FIND YOUR WOW!...

When planning your bathroom, there's no more important consideration than finding a 'wow' that works for you. Here at HiB, we are dedicated to bringing beauty into the bathrooms of our customers, helping them to create a sanctuary within the home which excites and delights them every day.

With over 25 years of experience under our belt, HiB is renowned for its innovation and peerless quality, but above all else, our commitment to revolutionising bathroom design. From steamfree mirrors to LED colour temperature changing technology, and even Bluetooth enabled cabinets, we understand 'wow' and we know how to help you find yours, no matter what your personal style. So, whether you're addicted to Art Deco, or mad for Minimalism, you'll find your wow with HiB.

WHAT MAKES ALL THE DIFFERENCE MAY SURPRISE YOU...

If you're looking to make your bathroom extra special, you may be wondering which features make the biggest impact. Is it the taps, the shower, the WC? Here at HiB, we know that it's often the traditional 'finishing touch' accessories which can make the biggest difference. That's why, far from a final consideration, we believe that mirrors, cabinets and lighting should be chosen at the very beginning of your design journey.

Imagine a beautiful bathroom, and at the heart, an LED illuminated mirror, or a cabinet that plays your favourite songs at the touch of a button. When you put our products in the picture, it's easy to see how bathroom accessories and furniture can make all the difference, setting the tone for your overall interior concept.

CREATING YOUR **WOW...**

Much like anything else, creating your 'wow' is all in the planning. When designing your bathroom, consider which elements will really bring the space to life and build from there. What really catches your eye when you enter a bathroom? More often than not, it's a beautiful mirror or cutting-edge cabinet and that's where our design expertise comes in.

FIND YOUR MIRROR

Your mirror – quite literally – is a reflection of you and your style aspirations. No matter what the design, your mirror can create the illusion of space, enhance your lighting scheme and deliver the visual fireworks you need for a sincerely spectacular space.

We know that every homeowner, and every bathroom, is different. That's why each HiB mirror has its own distinctive personality, so you can find an option which is as special as you are. If you can't live without your playlist, if you like your lighting 'just so', if you've always got a device to charge, we've got a mirror for you. Browse our collection and find a wow which you can use as the basis for your dream bathroom design.

Deco & Arte Mirrors

“Tastefully Elegance”

Inspired by modernist French designs, Deco & Arte mirrors add a certain “je ne sais quoi” to your bathroom. Available in either round (Arte) or rectangular (Deco) frames flanked by a striped border, bring Parisienne chic into your space with this range.

Deco is available in three sizes and can be hang portrait or landscape. 70x50, 80x60 & 60x120cm wide.

Arte is available in two sizes Ø60 & Ø80cm.

See page 62 for technical details.

ARTE 60 £175 | ARTE 80 £199

Georgia Mirrors

Subtlety is Georgia's strong point, as her simple rectangular shape accommodates any bathroom design. A transparent trim lets the beauty of surrounding wall tiles shine through, giving the illusion that they are part of the border.

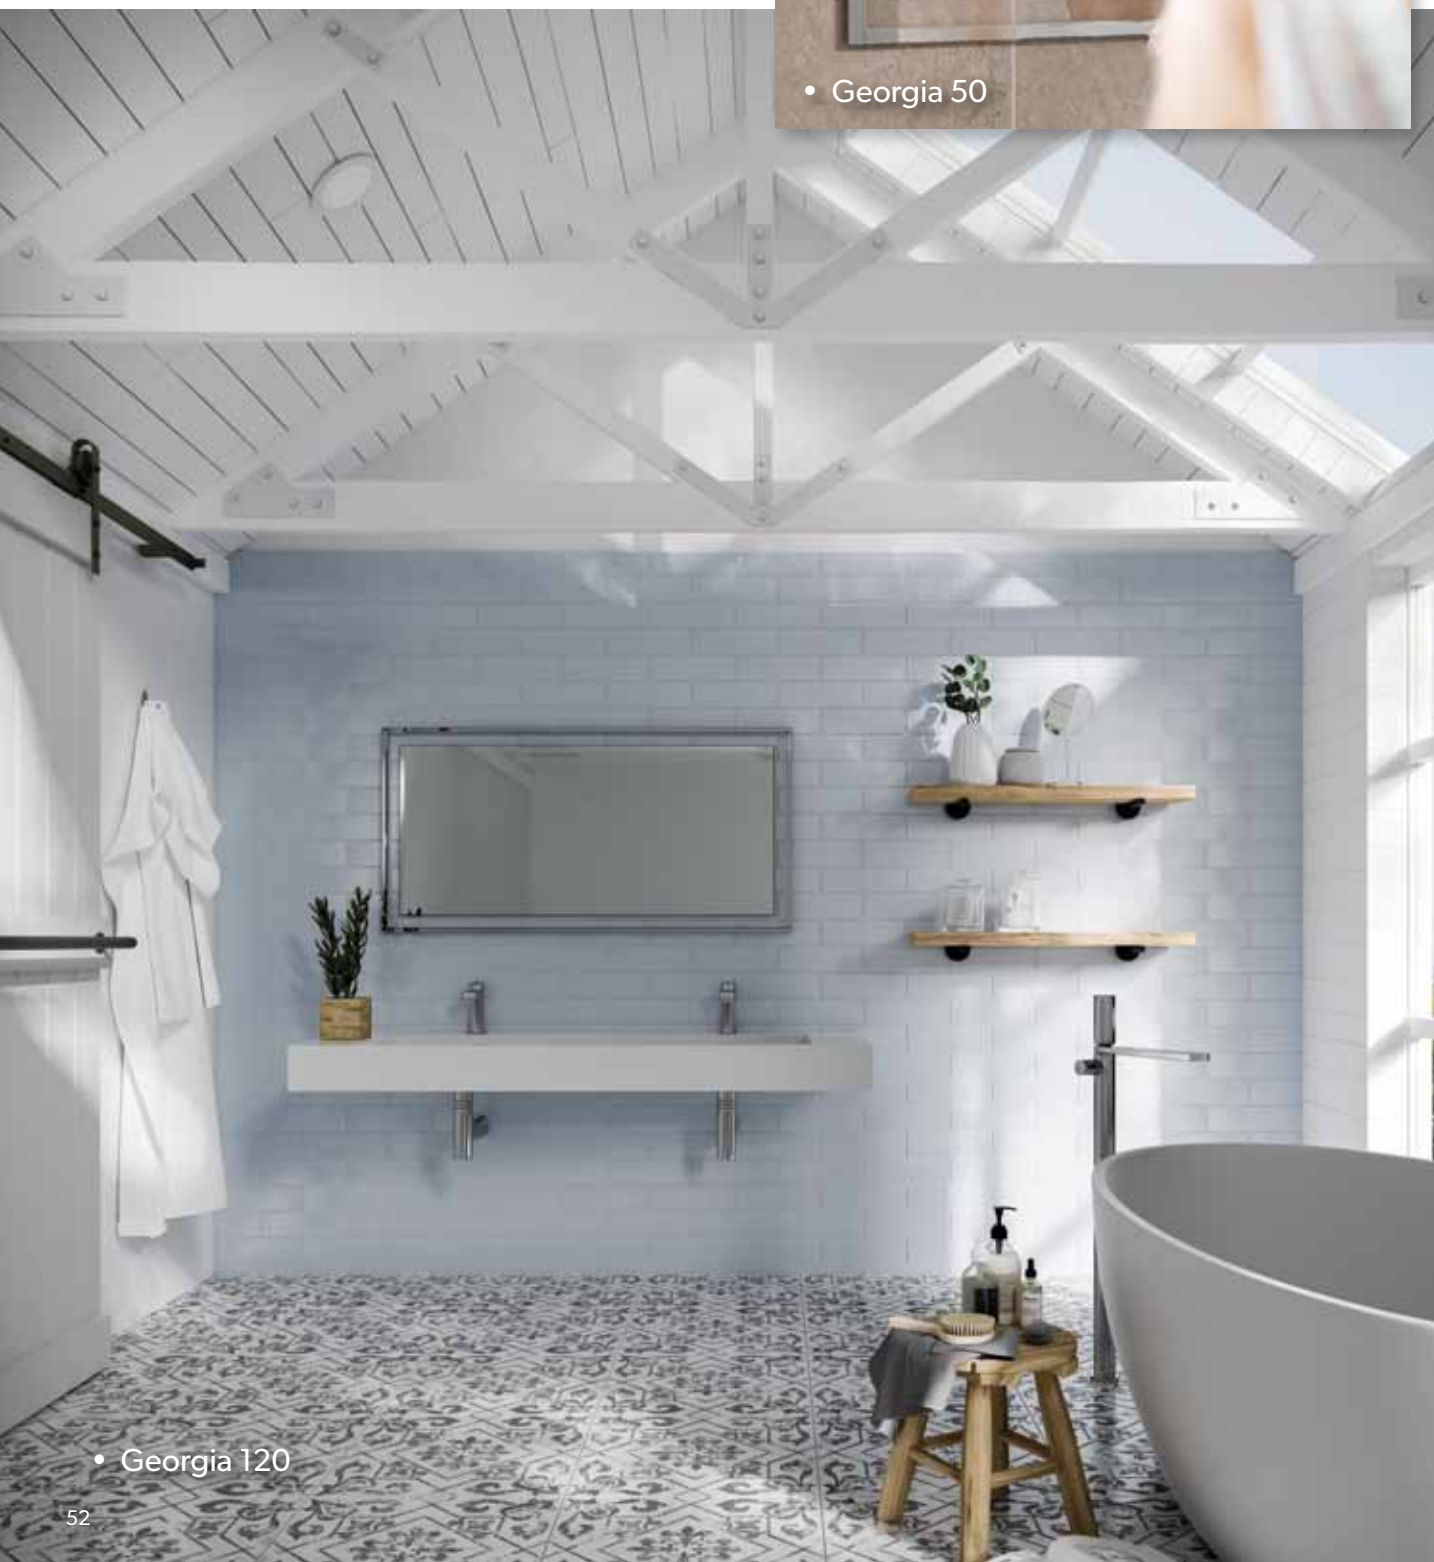

Georgia can be hung portrait or landscape and is available in three sizes 70x50, 80x60 & 60x120cm wide.

See pages 62 for technical details.

KEEP YOUR BATHROOM BEAUTIFUL WITH OUR VENTILATION

Your bathroom is an investment, a sanctuary within the home which you have carefully planned and finessed to perfection. So, why should you get steamed up about ventilation?

Well, with many bathrooms – and especially wetrooms – inadequate ventilation can result in everything from unsightly cosmetic issues to serious structural damage. With this in mind, we created our range of design-led ventilation products, which not only safeguard your bathroom, but actually add an extra layer of subtle style. By finding the right ventilation for you, you can keep your bathroom beautiful for years to come, without compromising on the look and feel of your interior.

- Cyclone, Chrome - Non Illuminated

Cyclone Fans

“Packs a punch in large bathrooms and wet rooms”

This high-powered inline fan packs a real punch in large bathrooms and wet rooms with elevated levels of condensation. The slim, flush mounted grille sits discreetly in the ceiling, and at just 32 decibels, it's quiet enough to maintain the relaxing ambience of your space.

Available in chrome or white finish with optional warm or cool white LED illumination.

See page 126 for technical details.

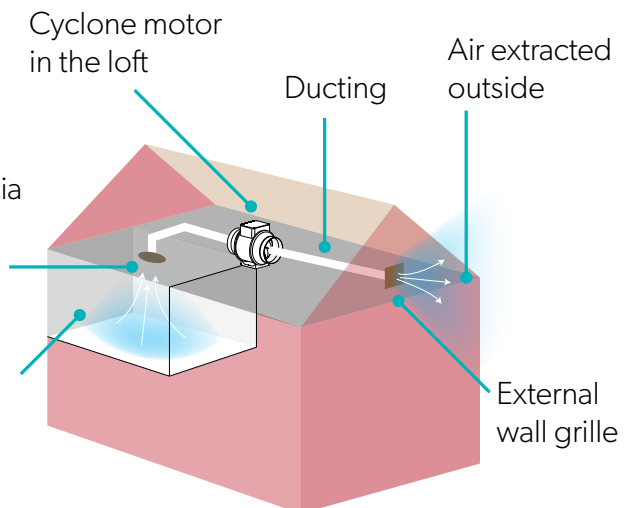

How Cyclone Works

The large and high powered inline motor is remotely sited within the loft space and is connected to the fascia and external wall grille by the supplied flexible ducting.

Turbo Fans

“Turbo-charge your ventilation”

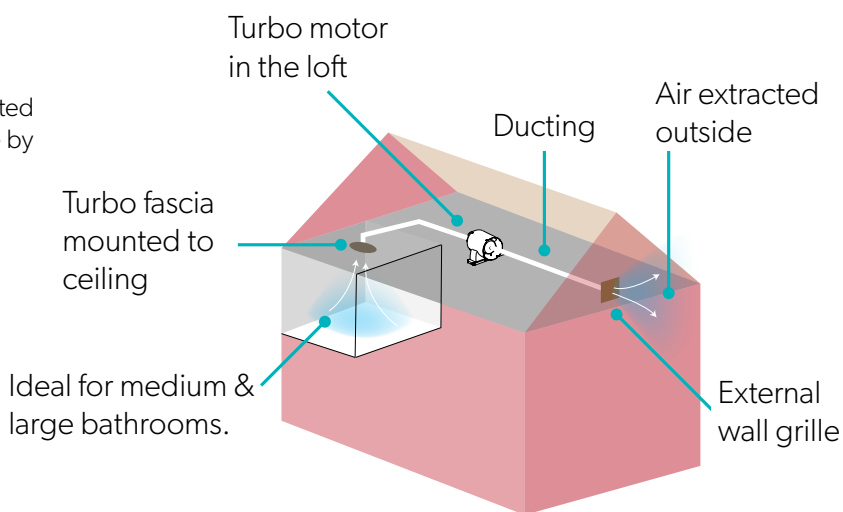

Power meets precision in Turbo. A powerful electric motor effectively removes condensation in medium to large bathrooms to prevent damp, mould and unpleasant odours from forming. It’s quiet too, at just 37 decibels, and runs for only as long as you need.

Available in chrome or white finish with optional warm or cool white LED illumination.

See page 127 for technical details.

Hush Fans

“Vibrant versatility”

Hush combines muted, yet powerful, extraction with modern chic. The ability to mount this fan on either the ceiling or the wall allows you the freedom to choose what works best for your space, without interrupting your carefully planned décor.

Available in three colour finishes with up to three options; timer, timer & humidity sensor and SELV.

See page 128 for technical details.

Breeze Fans

"Fabulous flexibility"

This efficient wall or ceiling-mounted design makes steamy bathrooms a thing of the past; leaving walls, furniture and fixtures free from moisture. A whisper quiet performance and low-profile design ensures complete discretion, whilst a clever, optional humidity sensor allows for your bathroom to be ventilated automatically before condensation builds.

Available in three colour finishes with up to three options; timer, timer & humidity sensor and SELV.

See page 128 for technical details.

What's the difference...

An inline fan is where the fan motor is remotely sited within the loft space and is connected to the fascia and external wall grille by the supplied flexible ducting.

A wall mounted fan is where the fascia has an integrated fan and the ducting passes through the wall to an external grille. Our fans are also suitable for ceiling mounting.

Lighting Regulations

All installations must comply to guidelines which are based on a zonal concept.

The COLOUR CODED DIAGRAM below illustrates this concept and must be followed to ensure the safe installation of bathroom lighting. These regulations apply to domestic installations only.

Zone 1 refers to the area above the shower up to a height of 2.25 metres and requires a minimum rating of IP44 or higher and if the fitting is 240V a 30ma RCD must be used to protect the circuit.

Zone 2 covers an area 0.6 metres wide immediately next to, and all round zone 1. Wash basins should also be treated as zone 2. The minimum rating here is IPX4.

Outside Zone has no special requirements, unless water jets are likely to be used for cleaning purposes.

The IP (Ingress Protection) Standard describes a uniform system for classifying the degrees of protection provided by the enclosures of electrical equipment.

For example, if a bathroom's light is rated IP65, then the 6 means its 'Protected against Dust' and the 5 means its 'Protected against Water Jets' from a shower, tap or cleaning processes from any direction.

First numeral - protection against ingress of foreign bodies, E.G. Tools, dust, fingers, etc.

0 No protection	1 Protected against solid objects with a diameter of 50mm and over (e.g. Accidental insertion of hands).	2 Protected against solid objects over 12mm (e.g. jointed fingers).	3 Protected against solid objects over 2.5mm (tools).	4 Protected against solid objects over 1mm (small wires).	5 Protected against dust - limited ingress permitted (no harmful deposit).	6 Totally protected against dust.

Second numeral - protection against ingress of liquids.

0 No protection	1 Protected against drops of condensed water. Drops of condensed water falling on the enclosure shall have no harmful effect.	2 Protection against drops of liquid. Drops of falling liquid shall have no harmful effect when the enclosure is tilted at an angle up to 15 degrees from the vertical.	3 Protection against rain. Water falling in rain at an angle equal or smaller than 60 degrees with respect to the vertical shall have no harmful effect.	4 Protection against splashing. Liquid splashed from any direction shall have no harmful effect.	5 Protection against water jets. Water projected by a nozzle from any direction under stated conditions shall have no harmful effect.	6 Protection against conditions on ship decks (deck equipment). Water from heavy seas shall not enter the enclosures under prescribed conditions.	7 Protection against immersion in water. It shall not be possible for water to enter the enclosure under stated conditions of pressure and time.	8 Protection against indefinite immersion in water under specified pressure. It shall not be possible for water to enter the enclosure.
