*Taps and  
Showering Collection*

*All No Code brassware  
is designed and made in Italy*

# Welcome

The bathroom is no longer just a place for the everyday ritual of washing. Your bathroom is where you unwind and give yourself much needed 'me time' so why not do it in style?

Our tap and shower collections are designed and **Made in Italy** for stunning high quality and beautiful design. We offer numerous design and installation options to suit your personal style and to give you bathroom design flexibility. Modern, contemporary, traditional or transversal bathroom styling can be enhanced with the right brassware and shower solutions.

Taps are available in a range of finishes including on trend Gold and Bronze or elegant Matt Black and Matt White. For a unique and ultra-stylish look, the Black Chrome finish is one that will instantly elevate any bathroom setting. For the total look, matching bath/shower mixers are available for many of the collections.

Shower solutions vary from basic shower heads and slide rail kits to luxurious chromotherapy heads with multiple water settings. Look out for the EcoAir showers which help to reduce water consumption whilst still providing an indulgent showering experience!

Adding a thermostatic shower mixer will enable you to tailor your showering further by ensuring your perfect water temperature is kept at a constant for comfort and safety. Our thermostatic shower mixers are designed to work at a low pressure of 0.2 bar for the best performance.

*The No Code Team*

*No Code is proud of its curated brassware products, selected for their sophisticated Italian design and high quality Italian manufacturing*

# NoCode taps

## The Sparkle

No Code taps are designed and made in Italy and bring high end quality and designer flair to any bathroom setting.

The high lustre chrome on No Code taps adds sparkle to your bathroom whilst the high level of nickel plating ensures a durable finish.

## Tapping Into Your Style

Choose your look from 13 brassware collections. Designs range from modern square looks to soft contemporary, traditional and transversal styles. There is a tap to suit your personal taste and desired bathroom styling.

Taps have multiple installation options for bathroom design flexibility and collections include matching bath and shower mixers for a harmonious look.

## The Water Saving Option

The Fosca tap has a click function so that you can control the flow of water to reduce water consumption.

You can restrict the water flow to 50% with the lever at 50% operation or push through the lever resistance to gain the full water flow.

## Get The Total Look

We all love matching items for a coordinated look!

Most No Code tap collections include bath/shower mixers in wall mounted, deck mounted and freestanding installation options.

## Design Tips

- For a designer look, check out the wall mounted taps without plates. Choose a tall tap if you want to show off a sit on basin!
- If you have the space for a freestanding bath, go for a freestanding bath mixer to create a show stopping setting!
- Add interest with colour! Ranges offer different finishes such as Gold, Bronze and Black chrome.

For something a little different try a stunning 3 hole tap option from the Pepe, Vita, Tesis, Profili, Laghi, Lucrezia or Dedra collection.

# NoCode thermostatic mixers

## Comfort and Safety

No Code thermostatic mixers combine stunning Italian design and outstanding product performance for a safe and pleasurable showering or bathing experience.

Setting the temperature of the water with a thermostatic mixer avoids the possibility of scalding and ensures that you have a temperature tailored for your personal comfort.

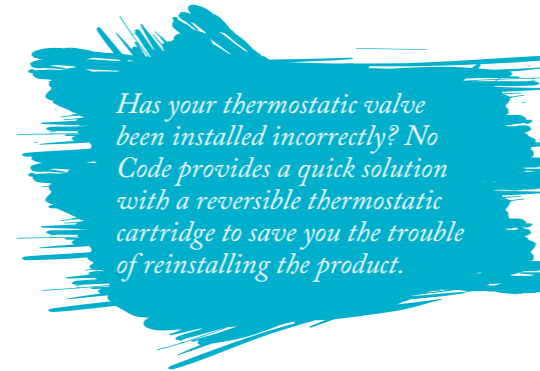

A constant set temperature provides comfort and safety for the family and this is an important consideration for children and elderly members of the family.

## Delivering More

No Code thermostatic mixers are designed to work at a low water pressure. Thermostatic mixers can work at 0.2 bar water pressure! With 3/4 inch inlets and outlets, performance is optimised!

Always check that your thermostatic mixer is suitable for the products that you have installed.

*Has your thermostatic valve been installed incorrectly? No Code provides a quick solution with a reversible thermostatic cartridge to save you the trouble of reinstalling the product.*

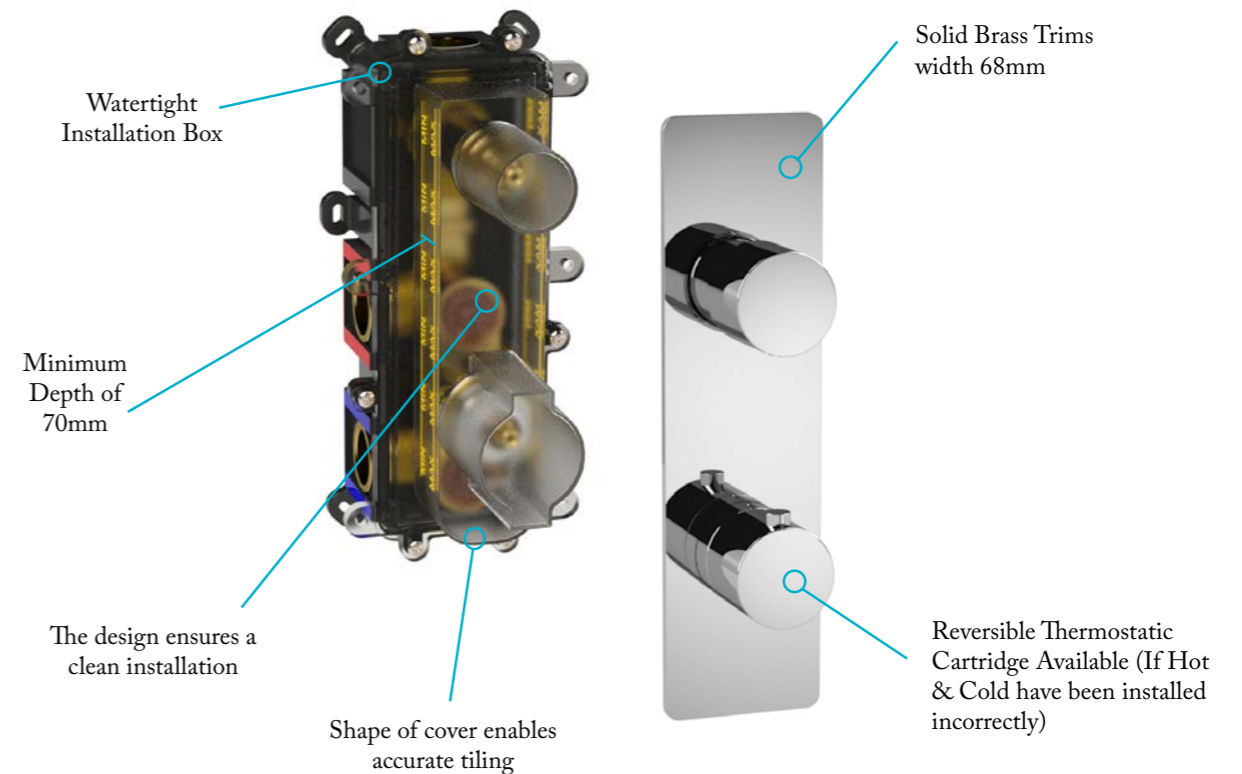

## Easy Install VersoBox

The new VersoBox is a solid brass valve within an easy to install watertight box. Not only does the Install Box ensure a watertight install, the clear plastic front cover protects during any plastering or wall finishing. We also supply a Tanking membrane normally used only in wet room applications. The box has such a shallow depth of between 70–90mm it can be used in any type of wall, and ensures an accurate tiled finish thanks to its straight finish.

Shower valves will perform at a low minimum pressure of 0.2 bar with high flow rates for an enjoyable water experience (see page 148 for flow rate information).

Trim sets are solid brass with the option of Chrome, Inox, Copper or Gold finishes to coordinate with your chosen brassware colour scheme. Shower mixers are available with 1, 2, 3 or 4 exits with vertical or horizontal plates.

# NoCode showers

## Showers Alla Moda!

No Code showers are designed to look and feel luxurious. Designed and made in Italy, showers range from specialised ABS chrome shower heads to statement mirrored steel options mounted flush to ceiling. Shower options take you from everyday simplicity to showering chic.

Shower heads and hand showers are available in a wide range of shapes and styles to create your perfect designer bathroom. Look for matching items to achieve a coordinated look.

## Water Saving Savvy

No Code EcoAir showers offer the pleasure of an air infused water experience with the bonus of reduced water consumption.

EcoAir options are available for shower heads and hand showers.

## The Science Bit

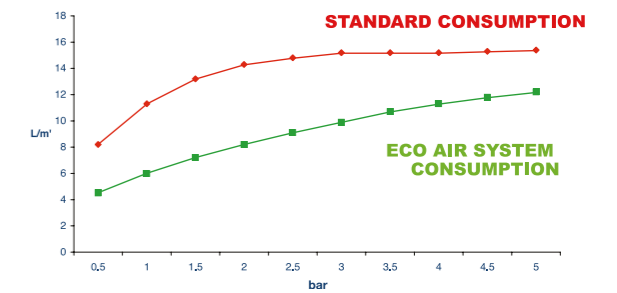

Every No Code EcoAir product has a water inlet and an air intake. As the water passes through a restricted inlet, water pressure increases which in turn sucks the air up through the air intake. This is known as the Venturi effect. Water and air pass into a low pressure mixing chamber where the increased water pressure sucks air into its flow.

## Water Saving

The reduced water flow as a result of the Venturi effect, means that you can benefit from up to a 50% reduction in your water consumption.

## Water Indulgence

The air infused water creates a soft invigorating rain for everyday showering that takes on a level of indulgent luxury.

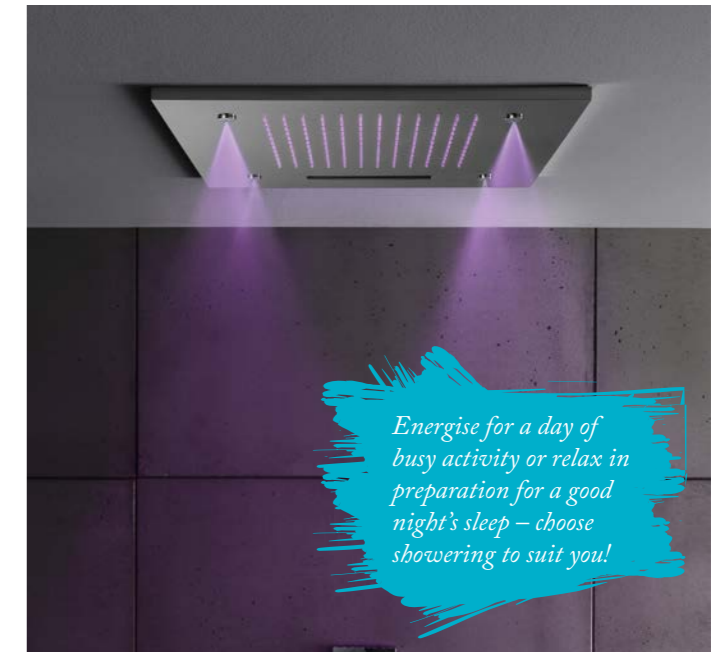

## Showers To Stimulate The Senses

Try a dual or triple flow shower with multiple water settings for a showering experience that meets your needs.

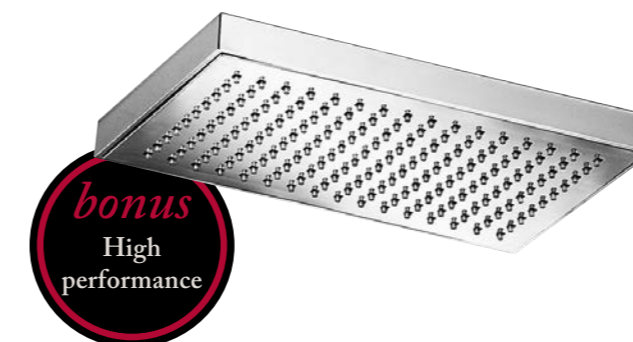

Feel free to customise your showering experience - enjoy an invigorating rain, cocoon yourself in a cosy mist or soothe away the cares of the day under a cascade!

## Shower In Colour

Indulge further with a chromotherapy shower head which uses light and colour to promote mental, emotional and physical wellbeing - see page 109 for colour benefits. Colours can be selected at the touch of a button as all chromotherapy showers have a handy remote control.

*Energise for a day of busy activity or relax in preparation for a good night's sleep - choose showering to suit you!*

## Low Pressure, High Performance

These high performance shower heads offer 17 litres per minute at 0.5 bar water pressure!

- Vista NC44021 200mm ABS Shower Head (p.120)
- Casella NC44015 200mm ABS Shower Head (p.122)
- Senso NC44011 254 x 144mm ABS Shower Head (p.123)

# Vita

The square but delicate design of Vita demonstrates modern simplicity. Vita is defined by its sleek handle and strong lines – pleasantly unassuming but with an air of sophistication.

The collection includes mono, 2 hole and 3 hole mixers plus a wide range of bath/shower mixers, including thermostatic options.

# Chromotherapy Showers

From ancient times, practices using colour have been employed to achieve a healthy equilibrium in the body and mind. Chromotherapy uses light to promote mental, emotional and physical well-being. These showers range from basic to larger shower heads with multiple water settings for a complete spa-like experience.

# *Built-in & Wall Showers*

Built-in shower heads and wall showers make a stylish statement.

Minimalistic and design focused, these options give your showering area a modern make-over. Built-in shower heads are available in round and square designs and range from basic and beautiful to the indulgent triple flow option. Wall showers look great in spa themed settings and are available in dual flow models for an additional waterfall effect.

# *Douche Kits*

A douche kit is a hygienic option when choosing a washing product to use with a bidet. The bracket keeps the handset and hose conveniently positioned and neat when not in use.

# Wastes

Our Smart fillers and wastes are sleek essentials for the bathroom. There are 'pop up' waste options, which are operated by a simple lever or 'click clack' waste options, which have a pushing mechanism. If you have a basin with an overflow, a slotted basin waste is the option for you, whereas a basin without an overflow requires an unslotted waste.

Our bottle traps and pipes have a chrome finish so if these are visible in your chosen installation, it will enhance the beautiful design of your basin.

For an elegant bath filler option, choose our Smartfill, which fills your bath from an outlet built into the overflow. When a Smartfill bath filler and waste is used in conjunction with a wall mounted bath mixer, you have the ultimate minimalistic look. The bath design can shine without any deck mounted taps detracting from its beauty!

# VersoBox installation

1. VersoBox allows for solid wall and stud wall installation

2. The clear cover acts as a tile guide and protective case when plastering the wall

3. Complete with tanking kit for added waterproofing

4. Once tiled it is easy to remove the protective case with a sharp blade

5. Once fully tiled it is completely waterproof

6. VersoBox is the solution for an easy installation

# Symbol Glossary

Water saving

## *Water Saving*

Products which have water saving features. Some shower products will feature EcoAir technology for water saving and this is highlighted by the EcoAir logo.

Low pressure

## *Low Pressure*

Products which operate at a low water pressure of below 1 bar

Extra jets

**5 year guarantee**

However, the guarantee does not cover thermostatic or diverting cartridges as the functionality depends on the water conditions and the periodical maintenance and cleaning recommended.

## *Showers*

Showers have a

**5 year guarantee**

Electrical components for showers have a

**2 year guarantee**

The products in this brochure are chosen for their stylish design and high quality. Products can be bought with confidence, guaranteed free from defective manufacturing.

If you have a problem with any of the No Code products in this brochure, please see the approved retailer you purchased the products from for assistance. Your No Code retailer will be happy to assist you and will work with No Code to resolve your issue.

Where there is no straight forward resolution, the guarantee above applies so that you can have peace of mind.

No Code products are only covered by this guarantee when purchased from an approved No Code retailer, they are installed for private domestic purposes in the UK and they have not been modified in any way.

It is important that No Code products are maintained in accordance with any special instructions provided and are otherwise cleaned carefully with suitable cleaning products. The guarantee covers products in normal domestic use and does not cover damage, neglect, misuse or inappropriate cleaning.

Please note that the guarantee is offered to the original purchaser. The guarantee is in addition to and does not affect your statutory rights.

To allow the continual development of the ranges, No Code reserves the right to change the colour, designs and specifications of the products in this brochure without notice.

*All No Code brassware  
is designed and made in Italy*
