MAKING BATHROOMS BEAUTIFUL

A huge part of creating a distinctive and stunning décor is taking time to consider the features that will make it unique. A carefully chosen mirror or thoughtfully picked out cabinet could be the masterstroke that makes your bathroom stand out.

That's why, here at HiB, we believe in doing our part to create bathrooms that are considered a haven; somewhere to replenish, unwind, relax and indulge.

This has been our philosophy for more than 25 years. Throughout this time, we've been dedicated to crafting exquisite and innovative bathroom mirrors and cabinets which boast stunning LED lighting for that extra wow factor. Our aim is to make our items the centre piece of your dream bathroom and so also offer lighting and ventilation designed to not only fit in with your bathroom décor, but compliment it too.

No matter where your bathroom is in its design process, whether it's a revamp, decorating a new home or helping to improve your current design, we would love to be a part of it.

Robert Ginsberg MD

Transform your bathroom into a place of beauty and serenity with HiB's inspirational core design ideas.

Our innovative thinking and customer orientated approach to product creation has been our driving force since 1990. Since then, we have evolved into a pioneer of bathroom design with a fantastic track record of bringing stunning design details to homes all over the country.

We credit our success to our sparkling innovation and commitment to product development. In this brochure, you'll find inspiration right from the clever minds of our designers where you can immerse yourself in the beautiful world of mirrors, cabinets, furniture, ventilation and lighting.

We've listened to our customers and have relished the opportunity to draw on feedback to make our products even better, which is why you'll find unique and exclusive items that you won't see anywhere else. This is characteristic of the HiB difference and something we're exceptionally proud of.

We also offer impeccable customer service and go above and beyond to ensure ongoing after-sale satisfaction.

Whilst we know that aesthetics are of the upmost importance for our items, we also guarantee quality. All of our products are manufactured to the highest level of engineering excellence and are rigorously tested before we give them the prestigious HiB stamp of approval.

We take great pride and joy in transforming bathrooms across the nation and would love to bring your dreams to life by **making your bathroom beautiful.**

Ready for your close-up?

Gone are the days of the basic magnifying mirror. Today's options put usability and style first.

There really is nothing quite as effective or revealing as a magnifying mirror when it comes to applying flawless make-up, fitting contact lenses or a clean, neat shave.

As the market's leading magnifying mirror specialist, our collection has been designed to not only offer practicality but make a style statement.

Choose from our fantastic range of magnifying mirrors which include features like LED illumination, 3x magnification and 5x magnification.

Cyclone High Powered Inline Fans

What is an inline fan?

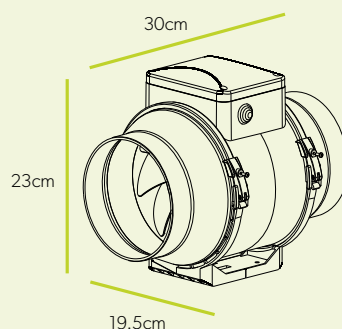

An inline fan is where the fan motor is remotely sited within the loft space and is connected to the fascia and external wall grille by the supplied flexible ducting.

Key Features

Complete kit includes showerlight fascia, inline fan, 3 metre flexible \varnothing 10cm ducting, external fixed grille & steel hose clamps.

- ▲ Powerful 210m³/hr extraction rate.
- ▲ Low noise level of only 32dB.
- ▲ Optional LED showerlight with a choice between warm & cool white illumination.
- ▲ Adjustable run on timer. Select from 2 up to 30 minutes of extraction after the main light is turned off.
- ▲ IPX4 rated, electrically safe for use in the bathroom.

High Powered extraction

Cyclone's high powered air extraction rate is ideal for medium / large bathrooms and wet rooms, where large amounts of condensation needs to be removed.

The large and high powered inline fan is remotely sited within the loft space and is connected to the fascia and external wall grille by the supplied flexible ducting.

High extraction

Turbo's high extraction rate is ideal for medium & large bathrooms, where lots of condensation needs to be removed from the room.

What is an inline fan?

An inline fan is where the fan motor is remotely sited within the loft space and is connected to the fascia and external wall grille by the supplied flexible ducting.

Key Features

Complete kit includes showerlight fascia, inline fan, 3 metre flexible $\varnothing 10\text{cm}$ ducting, external fixed grille & steel hose clamps.

- ▲ 137m³/hr extraction rate.
- ▲ Low noise level of only 37dB.
- ▲ Optional LED showerlight with a choice between warm & cool white illumination.
- ▲ Adjustable run on timer. Select from 2 up to 30 minutes of extraction after the main light is turned off.
- ▲ IPX4 rated, electrically safe for use in the bathroom.

Warm White

Cool White

Hush

A range of ultra quiet, low profile wall mounted fans offering versatility and style while ensuring your bathroom is cleared from condensation.

Key Features

- ▲ Up to 97m³/hr extraction rate.[†]
- ▲ An ultra quiet level of 25dB.
- ▲ Back draft damper.
- ▲ Available in up to three colours and with timer: timer & humidity sensor: and SELV options.
- ▲ White & chrome fascias have the option of Safety Extra Low Voltage motor (SELV)*
- ▲ IPX4 rated, electrically safe for use in the bathroom.

[†]86m³/hr on SELV fans

*What is a SELV fan?

Designed for areas where a fan has to be fitted over or within zone 1 in a room containing a fixed bath or shower according to IEE wiring regulations. Our SELV fans include transformer.

Let there be light

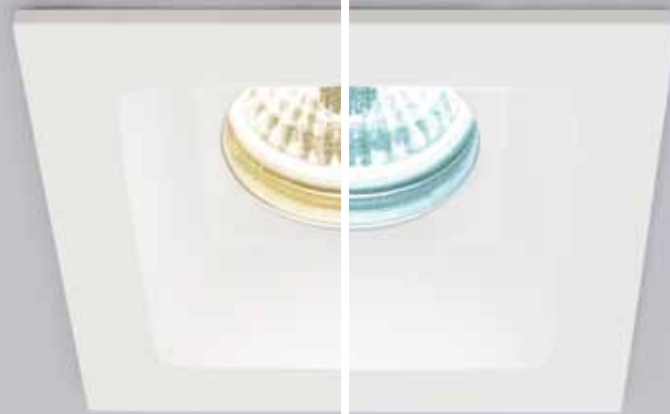

The right choice of lighting can dramatically improve the look of the bathroom, adding sparkle and shine to fixtures and fittings.

LED Showerlights

These matt white finish showerlights help to create a modern look, by offering a semi recessed design.

Key Features

- 8 Watt LED showerlight, offering brilliant illumination whilst reducing power consumption.
- Available square or round, with warm or cool illumination.
- Dimmable illumination.
- IP65 rated, electrically safe for use in the bathroom.
- Suitable for Zone 1.

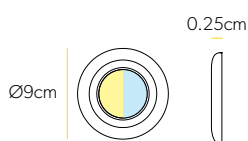

Warm White **Cool White**

Warm white is sometimes preferred for a softer, cosier feel, whilst cool white is perfect for those who favour bright, crisp lighting that enhances the whiteness of sanitary ware.

Lighting Regulations

All installations must comply to guidelines which are based on a zonal concept.

The COLOUR CODED DIAGRAM below illustrates this concept and must be followed to ensure the safe installation of bathroom lighting. These regulations apply to domestic installations only.

Zone 1 refers to the area above the shower up to a height of 2.25 metres and requires a minimum rating of IP44 or higher and if the fitting is 240V a 30ma RCD must be used to protect the circuit.

Zone 2 covers an area 0.6 metres wide immediately next to, and all round zone 1. Wash basins should also be treated as zone 2. The minimum rating here is IPX4.

Outside Zone has no special requirements, unless water jets are likely to be used for cleaning purposes.

The IP (Ingress Protection) Standard describes a uniform system for classifying the degrees of protection provided by the enclosures of electrical equipment.

For example, if a bathroom's light is rated IP65, then the 6 means its 'Protected against Dust' and the 5 means its 'Protected against Water Jets' from a shower, tap or cleaning processes from any direction.

First numeral - protection against ingress of foreign bodies, E.G. Tools, dust, fingers, etc.

0 No protection	1 Protected against solid objects with a diameter of 50mm and over (e.g. Accidental insertion of hands).	2 Protected against solid objects over 12mm (e.g. jointed fingers).	3 Protected against solid objects over 2.5mm (tools).	4 Protected against solid objects over 1mm (small wires).	5 Protected against dust - limited ingress permitted (no harmful deposit).	6 Totally protected against dust.
---------------------------	--	---	---	---	--	---

Second numeral - protection against ingress of liquids.

0 No protection	1 Protected against drops of condensed water. Drops of condensed water falling on the enclosure shall have no harmful effect.	2 Protection against drops of liquid. Drops of falling liquid shall have no harmful effect when the enclosure is tilted at an angle up to 15 degrees from the vertical.	3 Protection against rain. Water falling in rain at an angle equal or smaller than 60 degrees with respect to the vertical shall have no harmful effect.	4 Protection against splashing. Liquid splashed from any direction shall have no harmful effect.	5 Protection against water jets. Water projected by a nozzle from any direction under stated conditions shall have no harmful effect.	6 Protection against conditions on ship decks (deck equipment). Water from heavy seas shall not enter the enclosures under prescribed conditions.	7 Protection against immersion in water. It shall not be possible for water to enter the enclosure under stated conditions of pressure and time.	8 Protection against indefinite immersion in water under specified pressure. It shall not be possible for water to enter the enclosure.
---------------------------	---	---	--	--	---	---	--	---
