Luxurious free-standing baths

Introduction

Clearwater have used international designers to bring together a stunning and elegant range of free-standing baths using the finest materials and engineering. Our innovative material ClearStone has a lustrous finish across modern and classic designs, whereas velvety Natural Stone allows for refined edges and more complex designs across a selection of baths and basins. Choose modern designs that reflect today's contemporary styles, or Classic free-standing, roll top designs with period style.

INDEX:

For full index see inside back cover.

DESIGN. THE MODERN COLLECTION *Pages 04 to 35*

Our beautifully crafted and extensive modern collection has been designed to offer the very best of contemporary style. By using the best materials, our designers have created baths with thinner rims, increasing the internal space whilst allowing for smaller external sizes. So now free-standing baths can fit into bathrooms of modest size, providing an eye-catching centrepiece and that extra piece of luxury. Many of our popular models are available in Grande and Petite sizes, with the Petite internal space just as generous as most conventional baths.

DESIGN. THE CLASSIC COLLECTION *Pages 36 to 46*

For a true vintage look in your bathroom, choose from our range of Classic models, covering every installation and size requirement. There are roll top baths with a choice of feet in various styles and colours, so you can tailor your bath to your own individual tastes and to work seamlessly with your own décor and bathroom surroundings.

MATCHING BASINS *Page 64 to 65*

To co-ordinate with our baths, several designs have matching basins crafted from both ClearStone and Natural Stone, to continue the feeling of luxury throughout your bathroom. Choose from sleek modern designs or Classic shapes to complement your chosen bath.

TAPS AND MIXERS *Page 66 to 73*

To complete the picture we have partnered up with Britton and Burlington to provide both exceptional modern and Classic brassware, which lead the field in innovation.

Materials, engineering & installation

Clearwater has years of experience in designing and making free-standing baths and only use the highest quality materials.

ALL OF OUR BATHS ARE DESIGNED TO PROVIDE:

-  A non-toxic and eco-friendly material which is safe on the skin.
 -  Non-porous, resistant to staining or discolouring
 -  Easy Clean material with high resistance against bacteria, mould and dirt.
 -  Good thermal insulation properties, keeping the water temperature warmer for longer.
- Designed with thin edges to ensure maximum bathing space – a 1600mm Clearstone bath has the equivalent bath space as a 1700mm standard bath.
 - One piece solid surface bath.
 - Available in both modern and classic designs with a variety of sizes.

CLEARSTONE:

This advanced, new material is a fusion of milled sedimentary stone bonded by a high performance aluminium and titanium filler base. The result creates a hardwearing, high gloss surface in a brilliant white colour, with exceptional performance engineered to last a lifetime.

- Aluminium and titanium compound with a stone carbonate base creates an exceptionally strong material, with a high resistance to scratching or chemical damage.
- Moulded polyester polymer coating giving hardwearing high gloss finish.
- High strength to weight ratio with most baths weighing under 100kgs.
- Thinner, more delicate edge outlines - tapering profiles give an overall softer, more sophisticated appearance.

NATURAL STONE:

The hand polished solid surface material remains a favourite with architects and designers, who appreciate the sharp edging and unique sheen of this material.

This unique hand crafted aspect of 'Natural Stone' will continue, being best suited for the more radical and complex designs used in baths like the Lacrima, Lonio and Vigore.

These baths offer:

- Sharper lines
- Hand polished for over ten hours
- No unsightly joins
- Clean dynamic lines
- Small scratches and blemishes can be polished out
- The Natural Stone material is suited to the more complex bath shapes

INSTALLATION. All our baths are designed with simple installation in mind. Full instructions and drawings are available on our website and can be downloaded so the installer can prepare and first fix, ready for when the bath arrives. All Natural Stone and ClearStone baths are carefully packaged for full protection during transit and all Natural Stone and ClearStone baths come with a multi-handle carrier to help handling on site.

Modern

Clearwater has an extensive range of free-standing modern baths in both Natural Stone and ClearStone, in Grande and Petite sizes, a solution suitable for smaller bathrooms. Alternatively, choose from beautiful, ergonomic baths, shaped to provide the ultimate relaxing bathe. All are exquisitely crafted to provide a gorgeous centrepiece in contemporary bathroom settings.

Vicenza Natural Stone bath (as shown) £2525 with Crystal floor-standing bath filler £719 and click-clack waste £37. Also available in Piccolo size.

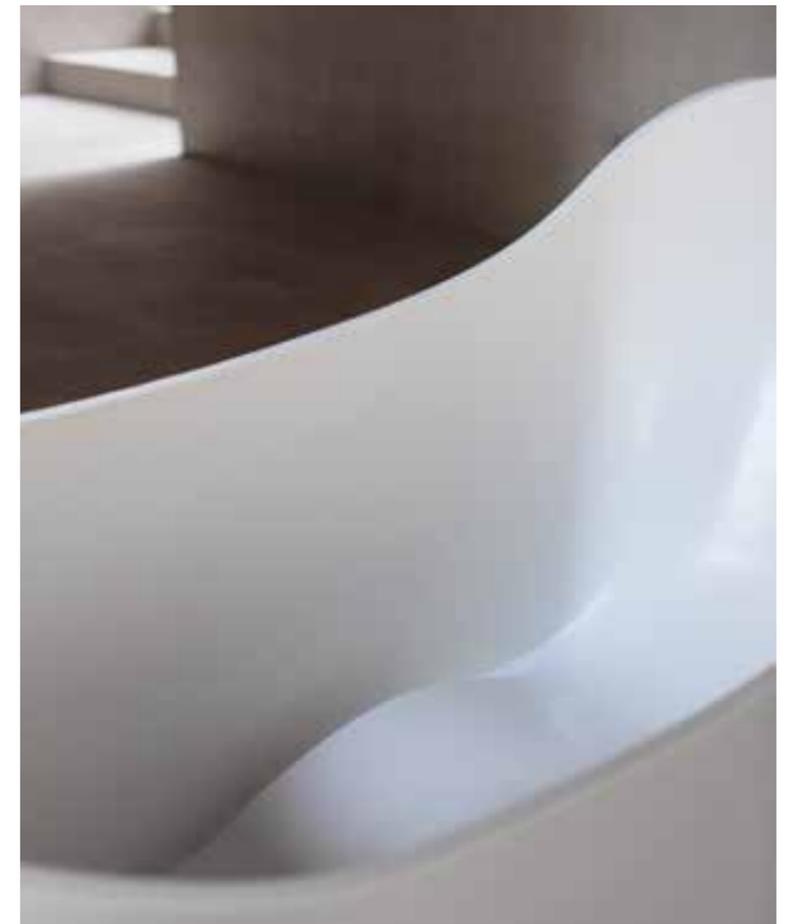

See page 56 for technical details on the Vicenza Natural Stone bath.

VIGORE *Natural Stone* The Vigore creates a stunning profile in the bathroom by raising the viewpoint off the floor with specially designed, all-in-one edged feet all made from the same Natural Stone material. For those looking for an alternative take on the floor-standing modern bath, this is the perfect choice.

Vigore Natural Stone bath £2525, Crystal floor-standing single-lever bath filler £619 and click-clack bath waste £37. See page 57 for technical details on the Vigore bath.

NEBBIA Natural Stone A beautiful ergonomic bath, shaped and styled to provide the ultimate, supportive bathe that feels as if you are floating. The shapely lines of this striking modern bath continue at the base meaning your entire body is supported at the perfect angle.

This bath has to be the ultimate place for relaxation. The Nebbia bath has been moulded around the human body for the ultimate feeling of comfort. The clever use of the patented channels on the side of the bath allows the water to drain, without interfering with the ergonomic shape.

The gentle curves of the Nebbia support the human body, removing the need to 'prop' the body up with the feet on the far end of the bath.

Nebbia Natural Stone bath £2525, Crystal floor-standing bath filler £719 and click-clack bath waste £37.

See page 57 for technical details on the Nebbia bath.

LACRIMA Natural Stone This dramatic, oval shaped, Natural Stone bath provides an eye-catching centrepiece. With its raised stance and imposing structure, this bath is perfect for bathing with a partner. Pair with our Crystal single-lever bath filler for an elegant, architectural look.

Lacrima Natural Stone bath £2525, Crystal floor-standing single-lever bath filler £619, click-clack bath waste £37, P-trap £44 and P-trap connection pipe £109.
See page 58 for technical details on the Lacrima bath.

ARMONIA Natural Stone A classic Natural Stone shape with extra attention to detail on the thin rim and inward sloping design of the outer shape. A larger bath with a comfortably spacious interior. Pair with our Crystal bath filler on stand pipes for a striking yet simple design.

Armonia Natural Stone bath £2525, Crystal bath filler on stand pipes £719 and slotted click-clack waste £37. See page 58 for technical details on the Armonia bath.

Our Baths

EASY INSTALLATION Every Clearwater bath comes with a simple installation guide. All baths are supplied in individual boxes - so they reach your home in perfect condition. In addition we supply each bath in a carrier bag - so that it is easy for installers to move the bath to the proposed location in your bathroom.

HAND MADE Every Clearwater bath is hand made by three people. It takes over ten hours to hand polish every bath. The baths are 'one piece solid surface baths' meaning there are no joins.

The baths retain that 'brand new look' for many years as small scratches/blemishes can easily be removed.

Burlington Bath Taps

Clearwater has paired up with Burlington to offer a range of beautiful, Classic brassware perfectly matched to your chosen Clearwater bath or basin. Choose from either the Anglesey, Claremont, Birkenhead or Kensington tap head ranges and add these to basin taps, bath fillers or bath shower mixers packed with innovative technology and unique features.

For more information on the water saving benefits and innovative design features of Burlington taps, please see the Burlington brochure or visit burlingtonbathrooms.com

Classic screw-down Quarter turn

QUARTER turn
All our taps (except Kensington) come with the classic screw down valves as standard.
For 'Quarter Turn' simply add 'QT' to the product code.

Claremont deck-mounted bath shower mixer with "S" adjuster, see page 72 for details

TAP HEADS

All available with any tap base for all applications

Anglesey
Add AN to the start of the code

Claremont
Add CL to the start of the code

Birkenhead
Add BI to the start of the code

Kensington
(Quarter turn only)
Add KE to the start of the code

STANDARD OR REGENT

All available with any tap base for all applications

Standard

To turn your standard taps into taps with Regent bases, simply add 'R' to your code. For example; your Claremont 3" basin taps (CL1) become Claremont Regent 3" basin taps (CLR1).

All our taps (except Kensington) come with the Classic screw down valves as standard. For 'Quarter Turn' simply add 'QT' to the product code.

Regent (Additional £20 each)

Regent tap bases have been designed so that the spouts are 3cm higher off the bath/basin (and a further 3cm away from the wall in the case of Regent wall-mounted taps) than their equivalent namesake. This creates an opulent feel and, in certain commercial applications, ensures compliance with some archaic building regulations.

Technology

Named Fire Hydrant due to its classic design, this is a very distinctive waste system that operates from the plug hole. Water fills the hydrant which incorporates a built in overflow and plug system, simply lift the handle to empty your bath. This waste system adds a level of opulence to your bathroom.

Fire Hydrant technology
The waste pipe in our 'Fire Hydrant' is designed so that you can change the angles to fit into your waste in the floor.
Fire Hydrants can be used in a free-standing position.

CLEARWATER BATHS, MADE FROM THE HIGHEST QUALITY MATERIALS

Natural Stone. The hand polished, solid surface creates a velvety texture and is best suited for the more radical and complex designs such as the Lacrima, Lonio and Vigore. The Nebbia bath features possibly the most complex inner shape, with carefully crafted, patented channels on the side of the bath, allowing water to drain, whilst the unique internal shape has been designed to curve around the human body, removing the need to 'prop' the body up with feet on the far end of the bath. Thanks to the wonders of Natural Stone, this bath has been moulded to create the ultimate place for relaxation.
