comes first.

Tempo's streamlined shapes also help enhance the feeling of space. The subtle angle of the basin and the slender, tapering pedestal create a discreet overall look.

Tempo bathrooms

TEMPO VANITY BASINS – SIMPLY SEAMLESS

Tempo's vanity basins are designed to integrate harmoniously with the accompanying storage unit. The level countertop extends beyond the full width and depth of the unit to create a completely unhindered working surface. It's all about inspiring a sense of freedom and providing generous space for your products.

Wooden insert not included

When you've finished your beauty or hygiene regime everything's hidden away in the roomy storage unit, leaving your bathroom immaculate. Soft close doors and drawers bring a touch of effortlessness to the whole experience.

BASIN AND STORAGE
BECOME ONE – CERAMIC
AND FURNITURE ELEMENTS
UNIFIED IN ONE
BEAUTIFULLY
STREAMLINED UNIT.

Unit finish choices are pristine White Gloss and sophisticated Sandy Grey. Legs and handles are chrome with a sleek square profile.

Tempo vanity basins and their matching units are available in 50cm, 60cm and 80cm widths. The storage units come in three formats: a floor standing unit with two doors, a shorter two-door unit with legs, and a wall hung two-drawer unit with optional legs. To make your bathroom storage system complete, add the complementary tall unit, featuring two reversible doors.

Tempo 80cm vanity basin and unit with two drawers

£601^{91*}

MINIMALISM EVOLVES

Design is at the heart of everything we do. We've been working with award-winning product designer Robin Leven for over 20 years and, as lead creative on Tempo, Robin's close eye on trends and changing habits has led to a range that softens the minimal aesthetic with gentle, organic curves.

Tempo

A WIDE CHOICE OF BATHS

The soft curves of Arc or the linear simplicity of Cube – two subtly different baths complete the Tempo range, thoughtfully designed to meet the demands of today's bathroom.

Bath options

Common to many of Ideal Standard's bath ranges, you'll find single-ended, double-ended and our purposefully designed shower baths, all featuring a gently sloped interior, providing spa-style relaxation. And to help tackle water wastage, our water-saving baths feature reduced capacity. All baths are moulded from Idealform, a long-lasting, scratch and stain resistant material which also gives exceptional insulation. Or you can choose luxuriously glossy Idealform Plus+, which provides all the benefits of Idealform, but with increased rigidity and strength.

Arc rectangular bath

Cube rectangular bath

Arc double-ended bath

Cube double-ended bath

Arc shower bath

Cube shower bath

Tempo Arc

The Arc bath features a gentle curve, which draws inspiration from the soft arc of the bow-fronted basin.

Tempo Cube

The straight lines that characterise the Cube bath range reflect the strong horizontal linear motifs of the Tempo basin.

The additional space provided by the Arc shower bath is softened with a gently embracing curve.

The Cube shower bath features an integrated shelf for all your bathing and showering toiletries.

The brilliantly simple solution of centrally positioned taps doubles your bathing possibilities.

WAVERLEY TRADITIONAL ELEGANCE LOVINGLY RECREATED

For homes that crave a traditional look, Waverley offers authentic period style with the quality and reliability of modern manufacturing. Taking its reference from authentic Edwardian or Victorian pieces and faithfully incorporating important decorative details, Waverley brings a classic elegance to both bathroom and cloakroom. Choose from four basins and four WCs, including the distinctive, period-defining high-level cistern model.

Waverley
bathrooms (as shown)

£2,837^{71*}

High level WC suite with ornate brackets, flush pipe, pull chain and mahogany effect seat

£795.19

56cm pedestal washbasin

£242.45

170 x 80cm Idealcast roll top bath with cast iron feet

£1,800.07

*Price excludes basin and bath fittings and wastes, bathroom accessories and mirror. Price includes VAT at 20%.

DISCOVER AUTHENTICITY IN EVERY DETAIL

The Waverley range allows you to create a complete bathroom suite, with a singular traditional look, in keeping with the period features of your home. Each piece follows the same, distinct classical style, favoured in both the Edwardian and Victorian eras while our high-quality ceramics and brassware meet the demands of modern lifestyles.

➤ A COMPLETE RANGE

The size options within the range provide the flexibility required when planning a modern space. From the master bathroom to the guest en-suite or downstairs cloakroom, Waverley has a basin to suit.

➤ The pedestal basin, with its stately proportions, is an essential element when creating a true period bathroom.

The Waverley Edwardian pedestal basin comes with one or two tap holes.

The 45cm Edwardian cloak basin features two tap holes and an integrated splashback.

Waverley Basin 56cm

Model	Ref.	Price
56cm, one tap hole	U470201	£175.90
56cm, two tap holes	U470101	£175.90

32 x 75mm seal bottle trap	E3198AA	£52.26
Steel wall hangers (pair)	E501067	£2.24

OUR CLASSIC
ROLL TOP BATH
FEELS EVERY BIT
AS LUXURIOUS
AS IT LOOKS

With its splendid cast iron feet, our free standing Idealcast roll top bath is the defining piece of your period bathroom, complemented perfectly by our traditional bath mixer and handset.

See page 228 for more information.

A high level cistern is synonymous with the Victorian and Edwardian bathroom, when a WC was a grand affair. Our chrome cistern brackets, chrome flush pipe and the ceramic pull handle are the details required to make the right heritage statement.

The Waverley close coupled WC may be designed for smaller spaces but is no less refined than its low and high level counterparts.

The back-to-wall WC brings an element of contemporary streamlining to an otherwise faithful period piece.

CHOOSING YOUR CLOAKROOM

In this, the smallest room of the house, millimetres count. Designing a cloakroom is a real test of domestic ergonomics. To make the most of the space available, it's vital that the sanitaryware you choose is ultra-compact. Not only have we designed pieces specifically for tight spaces, but by thinking outside the box we've come up with some great tips for tiny rooms. We think you'll be surprised at what you'll be able to do with just a few square feet.

1

ILLUSION OF SPACE ↗

Mirrors increase the feeling of space and light.

2

3

4

- 1. Free up floor space**
 With a wall hung basin you can dispense with the bulk of a pedestal, to create a minimal and sophisticated look. It also makes cleaning the room so much easier.
- 2. Let there be light**
 With a cloakroom, you certainly won't be able to fool anyone into thinking it's a big space. However, if you keep the colours of walls and tiles pale, make good use of lighting and mirrors, at least you'll have a room that doesn't feel claustrophobic.
- 3. Space saving products**
 A downstairs cloakroom for visitors is a real advantage – but where to put it? Using Concept Space products it's possible to fit a small, practical cloakroom under the stairs, see page 104.

5

- 4. Storage in a tight spot**
 The L shaped door of the guest basin unit reduces the projection on the door swing when open. The door also includes an internal storage box for easy to reach items.
- 5. Using precious corners**
 Installing a cloakroom vanity unit might be another smart solution. Our Concept corner basin unit is perfect for smaller spaces; the cabinet below the basin hides the plumbing and provides the ideal place to keep toiletries, see page 104.

CLOAKROOMS AT A GLANCE

Every cloakroom is as individual as every house, but to give you an idea of what's possible, here are some key cloakroom solutions from our many ranges. Styles range from traditional to ultra-modern, but there's always a focus on saving space.

Concept Space cloakroom from £740^{62*}

Cloakroom set £1,150.86 (as shown)

45cm guest basin with Concept Blue basin mixer and floor standing basin unit. Close coupled corner WC suite.

(as shown)

£443^{50*}

*45cm handrinse semi-pedestal basin with Alto basin pillar taps and close coupled WC suite.

Prices exclude basin chain wastes, wall hangers and bathroom accessories.

MIXERS & TAPS

When you're choosing a tap or mixer, the most important thing to know is that it's the right one for you and your home, whether yours is a high or low pressure hot water system. With Ideal Standard, you can rest assured you've chosen right, every time. Whatever your system, we can offer you a range of stylish, high-quality taps and mixers that perform brilliantly.

We've got something for everyone. On the following pages, you'll discover a comprehensive range of simple and intuitive-to-use taps and mixers for bath, shower and basin, everything from classic to contemporary designs, every one high quality and high performing.

CHOOSE YOUR FITTINGS

At Ideal Standard, we've perfected the next generation of mixers and taps, ensuring you can enjoy unparalleled levels of comfort and control. Inspired by you and your family's needs, these innovations feature everything from technology that allows you to limit flow levels so you can save water and energy to temperature control and Cool Body features for your comfort and safety.

EASY, SPEEDY FITTING

Designed to allow you to fit your mixer from above the basin rather than below, where space is traditionally tight, our TopFix system means installation is fast and easy. The matching bidet mixer is also available with the TopFix system.

SAVE WATER AND ENERGY

All our products have water-saving features built-in. In fact, we were the first company to offer factory fitted flow regulators on our basin mixers. The ingenious CLICK technology in our single lever basin mixer and bidet mixer is designed to help you save water. Just lift the handle until you feel a slight resistance; this tells you you're getting 50% of the mixer's maximum flow. To achieve full flow, simply lift the lever to its maximum.

EXTRA SAFETY

Particularly important if you've got children, our temperature limit stop controls the temperature on the mixer when the tap is full on. This can be preset to suit your family's comfort and safety.

INNOVATIVE BLUE TECHNOLOGY

With its intelligent design and precision engineering, the Blue collection – Concept, Tesi and Active – perfectly balances your need to reduce water consumption with safety and control.

The innovative basin fittings are specially engineered to use less water, so reducing your energy costs. Efficiency that brings real savings to your home. In addition to this, some of the bath fillers and bath shower mixers include state-of-the-art thermostatic controls, ensuring your family stays safe at all times.

Water is never in contact with the brass body, as it passes through waterways made of special plastics.

Special hoses from specific nickel- and lead-free materials.

IDEALPURE®

Another first from Ideal Standard, our IdealPure® technology gives you nickel and lead-free waterways. Waterways are made from special plastics, ensuring water never makes contact with any metals and that means clean, safe water, every time.

A REVOLUTION IN EFFICIENCY

The Blue basin mixers are engineered to use less water and energy thanks to features like the flow regulator and the fact that less water is held in the tap when it is off. And by saving energy and water, you save money.

EASY TEMPERATURE CONTROL

It's so easy to control water pressure and temperature with a smooth, effortless handle featuring our pioneering ceramic disc technology. A single lever controls the pressure and temperature within a comfort zone of 30–45°C. So, you can limit water wastage and enjoy a more efficient flow rate – with no drips!

We've also developed a multiport cartridge that enables even those with low pressure systems to enjoy a reliable, efficient flow. We've incorporated this technology into our one hole bath fillers too so you can match the single lever design of your basin filler with your bath mixers. We're proud to say no other company offers this design feature.

FASTER, MORE CONVENIENT BATH FILLING

Idealfill fittings are separate from the filler so you can turn the water on and off from a convenient place on or around the bath while the water comes from a combined filler and overflow. So, no more stretching around the shower screen to turn your bath on. Idealfill delivers 23 litres of water per minute, faster than any other bath-filling system.

EASY OPERATION

Lay back in the bath and relax. And if you need a little extra water, the smooth single lever operation makes it so easy, as featured here with the Active single lever bath filler.

MIXERS AND TAPS

The following chart gives an overview of our complete range of mixers and taps including all water-saving, time-saving and safety features.

TESI MIXERS ELEGANTLY DIVERSE

Designed by Artefakt and meticulously manufactured in our European factory, Tesi mixers express quality, style and versatility in equal measure. Characterised by clean geometric lines and counterbalanced by soft, round forms, they perfectly complement the stylistic qualities of Tesi ceramics.

There are four basin mixers: tall, mini, standard or built-in. All are wonderfully slim in design and feature a ceramic disc cartridge to control the flow and temperature of water with impeccable precision.

JASPER MORRISON A DESIGN ICON

This contemporary range comes from the creative imagination of one of the UK's top designers, Jasper Morrison. Ultra cool and featuring the uniquely styled teardrop handle on the basin, bath mixers and showers, this range is both practical and highly visual.

If you're looking for something extra, the range features a special oval spout that delivers a waterfall-like flow effect.

Jasper Morrison mixers are part of a collection that includes washbasins, furniture and baths.

For Jasper Morrison basins see pages 59 and 60.

ALTO LONG- LASTING STYLE THAT SAVES YOU WATER

Alto is the ideal choice for a bathroom on a budget while offering impressive performance. The full range of taps and mixers delivers reassuringly accurate water temperatures and provides flow control functionality for the environmentally conscious.

Every fitting features a 5-litres-per-minute aerated flow regulator that complies with water-saving legislation. And the single lever basin mixer incorporates Ideal Standard's CLICK technology, allowing you to select a water-saving 50% flow level as well as the standard full flow.

TOP PROTECTION

To keep your family safe at all times, we've incorporated a temperature limit stop on our basin and bidet fittings. You can choose between four settings, safe in the knowledge that even when the tap is full on, the water will never be too hot.

For more mixers with
CLICK technology see
chart on page 177.

BATHS

The bath is the heart of your bathroom and where the most time is spent; it is crucial to your overall bathroom plan. That's why we have a wide selection of styles, shapes, sizes and materials, and why we've considered every possible factor, from economy to luxury and space restrictions to interior styles. So relax, we've got the bath for you.

Choosing your style of bath	224
Choose a bath material	225
Choosing your bath	227
Idealcast	228
Idealform Plus+/Steel	230
Baths at a glance	232

CHOOSING YOUR STYLE OF BATH

What could be more relaxing than sinking into a deep, steamy bath at the end of the day? Many Ideal Standard suites include a bath option, but also available is a collection of individual sizes, shapes and styles to meet your needs.

Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee all Idealcast, Idealform and Idealform Plus+ baths for 25 years from date of purchase. Porcelain enamelled steel baths and acrylic bath panels are guaranteed for five years from date of purchase. Bath shower screens are guaranteed for ten years from date of purchase.

Shower baths

When space is at a premium, and making the choice between a bath or shower is a compromise too far, our range of shower baths is the perfect solution. Many of our collections feature this practical option.

Water-saving baths

Water is increasingly precious and expensive, but families are often reluctant to give up their bath. Our standard 1700 x 700mm baths will hold between 175 and 210 litres to the overflow, but our water-saving options only hold around 149 litres – that's up to 28% less water.

CHOOSE A BATH MATERIAL

Idealform

Idealform baths are moulded from a high-quality reinforced cellcast acrylic sheet. This long-lasting material is scratch and stain resistant, and being relatively light, it's easy to move and install. It's also warm to the touch and provides exceptional insulation, keeping water warmer for longer.

Idealform Plus+

Idealform Plus+ provides all the benefits of Idealform, but with double the reinforcement for peace of mind. The thicker encapsulated baseboard and unique leg set provide a supremely sturdy core, while the acrylic outer shell is luxuriously glossy, smooth to touch and resistant to wear and tear.

Idealcast

The strength of cast iron with just half the weight, Idealcast is a highly engineered material made from a composite of resins and materials cast onto the reverse of a vacuum formed shell. Luxuriously glossy, smooth to the touch, easy to clean and with a minimum thickness of 8mm, Idealcast is the most rigid of all synthetic baths.

Steel

Our standard gauge porcelain enamelled steel baths offer great strength and resilience, and because of this they are often specified for contracts when durability is the principal concern. All steel baths feature a slip-resistant base*.

*Anti-slip reduces the likelihood of slipping, but does not prevent all slipping.

RELAX IN LUXURY

Our Ideal Standard Idealform bath gives you the relaxing time you need after a busy day.

CHOOSING YOUR BATH

Ideal Standard has a vast selection of bath sizes, shapes and styles to choose from. Whether it's space saving or made for sharing, modern or traditional, you're sure to find one to meet your exact needs.

The following chart gives an overview of our complete range of baths including all water-saving, space saving and shower baths.

BATHS IDEALCAST

People associate cast iron with strength, but also with enormous weight. Idealcast is a composite of resins and minerals cast onto an acrylic shell, which creates a very rigid, but relatively light, product.

An Idealcast roll top bath will be delivered with an external matt finish for you to decorate to complement your bathroom design scheme.

Roll top
Idealcast bath

SHOWERS

What's the key to a great shower? Power is always an important factor, but you also need to consider style, how much space you have, and the level of control you need. To help you find the perfect shower solution for your bathroom, we offer a comprehensive selection of enclosures, trays, valves and shower kits, and the benefits of each one is clearly explained so that putting it all together is simple.

CHOOSING YOUR SHOWER ENCLOSURE

At Ideal Standard, we understand what it takes to make the perfect shower environment and strive hard to make sure we achieve this. The main design variable to consider is access, and the deciding factors here are space and position. From ingenious door mechanisms that work in the smallest cloakroom, to roomy yet practical enclosures for family bathrooms, we've thought of every conceivable scenario.

CORNER INSTALLATION...

Quadrant/offset quadrant

With their gentle curved edges these enclosures suit almost any bathroom design, creating an open relaxing environment, even in restricted spaces. Sliding or hinged doors offer maximum access to the shower area.

Sliding door opening

Hinged door opening

Pivot/hinged door with side panel

These doors swing open to offer wide access, which combined with a side panel creates a light and airy showering area.

Sliding door with side panel

Sliding doors glide smoothly out of the way, offering maximum access where there is limited space to open a door. Sliding doors are great for larger spaces to create luxurious showering areas.

Infold/bifold door with side panel

When you don't have room to open your door outwards, an infold door is the model for you. An excellent space saving device, it offers wide access even in awkward spaces. A bifold has the added bonus of not only folding inwards but also folding out.

Corner entry

If you have limited space on either side of your shower cubicle, corner entry enclosures offer an effective solution. Sliding or hinged doors open in the centre allowing easy access to a roomy showering area.

...OR ALCOVE INSTALLATION?

Pivot/hinged door

These doors work well in alcoves, allowing the maximum showering area combined with the maximum access.

Sliding door

Sliding doors are a practical solution for alcoves, especially larger spaces. The smooth running wheels glide the door easily out of the way for easy access.

Infold/bifold door

The infold door is a great option for bathrooms with limited room for a shower. It folds inwards to save space and the bifold also opens outwards.

FEATURES

Expert engineering means our collections are full of clever features which make them not just a pleasure to use every day but easy to install, clean and maintain. As each range is individual, check each door for applicable features.

Glass thickness

Toughened safety glass thickness.

Smooth running wheels

Quality wheels mean doors glide along effortlessly and silently.

Concealed fixings

The cover profiles click easily into place during installation and combine with top caps to ensure that all fixings are concealed.

Power shower proof

The enclosures have been tested to ensure that they are power shower proof, so even with the most invigorating of showers the seals remain watertight.

Rise and fall hinges

Ensure doors open and close with ease.

Horizontal adjustment

Allows perfect fitting to out-of-true walls. Check each collection for adjustment values.

Horizontal and vertical adjustment

The profile can be adjusted both vertically and horizontally to allow fixing into grout lines rather than into tile centres.

Guarantee

All Ideal Standard shower enclosures are backed by our comprehensive guarantee.

Idealclean

For glass that's easier to clean and stays cleaner for longer, reducing cleaning time by up to 90%.

Click and clean

The lower wheels and panels can be released to expose them for thorough cleaning. The panel then easily clicks back into position to create a watertight seal.

SYNERGY STEP INTO A NEW WORLD OF SHOWERING

With its semi-framed design and exposed glass edge doors, Synergy has been created to open out your shower space for seamlessness and harmony throughout your bathroom.

Without Idealclean finish

With Idealclean finish

EASY TO CLEAN

Click and clean

The lower wheels and panels can be released to expose them for thorough cleaning. The panel then easily clicks back into position to create a watertight seal.

Installation: Screen and hinges ordered separately, both must be ordered to create bath screen.

Price includes VAT at 20%.

CHOOSING YOUR SHOWER TRAY

These slim, lightweight trays complement Ideal Standard shower enclosures. Every tray comes complete with a 90mm waste, and for complete flexibility of installation, there are tray options with integral upstands to allow for tiling to the surface of the tray.

SIMPLICITY LOW PROFILE FLAT TOP SHOWER TRAYS

- Height 40mm
- Acrylic capped ABS
- Lightweight stone resin
- Suitable for floor standing or riser installations
- 90mm fast flow waste included
- Twenty-five year guarantee

SIMPLICITY LOW PROFILE UPSTAND SHOWER TRAYS

- Height 50mm (including tiling upstand)
- Acrylic capped ABS
- Lightweight stone resin
- Integral tiling upstand
- Suitable for floor standing or riser installations
- 90mm fast flow waste included
- Twenty-five year guarantee

IDEALITE LOW PROFILE FLAT TOP OR UPSTAND SHOWER TRAYS

- Height 45mm (excluding upstand)
- Acrylic capped ABS
- Lightweight polymer resin
- Suitable for floor standing installations
- 90mm fast flow waste included
- Twenty-five-year guarantee
- Available in flat tops or upstand with integral tiling upstand

SIX SHAPES OF SHOWER TRAY

1

2

3

4

5

6

1. Offset quadrant tray.
2. Rectangular tray.
3. Square tray.
4. 170 x 70cm rectangular tray. Suitable for installations where a bath is being replaced by a shower enclosure.
5. Quadrant tray.
6. Pentagon tray.

FEATURES

Upstand trays

Upstand trays feature a water-retaining lip around the edge that is tiled into the wall (see above) to minimise water leaks. The shower tray is placed against a finished wall, with plasterboard on top of the upstand. The tray is then tiled into the wall by tiling over the upstand onto the tray.

Where an upstand is not required around the whole tray, a roll of flexible adhesive upstand is available to purchase which can be cut to size as required.

Light and easy

Idealite low profile shower trays are substantially lighter than conventional shower trays. With a height of just 45mm, they are strong and durable with contemporary good looks.

Important dimensional information

Shower trays, doors and enclosures are sold in nominal sizes. Most trays are tiled down onto the rim, therefore the actual finished installation space will be less than the nominal size. It is critical that the shower door or enclosure dimensions are compatible with the actual installation space; check your chosen products for compatibility before purchasing and commencing installation. It is important that the available installation space is measured correctly, and more than once. Take measurements from the top, middle and bottom of the finished area, taking into account tile thicknesses and uneven walls and floors. It is always more accurate to take measurements on the finished tiled surface. All trays must be installed level and fully sealed before commencing the shower door or enclosure installation to ensure correct fit and leak-free showering. The minimum and maximum dimensions shown are the full extent of the available adjustment on each unit and are designed to cover the installation space and untrue walls. Dimensions shown within the brochure are approximate and are subject to change without notice.

CHOOSING YOUR SHOWER MIXER AND KIT

STEP 1: IDENTIFY YOUR WATER SYSTEM

There are four possible ways the water in your home is heated and circulated.

LOW PRESSURE GRAVITY FED SYSTEMS

This is a common type of heating system. To create the shower pressure, water flows directly from a cold water tank (cistern) in your loft to a hot water tank (cylinder) in your airing cupboard. The greater the distance from the bottom of the tank to the top of the showerhead, the better your shower will perform. Typically this system has a water pressure of 0.1 bar*.

HIGH PRESSURE COMBINATION BOILER

A combi-boiler heats your water up as soon as you turn the shower or hot tap on. It's often located in the kitchen and supplies water at high pressure. Usually this system has a water pressure of between 1 bar* and 5 bar.

HIGH PRESSURE UNVENTED MAINS PRESSURE

This system stores hot water under pressure in a large cylinder, which is usually found in an airing cupboard or garage. You can identify it by the expansion vessel on top of the cylinder and the absence of a cold water tank. Sometimes, in a refurbished property, an unused cold water tank can be left in place. Usually this system has a water pressure of between 1 bar* and 5 bar.

HIGH PRESSURE PUMPED GRAVITY FED SYSTEM

Essentially a gravity fed system, but with the addition of a booster pump, water is delivered to your shower at high pressure for better performance. The water pressure will depend on the pump, but in most cases this will be between 1 bar* and 3 bar. You may need to increase the capacity of your hot and cold water tanks when a pump is fitted.

*1 bar is equivalent to 10 metres height between the bottom of a cold water tank and the top of the showerhead.

Ideal Standard offers an extensive collection of shower mixers and kits, and we are so confident in our reliability and quality that we provide a five-year guarantee. Our commitment to technological innovation means your daily shower is nothing short of pure luxury.

SHOWER MIXERS

See page 278 for a complete at-a-glance overview of all our shower mixers.

STEP 2: SELECT YOUR PREFERRED SHOWER TYPE

There are three types, each giving a different showering experience. The table below shows which of our shower mixers are suitable for your system.

Thermostatic mixer shower
Maintains a constant temperature irrespective of hot or cold water flow, rate, pressure or temperature. No need to continuously adjust the temperature setting. The safest type of shower.

Venturi mixer shower
A solution to poor flow rate on low pressure gravity systems. Uses high pressure mains to pull low pressure hot water through the shower mixer giving a much higher flow rate than an electric shower.

Manual mixer shower
Relies on adequate temperature control being provided by the hot water system, does not compensate for variations in hot and cold water flow rate, pressure or temperature.

The table shows which of our shower mixers are suitable for your system.

STEP 3: SELECT YOUR STYLE

SHOWER MIXERS AT A GLANCE

Round handles, levers or crossheads; a curved or squared-off backplate; a built-in valve or an exposed bar: with Ideal Standard you're spoilt for choice. Our extensive collection of solid brass contemporary designs in cool chrome are ingeniously designed and beautifully engineered.

Ceratherm 100 exposed shower mixer

The Ceratherm 100 exposed thermostatic bar valve is a major advance in shower technology. Its slim and elegant form incorporates three key innovations: the cool touch body, eco button and fast fix bracket.

RAISING THE BAR

Safer than ever

In a family bathroom, safety is a prime concern. Our thermostatic exposed bar valve incorporates cool touch body technology. The illustration shows how the exterior is kept cool at all times by running the cold water around the hot water flow.

Control at your fingertips

In a high-usage household, it's good to know that we've got water consumption under control. Our eco button limits water flow rate to 50%, and a manual override provides extra power when required.

Fast installation

Being exposed, the valve is naturally easier to fit, but our fast fix bracket design makes installation even simpler and quicker. The step-by-step instructions show you how.

FEATURES

- 'Set and leave' control – set your chosen temperature and leave it
- Temperature handle has a built-in safety stop at 40°C with manual override for a safer shower
- Temperature control mechanism has a temperature limit stop which can be set at 40, 43, 45 or 50°C
- Automatic safety shutdown should the hot or cold water supply suddenly fail for whatever reason
- Cool touch body ensures it is safe to touch
- Eco button reduces water consumption, with manual override
- Ceramic disc control for smooth turning action and no drips
- Shower packs include a removable 8 litres per minute flow regulator to reduce water use
- Shower mixer mounts directly onto wall thanks to the fast fix bracket, saving time and cost
- Five-year guarantee

INSTALLATION GUIDE

1. Ensure the water pipes are level and spaced to 150mm from the centres. Leave 50mm protruding from the wall.
2. Couple the gasket to the rear of the wall plate, incorporating the 3/4" connectors.
3. Slip the wall plate over the ends of the water pipes and screw securely to the wall. Tighten the threaded plugs to secure the olives onto the water pipes.
4. Mount the shroud over the wall plate.
5. Fit the assembled valve unit to the shroud.
6. Using an adjustable spanner, tighten the captive nut to seal the join.
7. Attach the shower hose to the valve outlet.
8. The valve installation is now complete and the unit is ready for use.

KEY TO SYMBOLS

Please use the key below to identify the features of our shower products on pages 282–305.

High pressure installations

Products only suitable for installations with a high water pressure supply. This is a minimum of 1 bar, but is often greater. Types of systems which supply hot and cold water at mains pressure include combination boilers, unvented systems and pumped gravity systems.

Thermostatic valve

Automatically maintains water temperature at the required setting to ensure safe usage and prevent scalding, even when water is drawn off elsewhere.

Ceramic disc

The ceramic disc cartridge principle was developed by Ideal Standard and is the modern way to control water flow. There are no washers to wear and drip. A robust housing contains ceramic discs to control the flow of water through the fitting. Ceramic disc fittings are all 'drip free' and impervious to lime deposit.

Temperature limit stop

Limits the outlet water temperature to a preset level. For manual mixers there are seven settings (1 lowest through to 7 highest) which reduces the range of movement of the lever and therefore the amount of hot water that enters the fitting. For thermostatic mixers the maximum outlet temperature can be limited to 40, 43, 45 or 50°C, meaning that the fitting can be set (usually at installation) to protect more vulnerable users when required.

Cool Body

Body is cool to the touch at all times to ensure safer use and prevent burning.

Eco button

Limits the flow rate to 50% to save on water usage, with a simple manual override to achieve higher flow rates.

Safety stop

Limits the outlet water temperature to 40°C to protect vulnerable users. A simple manual override of the button on the temperature control achieves a higher temperature.

This minimalist exposed valve offers great performance and is safe for all the family.

FEATURES

- Shower mixer suitable for all hot water systems
- Bath shower mixer is recommended for high pressure applications (water pressures between 2.0 and 5.0 bar)
- 'Set and leave' control
- Temperature handle has a built-in safety stop
- Temperature control mechanism
- Automatic safety shutdown
- Cool touch body ensures it is safe to touch
- Ceramic disc control
- Eco button reduces water consumption
- Shower packs include a removable 8 litres per minute flow regulator
- Flow control has integral diverter*
- Five-year guarantee

*Bath shower mixer only.

Ceratherm 100 bath shower mixer.

QUICK
INSTALLATION

Fast fix bracket shower mixer mounts directly onto wall, saving time and cost.

CONCEPT EASYBOX SLIM GERMAN ENGINEERING WITH IDEAL TECHNOLOGY

Concept Easybox Slim is a proven thermostatic shower mixer system that does exactly what its name suggests: installation is simple and its unique shallow design makes it ideal for modern wall cavities.

The unique box housing ensures superior water tightness, and flow performance is assured by the ceramic disc control. Prioritising safety, the separate temperature control includes a built-in safety stop feature.

Faceplate

Superior chromed metal faceplate with separate flow and temperature controls and recommended 40°C position for safe showering.

Watertight

Watertight solid brass body construction for durability.

Thermostatic cartridge

Proven thermostatic cartridge and flow control as used on many other Ideal Standard showers to ensure trouble-free operation.

Thread inlet

Threaded inlet connections rotate for easier connection.

Outer plastic sealing box

Outer plastic sealing box gives increased strength and durability. It also has double sealing for superior watertightness and to greatly reduce the possibility of leakage, which is a significant issue for built-in mixers.

Sealing at the front is achieved using a plastic lid which has tapered seals to the main box and around the two handles. A waterproof membrane sheet is also included. The outer chromed metal faceplate is not a sealed item and can easily be removed for cleaning or servicing.

Versatile mounting bracket

Versatile mounting bracket (supplied) can be fitted to any of the four sides and fixed onto a cross bearer or upright in a cavity wall.

Adjustable legs available as an option for fixing to an uneven brick wall, or for panel or front mounting.

FITS INTO A 43MM CAVITY*

- Ultra slim profile
- British Gypsum Gypwall Rapid DB plus has 43mm cavity plus 15mm plasterboard
- Total depth of 58mm
- Installation will include tiles and adhesive
- Minimum built-in depth of Slim Easybox 58mm
- Will fit into shallow wall cavities found in modern UK houses

BENEFITS TO THE INSTALLER

- The mounting bracket can be fitted to any of the four sides and fixed onto a cross bearer or upright in a cavity wall
- The variety of fixing methods
- The plaster guard to protect the mixer during installation and its integral spirit level lugs
- The integral seals on the sealing plate, meaning there is no need to use a sealant (as required with other similar built-in fittings)

*Plastic sealing box fits into a 43mm cavity. Minimum built-in depth of 58mm is accommodated within the cavity, plasterboard, tiling and adhesive.

STEP-BY-STEP INSTALLATION GUIDE

1. Fix the mixer body into position.
2. Connect the pipework.
3. Make good the wall by plastering around the mixer up to the plaster guard.
4. Fix the waterproof membrane with tiling adhesive.
5. Tile the wall
6. Trim back the mixer body flush with the tiles.
7. Fit the sealing plate.
8. Attach the faceplate and handles.

↗
Concept
Easybox slim
shower pack
£457³⁹

FEATURES

- On the bath shower mixer the flow control also acts as the diverter. The 'off' position is in the centre and the control is turned anti-clockwise for increasing flow to bath, clockwise to shower
- Shower packs include a three-function Idealrain shower kit with round or square handspray to match the mixer faceplate. Handspray includes a removable 8 litres per minute eco flow regulator to save water
- Thermostatic mixer, faceplate and handles are supplied in one box, as are shower packs
- Designed to be installed on low pressure gravity hot water systems (minimum 0.1 bar)* and all types of high pressure systems**
- Flow rate of 5.8 litres per minute at only 0.1 bar, increasing to 18 litres per minute at 1 bar (open outlet)

*Minimum pressure for satisfactory bath fill 1 bar.
**Maximum 5 bar dynamic.

TT VALVE BODY DESIGNED TO BLEND IN

Designed to blend in with virtually any bathroom concept, the TT shower collection has been crafted from solid brass for both quality and durability. The TT valve at the heart of the system is one of the most advanced designs on the market.

FEATURES

- Suitable for all hot water systems, including gravity fed (0.1 bar minimum) and high pressure (5.0 bar maximum)
- 'Set and leave' control – set your chosen temperature and leave it
- Temperature control mechanism has a temperature limit stop which can be set at 40, 43, 46 or 48°C
- Temperature handle has a built-in safety stop at 40°C with a manual override for a safer shower (except Oposta)
- Automatic safety shutdown should the hot or cold water supply suddenly fail for whatever reason
- Ceramic disc control for smooth turning action and no drips
- Can be installed vertically or horizontally
- Has a variable built-in depth between 51.5 to 73.5mm (from finished wall surface)
- Supplied with 3/4" inlets and one 3/4" female mixed outlet
- Five-year guarantee

CHOOSE YOUR FACEPLATE

The TT valve requires a separate TT faceplate – choose from the various options on page 278.

TWIN SEALING SYSTEM

Although handcrafted tiles and mosaics look beautiful they tend to have uneven surfaces. That, together with the fact that a lot more houses and flats have stud partition walls means there's an increasing demand for watertight sealing. The TT faceplates have been constructed with a twin sealing system to address this:

Sealing System One

- This is a conventional waterproof foam seal which is fitted into the sealing plate groove
- When the sealing plate is screwed on to the valve the foam is compressed and forms a flexible seal over uneven surfaces

Sealing System Two

- This is a flexible rubber seal, incorporating fins designed to fit into the tiling trim surrounding the wall opening
- This is a secondary seal against water penetration

HIDDEN BEAUTY

Although it looks like a complicated piece of engineering, the TT valve has actually been designed to be beautifully simple. It uses just one cartridge, which means fewer moving parts and easier maintenance. We've made the non-return valves interchangeable so they can be easily swapped over, so you don't have to re-plumb if the hot and cold inlet pipes have been reversed during the installation.

STEP-BY-STEP INSTALLATION GUIDE

Sleekly stylish, our Ascari valve delivers beauty, simplicity and functionality in a single package. Its hidden asset – the TT thermostatic valve technology – makes it wonderfully easy to use and safe for all the family.

FEATURES

- Suitable for all hot water systems
- 'Set and leave' control
- Temperature control mechanism
- Temperature handle with built-in safety stop
- Automatic safety shutdown
- Ceramic disc control
- Can be installed vertically or horizontally
- Shower packs with Idealrain kit include a removable 8 litres per minute flow regulator to reduce water use
- TT valve **A3969NU** meets the requirements of TMV3 and NHS D-08 schemes
- Five-year guarantee

The Alto EV exposed shower mixer gives a flow performance at low water pressure that's the best in its class, while the new fast fixing brackets make installation a breeze.

Alto EV exposed thermostatic shower pack
£194⁰²

FEATURES

- Recommended for applications where water pressures are between 0.1 and 5.0 bar
- 'Set and leave' control
- Temperature handle has a built-in safety stop
- Automatic safety shutdown
- Single-function Idealrain handspray
- Five-year guarantee

QUICK AND EASY TO INSTALL

1. Tile wall leaving pipes exposed.
2. Check pipework is level.
3. Use guide to mark tiles.
4. Mark and drill walls for brackets.
5. Wall brackets have multiple fixing holes to ensure rigid fixing.
6. Use the guides to attach fixing brackets.
7. Simple fast fix pipe connections to reduce fixing time and the chance of a leak.
8. Fix the shower mixer. Check for leaks and attach hose.

Boost
exposed
thermostatic
shower pack
£659⁴⁵

Innovative and practical, this shower mixer boosts water flow in low pressure areas. Using the Venturi principle, the Boost increases hot water flow rate by harnessing the energy in high pressure mains cold water.

Boost built-in shower pack.

FEATURES

- Power shower performance on gravity hot water systems without the need to fit a pump
- Designed to work where there is low pressure, tank fed hot water and high pressure mains fed cold water
- High pressure mains cold water 'pulls' tank pressure cold water through the Venturi valve inside the shower with the mixed water coming out at a much greater rate than could be achieved using an electric shower or ordinary shower mixer valve
- Excellent showering performance, perfect for guest rooms, en-suites and attic bathrooms
- 'Set and leave' controls
- Automatic safety shutdown
- A dependable alternative to an electric shower, which are notoriously unreliable and have a short life expectancy due to scale forming on the heating element
- Recommended for applications where the hot water pressure is between negative 0.05 bar and positive 0.3 bar pressure. Cold water mains pressure can vary between 1.5 bar and 3.0 bar
- Five-year guarantee

Boost exposed pack.

Blend
built-in
manual
shower
mixer and
Idealrain S3
shower kit
£372⁶¹

With a distinctively shaped, single manual lever that controls both the flow and the temperature of the water, Blend is a mixer shower that's beautifully simple to operate.

Blend exposed pack.

FEATURES

- Easy-to-use single lever operation
- Exposed valve suitable for built-in, exposed, rising or falling pipework
- Fits standard pipework centres of 153mm – adjustable from 147mm to 155mm
- Recommended for applications where water pressures are between 0.1 and 5.0 bar
- Unique temperature limiting device with a choice of settings
- High water flow rate for an invigorating shower
- Five-year guarantee

A complete shower range with one of the flattest handsprays around. Practical for everyday use without compromising comfort, Idealrain brings unsurpassed efficiency, function and ideal showering pleasure. From simple handsprays in a variety of sizes, to shower kits to rainshowers, Idealrain offers a range of choices to suit any bathroom and any need.

SLIM, SMART, REFRESHING

As well as the distinctive profile of its flat head and slim band, the elegant, chrome-accented design notes of Idealrain are incorporated across a range that suits every need. The slim housing offers a maximised showering surface, with no wasted space.

Easy to use. Easy to love.

The unique silicone fin handle is soft and ergonomic, offering total control: change the spray with just a touch of your thumb. And because it's totally integrated with no joints or overhang, it's easy to clean... just like the flexible rubber nozzles.

YOUR CHOICE

Choose from a variety of handsprays, shower kits and rainshowers.

DIFFERENT SIZES

S = 80mm

M = 100mm

L = 120mm

XL = 140mm

Four different sizes, from a compact 80mm to a generous 140mm, mean you can enjoy exactly the shower you want with Idealrain.

THREE SPRAY FUNCTIONS

Saturate

Invigorate

Concentrate

Idealrain is available in both single and multifunction versions. Multifunction offers three spray choices to match your mood: saturate, invigorate and concentrate.

RAINSHOWER

Wall or ceiling mounted, a luxurious rainshower head gives you complete freedom to match your bathroom, your personality and your mood... and a sense of well-being every time you step into the shower; see page 270 for the complete range.

ACCESSORIES

Created by top European designers, bathroom accessories form an integral part of Ideal Standard's bathroom philosophy. Not simply decorative afterthoughts, they are vital elements in the design of a comfortable, well-planned room. The range is extensive and carefully co-ordinated to complement different bathrooms, both in style and in colour.

Important installation and maintenance information

A key element in the performance of a bathroom is the quality of the installation. We recommend you use a plumber from a registered association (see below) and consult him (or her) right from the start. Your local Ideal Standard stockist may offer a plumbing service or, if not, will be able to recommend a qualified plumber.

Recognised plumbing associations

Association of Plumbing & Heating Contractors (APHC)
www.aphc.co.uk Tel: 0121 711 5030
 The Chartered Institute of Plumbing and Heating Engineering
www.ciphe.org.uk Tel: 01708 472791
 Scottish and Northern Ireland Plumbing Employers' Federation
www.snipef.org.uk Tel: 0131 556 0600.

Important cleaning information

It is important to clean your shower door after every use, wiping down all the glass and metal parts with a soft cloth and removing any residual water.

Clean regularly with warm soapy water to avoid limescale build up, especially in hard water areas. Limescale that is allowed to build up will be difficult to remove.

Do not clean with gritty or abrasive products; they will destroy any surface coating or protection.

Never use powder detergents. Liquid detergents may be used if they are free of alcoholic substances.

Never use products such as ammonia, acetone, alcohol and the like because they may permanently damage the shower enclosure.

Care should be taken to avoid contact with strong chemicals such as organic solvents and strippers.

Guarantee

Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee many of them for a lifetime.

Our guarantee is offered on all products that have been used in the manner for which they were intended, and does not apply to any products that have been misused or abused in any way. Products must be installed and cared for in line with our fixing instructions and local water bye-laws. In the unlikely event the product fails within the guarantee period, we offer a free replacement or replacement part (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installation.

- All ceramic products are guaranteed for a lifetime.
- Idealcast and Idealform acrylic baths are guaranteed for 25 years from date of purchase.
- Showers, steel baths, bath panels, furniture, mixers and taps, WC suite seats and cistern fittings are guaranteed for five years from date of purchase. (Cistern and shower door seals are not included. Replacements can be found on our Fastpart website www.fastpart-spares.co.uk.)
- Shower enclosures, wetroom panels and bath screens are guaranteed for ten years and shower trays for 25 years.
- Parts (including push button flush valves) are guaranteed for five years and will be replaced if found to be faulty.
- Cistern diaphragms, seals and shower seals are not included. Replacements may be purchased through our parts supply service.
- When your bathroom has been satisfactorily installed and is working well, please ensure you register your guarantee.
- The guarantee is transferable "it applies to the product not the purchaser" provided guarantee registration details are passed on to the new owner.
- Where we are satisfied that a defect has arisen because of faulty manufacturing or materials we will, at our option, repair or replace the product free of charge to you. If we choose to replace the product and we no longer manufacture the identical model we will replace it with the nearest equivalent in our then current range.
- This guarantee does not apply to general wear and tear or where, in our opinion, the product has been modified, misused, neglected or wilfully or accidentally damaged.
- This guarantee does not cover consequential damage or loss.
- This guarantee does not cover damage and/or malfunction caused by inappropriate cleaning (please refer to our recommended care and maintenance guidelines).
- Mildew build up, the effects of limescale and corrosion are not covered under this guarantee.
- Glass breakage and any consequential damage. (All glass used conforms to EN12150-1 where applicable.) Breakage of glass is not covered by the guarantee as glass by its very nature can shatter.
- Warranty is not transferable in cases where product is reinstalled in subsequent locations.

Conditions

- This guarantee applies only to products purchased and installed in the United Kingdom or the Republic of Ireland.
 - Proof of purchase is required in the event of a claim.
 - Provision of the barcode/serial number will be required to enable product identification.
 - We must be given the opportunity to inspect the product, if we request to do so. The product should not be removed or destroyed before inspection without our consent. We may request photographic evidence in any investigation.
 - The product must have been installed, used and cared for in accordance with our instructions for installation and care. In addition, the products must have been installed in accordance with good plumbing practice.
 - Where our on-site investigation reveals that the reported fault was not due to manufacturing or materials defect a callout charge will be applied.
 - Idealclean glass coating is covered by a one-year guarantee, subject to appropriate maintenance and cleaning.
 - Non glass or metallic spare parts (eg seals and bearings) are subject to normal wear and tear through usage and are therefore covered on all products for two years from installation. These parts will be charged thereafter. Thereafter, such parts are available for purchase through our parts supply service.
 - This guarantee does not affect your statutory rights.
- Ideal Standard pursues a policy of continuing improvement in design and performance of its products. The right is therefore reserved to vary specifications without notice.
- While great care has been taken to ensure accuracy of all prices, product codes, descriptions and dimensions, Ideal Standard reserves the right to correct errors or misprints. Colour reproduction is accurate as possible within the limitations of the printing process.
